

Granite State Electric Company d/b/a National Grid
Docket No. DE 08-072
Joint Testimony of C.T. McDonough and P.F. Altenburger

Exhibit 2

Responses to Staff 1-3 and Staff 1-4
of Staff's First Set of Data Requests

Staff 1-3

Request:

Reference Report, page 3, Table 3 – Please provide a detailed breakdown of the feeder hardening work that was performed, including an analysis of the additional costs incurred and increased scope of work required to harden certain feeders.

Response:

During fiscal year 2008, the Company performed feeder hardening activities as part of the REP on the Pelham Sub 14L1 feeder and the Spicket River 13L2 feeder (78 miles of feeder in total). Table 1 below shows the equipment that field crews actually replaced on the Pelham Sub 14L1 feeder versus the number of items that the Company expected to replace based on the design estimates used as part of the budgeting process. The field forces are trained to recognize items to be corrected by feeder hardening and complete them in the field even if they are not specified in the design. In some cases, the field crews replaced fewer items than expected but overall the field replaced 16% more items than the number estimated by the designers. This expanded scope of work drove labor costs higher. Labor costs were also higher than expected because some of the work needed to be performed in the off-hours to accommodate commercial customers. Table 2 below shows the items expected to be replaced on the Spicket River 13L2 feeder as part of the feeder hardening program. However, the number of items actually replaced by field crews on the Spicket River 13L2 feeder will not be available until the job is finally closed which will not occur until the end of June.

Another important explanation for the discrepancy between the budgeted and actual amount of spending for feeder hardening is that the Company, mistakenly, did not include the cost of removing capital assets in the budget estimates. These costs totaled \$193,972.

The Company is using the lessons learned from this performance cycle to improve its budgeting process for its feeder hardening and other REP programs in order to minimize the future variances between the budget and actual spending amounts.

Table 1

Items Installed for 14L1, Pelham Sub,NH

Fdr	Type	Designed Quantity	As-built Quantity
14L1	Animal Guards	155	147

Note 1 : As-built quantities will be finalized after close-out process has been completed.

Staff 1-4

Request:

Reference Report, page 3, Table 3 – Please provide detailed information regarding the number of asset replacements (i.e., reclosers, cutouts, pole replacements, etc.) installed during the fiscal year. Please compare those amounts to the numbers of such replacements originally planned.

Response:

Please see Tables 1 and 2 in the response to Staff 1-3 for a breakdown of asset replacements associated with feeder hardening activities. The table below shows the other asset replacements performed under the REP program for fiscal year 2008.

	Original FY08 Plan	Actual
Recloser Installations	6	9
Cutout Replacements	300	450
Pole Replacements	50	50

VIII.	CONCLUSION	11

1 **I. INTRODUCTION AND QUALIFICATIONS**

2 **Q. Mr. Laflamme, please state your full name and business address.**

3 A. My name is Michael D. Laflamme. My temporary business address is 201 Jones Road,
4 Waltham, Massachusetts 02451.

5

6 **Q. Mr. Laflamme, by whom are you employed and in what position?**

7 A. I am Vice President, Regulation and Pricing – Electricity Distribution and Generation for
8 National Grid USA Service Company, Inc. National Grid USA Service Company
9 provides engineering, financial, administrative and other technical support to subsidiary
10 companies of National Grid USA. My current duties include, among other things,
11 oversight of revenue requirements analysis for National Grid USA’s regulated electricity
12 distribution and generation businesses in New England and New York, including Granite
13 State Electric Company d/b/a National Grid (“Granite State” or the “Company”).

14

15 **Q. Mr. Laflamme, please provide a brief summary of your educational background.**

16 A. In 1981 I earned a Bachelor of Science degree in Business Administration, emphasis in
17 Accounting, from Bryant College in Smithfield, Rhode Island.

18

19 **Q. Mr. Laflamme, what is your professional background?**

20 A. From 1981 through April 2000 I was employed by various subsidiary companies of
21 Eastern Utilities Associates (“EUA”), including EUA Service Corporation (“EUASC”)
22 which provided various accounting, financial, engineering, planning, data processing and

1 other services to all EUA System companies. I joined EUA's accounting department in
2 1981 and transferred to the revenue requirements section of EUASC's Rate Department in
3 1985. I held progressively more responsible positions in revenue requirements prior to
4 transferring to the Treasury Services department of EUASC in 1988. I was promoted to
5 the position of Manager of Treasury Services in 1991. The EUA System was acquired by
6 National Grid USA in early 2000, at which time I joined the National Grid USA Service
7 Company regulatory group. Since that time I have held progressively more responsible
8 position in the regulatory group and was promoted to my current position in June 2008.

9
10 **Q. Mr. Laflamme, have you previously testified before a regulatory commission?**

11 A. Yes, I have testified in proceedings before the New Hampshire Public Utilities
12 Commission ("NHPUC" or the "Commission"), the Massachusetts Department of Public
13 Utilities and the Rhode Island Public Utilities Commission.

