5	9.50%	0.00%
Total		

Inflation Rates	
Core	3.00%
Decommissioning	4.50%

Final Schedule with 2004-7 conts adjusted down to 75%

Funding Ends 2026
Decom Begins 2026

Target costs equal to \$599.7 in 2003 dollars
Used 4.50% escalation factor
YE 2003 Balance = 11/30 Bal + Dec. contribution
Escalating annual contributions
5 Year phaseout prior to shutdown
Final payment in 2046
FPL target 50%/50% allocation

-Run on 12/17/03

The "TLG Estimate" column reflects the current TLG estimated decommissioning cost of \$599,670,000, escalated each year by the decommissioning inflation rate. The cost estimate thus grows through 2026, and then decreases over the next 20 years as decommissioning expenses are paid, eventually reaching a \$0 balance as the final decommissioning costs are paid in 2046.

The "Balances Total" column reflects the projected balance in the decommissioning trust fund for each year end and includes the owners' contributions, plus the projected earnings, minus fees and expenses. Once decommissioning begins in 2026, the fees and expenses column includes the decommissioning expenses that the TLG study projects will be paid in each year. Assets in the trust fund continue to earn a return during the decom period.

This model is designed to incorporate a number of input assumptions, including current asset values, expected earning rates, future costs, inflation, escalation factors, expenses, allocations and various key dates. The resulting schedule provides for contributions that will allow the fund to cover all decommissioning costs over the specified period.
