Summary

Method
1) Assumed: no payments were made since the arrears balance last equaled 0
2) For each month preceding the account end month, the average bill (for that account's rate code) is subtracted from the total arrears. This process is continued working backwards month-by-month until the arrears balance = $0.
3) All arrears accumulated during Dec, Jan, Feb, Mar, and half of Nov's total were considered "winter accruals" and all other months accumulation were considered "non-winter accruals"