14
15 **II. PURPOSE OF TESTIMONY**

16 **Q. What is the purpose of this testimony?**

17 A. This testimony supports the Vegetation Management Program ("VMP") and Reliability
18 Enhancement Program ("REP") Incremental VMP/REP O&M spend and REP capital
19 investment allowance revenue requirements and rate design calculations contained on
20 Attachment 1 and Attachment 2, respectively, to the Company's May 15, 2008 Fiscal
21 Year 2008 REP and VMP Results and Reconciliation filing ("May 15th Reconciliation
22 Filing"). As shown in the May 15th Reconciliation Filing, which is attached to this

testimony as Exhibit 1, the Company has calculated an annual rate adjustment of \$165,840 to be implemented on July 1, 2008. This revenue requirement translates into a percentage increase of 0.76% to base distribution rates.

5 **III. INCREMENTAL VMP/REP O&M SPEND**

6 **Q. Is the incremental VMP/REP O&M spend calculation included in the Company's
May 15th Reconciliation Filing consistent with the terms of the comprehensive
settlement agreement approved by the Commission in Docket DG 06-107
("Settlement Agreement")?**

10 **A.** While the presentation has been modified slightly, the calculation is the same. The
Company has combined the VMP and REP O&M amounts and has added a line titled
"Lesser of Actual Spending and Approved Program Budget" in order to limit the amount
of O&M expenditures to the approved program budget and above which the Company
must absorb with no allowed rate adjustments. This presentation is intended to simplify
the calculation and allow for a consistent calculation year to year.

17 **Q. Would you please explain the calculations contained on Attachment 1, Page 2 of 3?**

18 **A.** The Settlement Agreement at Page 3 of Exhibit GSE-8 provided for the following:

19 "It is understood that, for FY 2008, the Company has already commenced
20 implementation of the REP and VMP Plans. The Company agrees that it
21 will implement aggressive Plans for FY 2008, with an anticipated budget of
22 \$1,950,000 for operation and maintenance expenses. By May 15, 2008, the
23 Company will make a filing with the Commission showing actual operating
24 and maintenance ("O&M") expenses incurred from the REP and VMP
25 Plans' implementation for FY 2008. To the extent the Company has
26 incurred less than \$1,950,000 of operation and maintenance expenses from
27 implementation of the REP and VMP Plans in FY 2008, the difference will

be accounted for and applied to increase the Base Plan O&M amount (as set forth in section (E) below) for the REP and VMP Plans implemented for FY 2009. To the extent the operation and maintenance expenses exceed \$1,950,000, the Company will absorb that cost with no impact to the REP/VMP Adjustment Provision defined below in section (F).”

As shown in the May 15th Reconciliation Filing, the Company incurred VMP/REP O&M expenses in excess of the fiscal year 2008 Base Plan O&M amount of \$1,950,000 as established in the Settlement Agreement and consequently must absorb the incremental amount as shown in the “FY 2008” column.

12 **Q. Would you please explain the amounts reflected in the next four columns of Page 2?**

13 **A.** Yes. The Settlement Agreement established a base O&M expense amount of \$1,360,000 annually for fiscal years 2009 through 2013 and requires the Company to submit a fiscal year VMP/REP plan no later than February 15th for the subsequent fiscal year commencing April 1. Such a filing was submitted by the Company and following review and discussion, the VMP/REP Base Plan O&M budget for fiscal year 2009 was established at \$1,473,832 as shown on Line 3, of Page 2, and setting the limitation for allowable VMP/REP O&M spending for FY 2009. For illustrative purposes, the “Actual” fiscal year 2009 O&M spending was assumed to be the same as the budgeted amount, or \$1,473,832. Consequently, the “Lesser of Actual Spending and Approved Program Budget” is also equal to \$1,473,832, as shown on Line 5. Because this amount is greater than base O&M expense amount of \$1,360,000 as established in the Settlement Agreement, the Company would be allowed a rate adjustment for the incremental amount, or \$113,832, as shown on Line 9. For future fiscal years, the VMP/REP Base Plan O&M budget is assumed to equal

the base O&M expense amount of \$1,360,000 resulting in no required rate adjustments.

Because O&M expenses do not have a permanent revenue requirement impact, the illustrative rate adjustment implemented on July 1, 2010 is for one year only and results in an effective rate decrease on July 2011 at its expiration.

5

6 **IV. REP CAPITAL INVESTMENT ALLOWANCE**

7 **Q. Is the REP capital investment allowance revenue requirement calculation included**
8 **in the Company's May 15th Reconciliation Filing consistent with the terms of the**
9 **Settlement Agreement?**

10 A. Yes it is. The Calculation mirrors the calculation agreed to in the Settlement Agreement
as shown in Exhibit GSE-8, Attachment 1 of that document.

13 **Q. Were there any changes made to the revenue requirements calculation from the**
14 **Settlement Agreement?**

15 A. Yes there were. The Company updated the composite depreciation rate and the property
tax rate to reflect the actual data for calendar year 2007. The support for these rates was
provided with the Company's responses to Staff's First Set of Data Requests, Staff 1-7
and Staff 1-8 respectively. Those Company responses are attached to this testimony as
Exhibit 2.

