**Re: First Calendar Quarter Emissions Verification Summary for Certified Biomass Renewable Energy Sources**

Dear GIS Administrator:

Renewable Portfolio Standard eligibility determinations of generation facilities that use biomass fuels are conditional as required by RSA 362-F:11, III. Within ten days of receiving the quarterly notice from the New Hampshire Department of Environmental Services (DES) that a facility has met DES emissions standards, the Commission must designate the facility as eligible to produce Renewable Energy Certificates (RECs).

Based on the DES recommendation received May 2, 2019, the Commission hereby certifies the following wood-fired power plants listed in **Table 1: Calendar Quarter 1, 2019 - NH REC Eligible Biomass Power Plants**, provided below, as renewable energy sources for the first quarter of 2019. These facilities meet average emission rates of 0.02 lb/MMBtu (or an alternative plan), and 0.075 lb/MMBtu, for total suspended particulate (TSP) and nitrogen oxides (NOx), respectively.

<sup>1</sup> Formerly Eversource Energy, formerly Public Service Company of New Hampshire (PSNH).

<sup>2</sup> Bridgewater Power Company qualifies for NH Class III RECs according to RSA 362-F:11, IV, which allows for a biomass facility that does not meet the particulate (TSP) requirements, but would otherwise qualify for NH RECs, to submit a plan to DES that demonstrates quantifiable emission reductions. The plan is approved by the DES, and the Commission has certified the facility in accordance with the plan approved by the DES.

A list of thermal biomass facilities that have been recommended by the DES and approved by the Commission as thermal renewable energy sources is provided below as **Table 2: Calendar Quarter 1, 2019 - Conditionally Approved Thermal Biomass Sources**. These facilities meet average emission rates of 0.10 lb/MMBtu for TSP and best management practices for NOx.

Please note that **Sullivan County Complex** is newly approved this quarter.

Quarterly Emission Verification Summary reports will no longer list previously approved thermal facilities that are rated less than 3 MMBtu/hr design gross heat input as they are required to meet best management practices determined by DES during initial eligibility certification and do not require quarterly testing and approval. There were no newly eligible small (<3 MMBtu/hr) thermal renewable energy sources certified during calendar quarter 1, 2019.

If you have any questions regarding the DES recommendations, please contact Joe Fontaine at [joseph.fontaine@des.nh.gov](mailto:joseph.fontaine@des.nh.gov) or 603-271-6794. Other questions should be directed to Jason Morse at [Jason.Morse@puc.nh.gov](mailto:Jason.Morse@puc.nh.gov) or 603-271-7965.

Sincerely,

Debra A. Howland