21 **Q. How was the capital investment amount included in the REP capital investment**
22 **allowance revenue requirement calculation contained on Attachment 1 of the**
23 **Company's May 15th Reconciliation Filing determined?**

1 A. Pursuant to the terms of the Settlement Agreement, Exhibit GSE-8 at Page 4,
2 “The Company’s REP for FY 2008 also will have capital investments
3 associated with it. The Company will be allowed to make up to \$950,000
4 of capital investments in its REP plan for FY 2008, the revenue
5 requirement of which will be included in the REP Capital Investment
6 Allowance, as detailed in section (G) below, effective July 1, 2008. The
7 Company is not required to make this level of investment in FY 2008, but it
8 is expected that the investment will exceed \$500,000, at a minimum”
9
10 As indicated in the May 15th Reconciliation Filing, the Company invested \$1,358,990 in
REP infrastructure in fiscal year 2008. Consequently, the revenue requirement calculation
was based on the \$950,000 capital investment limitation for fiscal year 2008 from the
Settlement Agreement provisions.

15 **Q. Would you please walk through the revenue requirement calculation contained on
Attachment 1, Page 3 of 3?**

17 A. Certainly. Lines 1 through 28 calculate the rate base upon which the Company’s return
allowance is calculated. As shown on Line 1 and Line 2 in the “FY 2008” column, the
fiscal year 2008 annual and cumulative REP program spend is \$950,000 as previously
discussed. Lines 4 through 22 calculate the deferred tax reserve based on the depreciation
rate timing difference between book and tax depreciation rates. The composite book
22 depreciation rate was based on actual data for calendar year 2007 and equals 3.70%. The
23 tax depreciation rate reflects the MACRS 20 year utility property year 1 rate of 3.75%.
24 The resulting cumulative book/tax timing difference is \$475. The cumulative deferred tax
25 reserve equals the cumulative book/tax timing difference times the effective federal and
26 state tax rate, incorporating a 8.5% state rate, of 40.53%, or \$192. The Company’s year-

1 end net rate base of \$914,658, upon which the Company's return allowance is calculated,
2 is shown on Line 28 and consists of the REP capital investment limitation for fiscal year
3 2008, or \$950,000, accumulated book depreciation of \$35,150 and accumulated deferred
4 tax reserves of \$192.

5
6 **Q. Please continue.**

7 A. As agreed to in the Settlement Agreement, the return allowance for the REP capital
8 investment allowance for each July 1st rate adjustment is based on the prior fiscal year-end
9 rate base times the stipulated pre-tax weighted average cost of capital from the Settlement
10 Agreement as shown on Lines 43 through 49, or 11.91%. The resulting return allowance
11 equals the fiscal year-end rate base of \$914,658 times the stipulated pre-tax return rate of
12 11.91%, or \$109,916 as shown on Line 33. Annual depreciation expense of \$35,150 and
13 property taxes of \$21,773 are added to the return amount to arrive at the total revenue
14 requirement of \$165,840. As previously discussed, the property tax amount is based on
15 the actual ratio of municipal tax expense to net plant in service for calendar year 2007
16 applied to the fiscal year-end net plant in service, or the sum of lines 25 and 26.

17
18
19
20 **Q. What is reflected in the subsequent columns shown on Page 3?**

21 A. As discussed earlier, the Company provided its VMP/REP plan for fiscal year 2009 to
Staff on February 15th. After review and discussion, the REP investment target for fiscal

5 year 2009 was established at \$500,000. For illustrative purposes, that target was
6 maintained for each of the fiscal years 2009 through 2012 and actual investments for those
7 years were assumed to be at the targeted level. The calculation of the cumulative revenue
8 requirement which was previously described for fiscal year 2008 was repeated for each of
9 the subsequent fiscal years with incremental rate adjustments, equal to the cumulative
10 revenue requirement less the previous year's cumulative revenue requirement, shown on
11 Line 40 of page 3.

12 **V. SUMMARY**

13 **Q. Would you please summarize Attachment 1 of the May 15th Reconciliation Filing**
14 **included with this testimony as Exhibit 1?**

15 A. Page 1 of 3 provides a summary of estimated rate adjustments for the Incremental
16 VMP/REP O&M spend and REP capital investment allowance. Only the column titled
17 "07/01/2008" represents actual data and is the basis for the rate adjustment to be
18 implemented on July 1, 2008. For subsequent years the annual rate adjustments are
19 illustrative only and equal the sum of the previously described annual Incremental
20 VMP/REP O&M spend reflected on Page 2 of 3 and the annual REP capital investment
21 allowance reflected on Page 3 of 3. Those subsequent year rate adjustments will be the
22 subject of annual filings before the commission. The incremental annual revenue
requirement to be recovered through the Company's distribution rates commencing July 1,
2008 amounts to \$165,840.

1

2 **VI. Rate Design**

3 **Q. Is the procedure for adjusting distribution rates for the REP capital investment**
4 **allowance included in Attachment 2 of the Company's May 15th Reconciliation**
5 **Filing (included herewith as Exhibit 1) consistent with the terms Settlement**
6 **Agreement?**

7

8 A. Yes. The rate design in Attachment 2 of, the May 15th Reconciliation Filing is consistent
9 with the terms of the Settlement Agreement and is the same procedure used to adjust base
10 distribution charges for the rate reductions, pursuant to the Settlement Agreement, which
11 took place for usage on and after August 11, 2007 and for usage on and after January 1,
12 2008, respectively.

13

14 **Q. Please describe the procedure.**

15 A. The procedure for adjusting distribution rates, is presented in Attachment 2 of the May
16 15th Reconciliation Filing. As presented on page 1 of Attachment 2, the Company simply
17 divides capital investment allowance related to the REP on line (1) by the forecasted
18 annual distribution revenue for the twelve month period ended June 30, 2009 on line (2) to
19 calculate the percentage increase on line (3) which is then applied to each of the
20 Company's base distribution charge components. The calculation of the forecasted annual
21 distribution revenue is presented on Page 2 of Attachment 2. The calculation of the new

1 base distribution rates as well as the net proposed total distribution charges to be billed to
2 customers is presented on Page 3 of Attachment 2.

3
4 **VII. Effective Date and Bill Impact**

5 **Q. How and when is the Company proposing that these rate changes be implemented?**

6 A. Consistent with the Commission's rules on the implementation of rate changes, the
7 Company is proposing that these distribution rate changes be made effective for usage on
8 and after July 1, 2008.

9
10 **Q. Has the Company determined the impact of these rate changes on customer bills?**

11 A. Yes. These bill impacts were included as Attachment 3 in the May 15th Reconciliation
12 Filing. Attachment 3 shows that for a typical residential 500 kilowatt-hour Default
13 Service customer, the bill impact of the rates proposed for July 1, 2008, as compared to
14 rates in effect today, is a bill increase of \$0.14, or 0.2%, from \$84.58 to \$84.72. In
15 addition, a bill comparison for a Default Service residential customer with an average
16 kilowatt-hour usage of 673, which is the average monthly usage over the 12 months
17 ending April 2007, has also been included on page 2 of Attachment 3. The total bill
18 impact of the rates proposed in this filing, as compared to rates in effect today, is a bill
19 increase of \$0.20 or 0.2%, from \$114.58 to \$114.78. For other customers, increases
20 range from 0.1% to 0.2%.

21
22 **Q. Has the Company prepared a revised tariff pages reflecting the proposed rates?**

1 A. Yes. The revised tariff pages were included in Attachment 4 of Exhibit 1.

3 **VIII. CONCLUSION**

4 **Q. Does that conclude your testimony?**

5 A. Yes it does.

TABLE OF CONTENTS

INTRODUCTION	1
SECTION 1: ACTUAL O&M EXPENSES	1
SECTION 2: CAPITAL INVESTMENT ALLOWANCE	2
SECTION 3: CALENDAR YEAR 2007 RELIABILITY RESULTS	4

Introduction

Pursuant to the settlement agreement approved by the Commission as part of the National Grid/KeySpan merger proceeding in Docket DG 06-107¹ (“Settlement Agreement”), Granite State Electric Company d/b/a National Grid (“National Grid” or “Company”) is submitting the results of the Reliability Enhancement Plan (“REP”) and Vegetation Management Plan (“VMP”) for fiscal year 2008 (April 1, 2007-March 31, 2008). As required by the Settlement Agreement, this report contains the following information: 1) A report on actual spending on operation and maintenance activities and capital projects for fiscal year 2008, including an explanation of differences from the fiscal year 2008 budget; 2) A request for a capital investment allowance of \$165,840 to be included in rates effective for usage on and after July 1, 2008; and 3) Calendar year 2007 reliability performance results.

Section 1: Actual O&M Expenses

As set forth in the Settlement Agreement, the total allowed base operating and maintenance (“O&M”) budget for fiscal year 2008 was \$1,950,000. Actual O&M expenses incurred during implementation of the REP and VMP for fiscal year 2008 are shown in Tables 1 and 2 respectively. The combined actual O&M expenditure for REP and VMP activities was \$2,169,258. Because the Company’s actual spending on O&M activities during fiscal year 2008 exceeded the base O&M budget for fiscal year 2008, no adjustment to current rates is necessary.²

¹ See Order No. 24,777 (July 12, 2007).

² See Settlement Agreement (Granite State Rate Plan, Exhibit GSE-8 at pp. 3-4).

Table 1. REP O&M Activities

Activities	FY 2008 Actual Expenses
Inspection and Maintenance	\$11,000
O&M related to Capital Expenditures	\$262,741
Total	\$273,741

Table 2. VMP O&M Activities

Activities	FY 2008 Actual Expenses
Spot Tree Trimming	\$15,214
Trouble and Restoration Maintenance	\$19,799
Planned Cycle Trimming	\$796,274
Cycle Trimming Police Detail Expenses	\$79,402
Tree Hazard Removal	\$793,359
Interim Trimming	\$29,965
Tree Planting	\$1,729
Sub-transmission Right of Way Clearing	\$91,063
Other Police Detail Expenses	\$68,712
Total	\$1,895,517

Section 2: Capital Investment Allowance

Actual Capital Expenditures

As set forth in the Settlement Agreement, the Company's allowance for capital expenditures for fiscal year 2008 is \$950,000. Actual capital expenditures made to implement the REP during fiscal year 2008 are shown in Table 3 below. In this filing, National Grid is seeking recovery of the incremental revenue requirement associated with \$950,000 of capital investments in rates, as provided for in the Settlement Agreement.³ As set forth in Attachment 1, the revenue requirement associated with fiscal year 2008 capital expenditures of \$950,000 is \$165,840. The rate design associated with the proposed capital investment allowance is set forth in Attachment 2. Typical bill calculations for all customer classes are

³ See Settlement Agreement (Granite State Rate Plan, Exhibit GSE-8 at pp. 4 and pp. 7-8).

set forth in Attachment 3. Clean and redlined versions of the revised tariff pages are set forth in Attachment 4.

Table 3. Actual 2008 Capital Investment Expenditures

Projects	FY 2008 Actual Capital Investment
Feeder Hardening	\$712,475
Asset Replacement	
- Reclosers	\$361,431
- Cutouts: Installing new cutouts on side taps and replacing potted porcelain cutouts	\$79,612
- Pole Replacements	\$205,472
Total	\$1,358,990

Differences from Fiscal Year 2008 REP & VMP Budgets

Two factors contributed to differences between the proposed fiscal year 2008 REP and VMP budgets (\$950,000 and \$1,950,000 respectively) and actual REP and VMP expenditures for fiscal year 2008. First, during fiscal year 2008 the scope of planned recloser installation projects performed by the Company was expanded to include additional asset replacements. Specifically, the Company expanded the use of reclosers, replaced additional fusing and added load break switches to improve the sectionalization of feeders and improve switching time in the event of a fault. Enhanced use of reclosers and feeder sectionalization is designed to reduce the number of customers interrupted during a fault that occurs on a feeder away from the substation. This has a direct impact on SAIFI. In addition, reduced switching time will reduce the customer interruption minutes associated with an interruption event (i.e., SAIDI and CAIDI). Second, the scope of work required to harden certain feeders was generally greater than forecasted, resulting in increased costs. However, the additional work performed during fiscal year 2008 is expected to improve performance of the targeted feeders,

and help to fulfill National Grid’s commitment to improve its reliability performance and the quality of service to New Hampshire customers. These additional costs were incurred in the process of ensuring that these projects were completed safely and would deliver the intended improvements in reliability performance.

Section 3: Calendar Year 2007 Reliability Results

As required pursuant to the Settlement Agreement, National Grid is providing the results of its calendar year 2007 reliability performance showing the effects of excluding weather events that qualify for exclusion under the IEEE Standard 1366 definition of a Major Event Day as well as the effects of excluding weather events that qualify for exclusion under the PUC Major Storm Definition historically used by the Commission for the Company. Customers Interrupted, Customer Minutes Interrupted, SAIDI, SAIFI, and CAIDI statistics are provided in Table 4 for calendar year 2007.

Table 4. Calendar Year 2007 Reliability Results

Exclusions ¹	Customers Interrupted	Customer Minutes Interrupted	SAIFI	SAIDI	CAIDI
PUC Major Storm ²	79,042	9,196,645	1.96	228.36	116.35
PUC Major Event Days ² plus 8/16 and 8/25	72,005	5,344,033	1.79	132.70	74.22
IEEE Major Event Days ³	80,518	7,099,822	2.00	176.29	88.18

1. Only events involving 1 or more customers and more than 5 minutes are included in the calculated statistics.
2. PUC Major Storm: [(CI >= 15 % of Customers Served and 30 concurrent events) or (45 concurrent events)], PUC days excluded in 2007 are 1/15, 1/16, 4/15 – 4-19.
3. IEEE Major Event Days: Using IEEE criteria, days excluded in 2007 are 1/15, 4/15, 4/16, 8/16, 8/25.

DOMESTIC SERVICE RATE D

AVAILABILITY

Retail Delivery Service under this rate is available for all domestic purposes in an individual private dwelling or an individual apartment and for farm purposes. If electricity is delivered through more than one meter, the charge for electricity delivered through each meter shall be computed separately under this rate.

CHARACTER OF SERVICE

Service supplied under this rate will be single phase, 60 cycle, alternating current, normally three-wire service at a nominal voltage of 120/240 volts or three-wire 120/208 volts, whichever is available at the location.

RATE PER MONTH

The rate per month will be the sum of the applicable Customer and Energy Charges subject to the adjustments in this tariff:

Rates for Retail Delivery Service

Customer Charge

\$4.31 per month

Distribution Energy Charges

Regular Use

1.623 cents per kilowatt-hour for the first 250 kilowatt-hours
4.226 cents per kilowatt-hour for the excess of 250 kilowatt-hours

For customers who received service under the off-peak provisions of the Domestic Service Rate D prior to April 1, 1991, the following rates shall apply:

Off-Peak Use: 16 Hour Control

For all electricity separately metered and delivered during off-peak hours, the price of such electricity shall be:

1.552 cents per kilowatt-hour if a Customer has installed an electric water heater of a type approved by the Company, and electricity delivered to such water heater is supplied only under this rate.

Off-peak hours shall be the hours between:

January 1 – March 8	11:00 p.m. and 7:00 a.m. on the next day
March 9 – April 5	12:00 a.m. and 8:00 a.m.*
April 6 – October 25	11:00 p.m. and 7:00 a.m. on the next day
October 26 – November 1	10:00 p.m. and 6:00 a.m. on the next day*
November 2 – December 31	11:00 p.m. and 7:00 a.m. on the next day

*The off-peak hours defined above are applicable during 2008 and reflect the difference between when the customer's meter records off-peak kWh consistent with the pre-2007 Daylight Savings Time schedule and the revised Daylight Savings Time schedule mandated by the federal Energy Policy Act of 2005.

(Issued in Compliance with Order No. _____ in Docket DG 06-107 dated _____)

Off-Peak Use: 6 Hour Control

For all electricity separately metered and subject to the Company's right to limit the operation of the bottom water heating element up to 6 hours a day, the price of such electricity shall be:

1.623 cents per kilowatt-hour if a Customer has installed an electric water heater of a type approved by the Company, and electricity delivered to such water heater is supplied only under this rate.

Farm use

The availability of the Farm Use Section is limited to those locations which were served under the Farm Use Section of Domestic Rate D, N.H.P.U.C. No. 8 - Electricity immediately prior to the effective date of this rate. For such farm customers, where all electricity is supplied by the Company, the RATE PER MONTH is modified as follows:

2.524 cents per kilowatt-hour for all Regular Use kilowatt-hours in excess of the greater of the following:
(a) 500 kilowatt-hours
(b) 100 kilowatt-hours per kilovolt-ampere of transformer capacity needed to serve the Customer

APPROVED TYPES OF WATER HEATERS FOR USE UNDER PROVISIONS OF
OFF-PEAK USE CLAUSE OF DOMESTIC RATE D

The specifications for an approved type of water heater for all domestic applications are as follows:

(1) It shall be of standard manufacture and have a capacity and corresponding heating elements as specified below:

<u>Approx. Tank Size Gallons</u>	<u>Rating Top Unit Watts</u>	<u>Rating Bottom Unit Watts</u>
80*	4500	3000
100 to 120	4500	4500
150	5000	5000

*Water heaters of less than 80 gallons with top and bottom heating elements of not more than 4500 watts each may be installed at the Company's option, with the permission of the Regional Executive.

(2) It shall be equipped with a top and bottom heating element, each controlled by a separate thermostatic switch. The thermostatic switch for the top element shall be of a double-throw type so connected as to

Issued:

Effective: July 1, 2008

permit operation of only one heating element at a time. The thermostat for the bottom element shall be of single-pole, single-throw type. The top and bottom units shall be designed for nominal 240-volt operation.

- (3) It shall have a pressure rating of not less than 250 pounds-per-square-inch test.
- (4) It shall be equipped as purchased with an approved fuel cut-off type temperature limit switch having its temperature sensitive element in contact with tank surface within 12 inches of top and so connected as to completely disconnect the heating elements from the power supply.
- (5) The thermostats for the top and the bottom heating units shall have a range of temperature settings extending from 120 degrees to 170 degrees Fahrenheit with the bottom element setting maintaining approximately a 10-degree differential above the setting of the top element.
- (6) The water heater and the installation thereof shall conform to the National Electric Code, to any State of local requirements, and to those of the Company.

The Customer shall provide a separate circuit for the water heater, of ample capacity and designed for 240-volt operation, to which no equipment other than the water heater shall be connected. Specific water heating connection diagrams for each type of service and rate application are available from the Company.

INTERRUPTIBLE CREDITS

The Company will provide, own and maintain a suitable switch designed to control the operation of selected appliances so that the appliance may operate only during the hours chosen by the Company.

If the Customer has installed an electric water heater of a type approved by the Company, and permits the Company to control the operation of the water heater for the specified number of hours per day and during emergency situations, the Customer will receive the following credit each month:

	<u>Control hrs./day</u>	<u>Credit</u>
IC-1	6	\$4.80
IC-2	16	\$6.40

ELECTRIC ASSISTANCE PROGRAM

Eligible customers taking service under this rate will receive a discount as provided on Page 86 of this Tariff of which this rate is a part. Eligibility shall be determined in accordance with the Electric Assistance Program Provision on Page 86 of this Tariff. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

SYSTEM BENEFITS CHARGE ADJUSTMENT PROVISION

Customers taking service under this rate will be charged a System Benefits Charge as provided on Page 77 of the Tariff of which this rate is a part. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

MINIMUM CHARGE

\$4.31 per month Customer Charge.

BIMONTHLY BILLING

The Company reserves the right to read meters and render bills on a bimonthly basis. When bills are rendered bimonthly, the Customer Charge, the kilowatt-hours stated in each block and the Minimum Charge shall be multiplied by two.

TERMS OF PAYMENT

The above rate is net, billed monthly or bimonthly and payable upon presentation of the bill.

TERMS AND CONDITIONS

The Company's Terms and Conditions in effect from time to time, where not inconsistent with any specific provisions hereof, are a part of this rate.

DOMESTIC SERVICE RATE D-10
OPTIONAL PEAK LOAD PRICING RATE

AVAILABILITY

Retail Delivery Service under this rate is available for all domestic purposes in an individual private dwelling or an individual apartment and for farm purposes to selected customers presently served under Rate D.

If electricity is delivered through more than one meter, the charge for electricity delivered through each meter shall be computed separately under this rate. The availability of this rate will be subject to the Company's ability to obtain the necessary meters and to render such service.

CHARACTER OF SERVICE

Service supplied under this rate will be single phase, 60 cycle, alternating current, normally three-wire service at a nominal voltage of 120/240 volts or three-wire 120/208 volts, whichever is available at the location.

RATE PER MONTH

The rate per month will be the sum of the applicable Customer and Energy Charges subject to the adjustments in this tariff:

Rates for Retail Delivery Service

Customer Charge

\$7.40 month

Distribution Energy Charges

On-Peak 4.691 cents per kilowatt-hour

Off-Peak 0.000 cents per kilowatt-hour

Peak hours will occur Monday through Friday, excluding holidays, on the following schedule:

January 1 – March 8	8:00 a.m. to 9:00 p.m.
March 9 – April 5	9:00 a.m. to 10:00 p.m.*
April 6 – October 25	8:00 a.m. to 9:00 p.m.
October 26 – November 1	7:00 a.m. to 8:00 p.m.*
November 2 – December 31	8:00 a.m. to 9:00 p.m.

*The Peak hours defined above are applicable during 2008 and reflect the difference between when the customer's meter records on-peak kWh consistent with the pre-2007 Daylight Savings Time schedule and the revised Daylight Savings Time schedule mandated by the federal Energy Policy Act of 2005.

Off-Peak hours will be all other hours Monday through Friday, and all day on Saturdays, Sundays, and holidays.

The holidays will be: New Year's Day, President's Day, Memorial Day, Independence Day, Columbus Day, Labor Day, Veteran's Day, Thanksgiving Day and Christmas Day. All holidays will be the nationally observed day.

GENERAL SERVICE TIME-OF-USE RATE G-1

AVAILABILITY

Retail Delivery Service under this rate is available for all purposes except resale, subject to the provisions of this section. A Customer will take delivery service on this rate if the Company estimates that its average use will be greater than or equal to 200 kW of Demand.

A Customer may be transferred from rate G-1 at its request or at the option of the Company if the customer's 12 month average monthly demand is less than 180 kW of Demand for 3 consecutive months.

If electricity is delivered through more than one meter, except at the Company's option, the charge for electricity delivered through each meter shall be computed separately under this rate. If any electricity is delivered hereunder at a given location, then all electricity delivered by the Company at such location shall be furnished hereunder, except such electricity as may be delivered under the provisions of the Limited Commercial Space Heating Rate V.

The actual delivery of service and the rendering of bills under this rate is contingent upon the installation of the necessary time-of-use metering equipment by the Company; subject to both the availability of such meters from the Company's supplier and the conversion or installation procedures established by the Company.

All customers served on this rate must elect to take their total electric service under the time-of-use metering installation as approved by the Company. If delivery is through more than one meter, except at the Company's option, the Monthly Charge for service through each meter shall be computed separately under this rate.

CHARACTER OF SERVICE

Service supplied under this rate will be 60 cycle, three-phase alternating current normally at a nominal voltage of 120/208, 277/480, 2400, 4160, 4800, 7200, 13,200 and 13,800 volts.

All voltages are not available in every area.

RATE PER MONTH

The Rate Per Month will be the sum of the applicable Customer, Demand and Energy Charges subject to the adjustments in this tariff.

Rates for Retail Delivery Service

Customer Charge

Distribution Demand Charge

\$4.02 per kW of Peak Hours Demand per Month

Distribution Energy Charges

Peak Hours Use 0.133 cents per Kilowatt-hour

Off-Peak Hours Use 0.000 cents per Kilowatt-hour

Peak hours will occur daily on Monday through Friday, excluding holidays, on the following schedule:

January 1 – March 8	8:00 a.m. to 9:00 p.m.
March 9 – April 5	9:00 a.m. to 10:00 p.m.*
April 6 – October 25	8:00 a.m. to 9:00 p.m.
October 26 – November 1	7:00 a.m. to 8:00 p.m.*
November 2 – December 31	8:00 a.m. to 9:00 p.m.

*The Peak hours defined above are applicable during 2008 and reflect the difference between when the customer's meter records peak kWh, peak kW, peak kVa and peak kWh consistent with the pre-2007 Daylight Savings Time schedule and the revised Daylight Savings Time schedule mandated by the federal Energy Policy Act of 2005.

Off-Peak hours will be all other hours daily Monday through Friday, and all day on Saturdays, Sundays, and holidays.

The holidays will be: New Year's Day, President's Day, Memorial Day, Independence Day, Columbus Day, Labor Day, Veteran's Day, Thanksgiving Day and Christmas Day. All holidays will be the nationally observed day.

TRANSMISSION SERVICE COST ADJUSTMENT

Transmission service is available to all retail Customers taking service under this rate. For those Customers, the Transmission Energy Charge shall be calculated in accordance with the Company's Transmission Service Cost Adjustment Provision as provided on Page 79 of the Tariff of which this rate is a part. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

STRANDED COST ADJUSTMENT

All energy billed under this rate is subject to a Stranded Cost Energy Charge which rate shall be adjusted from time to time in accordance with the Company's Stranded Cost Adjustment Provision as provided on Page 80 of the Tariff of which this rate is a part. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

GENERAL LONG HOUR SERVICE RATE G-2

AVAILABILITY

Retail Delivery Service under this rate is available for all purposes except resale, subject to the provisions of this section. A Customer will take delivery service on this rate if the Company estimates that its average use will be greater than or equal to 20 kW of Demand but is less than 200 kW of Demand. If electricity is delivered through more than one meter, except at the Company's option, the charge for electricity delivered through each meter shall be computed separately under this rate.

A customer may be transferred from rate G-2 at its request or at the option of the Company if the customer's twelve (12) month average monthly demand is less than 18 kW of demand for three consecutive months.

If any electricity is delivered hereunder at a given location, then all electricity delivered by the Company at such location shall be furnished hereunder, except such electricity as may be delivered under the provisions of the Limited Commercial Space Heating Rate V.

CHARACTER OF SERVICE

Service supplied under this rate will be 60 cycle, three-phase alternating current normally at a nominal voltage of 120/208, 277/480, 2400, 4160, 4800, 7200, 13,200 and 13,800 volts.

All voltages are not available in every area.

RATE PER MONTH

The Rate Per Month will be the sum of the applicable Customer, Demand and Energy Charges subject to the adjustments in this tariff.

AVAILABILITY

Retail Delivery Service under this rate is available for all purposes except for resale. A Customer will take delivery service on this rate if the Company estimates that its average use will be less than 20 kW of demand. If electricity is delivered through more than one meter, except at the Company's option, the charge for electricity delivered through each meter shall be computed separately under this rate.

CHARACTER OF SERVICE

Service supplied under this rate will be 60 cycle, alternating current either:

- (a) Single-phase normally three-wire at a nominal voltage of 120/240 volts.
- (b) Three-phase secondary normally at a nominal voltage of 120/208, or 277/480 volts.
- (c) Three-phase primary normally at a nominal voltage of 2400, 4160, 4800, 7200, 13,200 or 13,800 volts.

All voltages are not available in every area.

RATE PER MONTH

The rate per month will be the sum of the Customer and Energy Charges subject to the adjustments in this tariff:

Rates for Retail Delivery Service

Customer Charge

\$5.45 per month.

Distribution Energy Charge

3.041 cents per kilowatt-hour.

Issued:

Effective: July 1, 2008

Issued by: /s/ Thomas B. King

Thomas B. King

(Issued in Compliance with Order No. _____ in Docket DG 06-107 dated _____)

SYSTEM BENEFITS CHARGE ADJUSTMENT PROVISION

Customers taking service under this rate will be charged a System Benefits Charge as provided on Page 77 of the Tariff of which this rate is a part. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

MINIMUM CHARGE

\$5.45 per Month Customer Charge

However, if the KVA transformer capacity needed to serve a customer exceeds 25 KVA, the minimum charge will be increased by \$1.61 for each KVA in excess of 25 KVA.

BIMONTHLY BILLING

The Company reserves the right to read meters and render bills on a bimonthly basis. When bills are rendered bimonthly, the Customer Charge and the Minimum Charge shall be multiplied by two.

TERMS OF PAYMENT

The above rate is net, billed monthly or bimonthly and payable upon presentation of the bill.

TERM OF AGREEMENT

A Customer served under this rate must provide the Company with one-year prior written notice before installing additional on-site, non-emergency generation for its own use. This notice provision shall be waived with respect to the installation of on-site non-emergency generation from renewable energy resources. Renewable energy resources shall mean fuel cells (including natural gas powered fuel cells), and emerging power generation technologies that produce electricity from wind energy, solar energy, small-scale hydro power, ocean power, landfill gas, sustainably managed biomass, and future clean renewable technologies.

OUTDOOR LIGHTING SERVICE RATE M

AVAILABILITY

Public Lighting

Available for Street or Highway lighting to any town, city or fire district.

Installations on limited access highways and the access and egress ramps thereto are subject to the Special Rate Conditions of this tariff.

Private Lighting

Available to private customers for outdoor lighting where necessary fixtures can be supported on existing poles and where such service can be supplied from existing secondary distribution facilities.

In special circumstances outlined in the pole and accessory section below, the Company will install a wooden pole.

RATE

Luminaire Charge

LIMITED COMMERCIAL SPACE HEATING RATE V

AVAILABILITY

The availability of this rate is limited to the following customers: 1) those who immediately prior to the effective date of this rate were served under Commercial Space Heating Rate V, N.H.P.U.C. No. 8 - Electricity and are presently receiving service under this rate, and 2) those who requested service under this rate prior to May 1, 1982.

To such customers, delivery service under this Limited Commercial Space Heating Rate V is available for space heating in buildings other than residences, where the Customer's premises are heated exclusively by electricity.

Air conditioning used in addition to electric space heating at this same location may also be served under this rate, provided that electricity is the sole source of energy, and all the requirements for these purposes are metered hereunder.

Electric space heating equipment shall be permanently installed and be of a type and size approved by the Company.

Service under this rate will be metered separately.

Any other use of electricity must be taken under an applicable general service rate.

This rate is not available to seasonal customers, or for resale or auxiliary service.

CHARACTER OF SERVICE

Service supplied under this rate will be single phase, 60 cycle, alternating current, normally three-wire service at a nominal voltage of 120/240 volts or three-wire 120/208 volts, whichever is available at the location, or other voltages where available by special arrangement with the Company.

RATE PER MONTH

The rate per month will be the sum of the applicable Customer and Energy Charges subject to the adjustments in this tariff.

DOMESTIC SERVICE RATE D

AVAILABILITY

Retail Delivery Service under this rate is available for all domestic purposes in an individual private dwelling or an individual apartment and for farm purposes. If electricity is delivered through more than one meter, the charge for electricity delivered through each meter shall be computed separately under this rate.

CHARACTER OF SERVICE

Service supplied under this rate will be single phase, 60 cycle, alternating current, normally three-wire service at a nominal voltage of 120/240 volts or three-wire 120/208 volts, whichever is available at the location.

RATE PER MONTH

The rate per month will be the sum of the applicable Customer and Energy Charges subject to the adjustments in this tariff:

Rates for Retail Delivery Service

Customer Charge

~~\$4.31~~ per month

Deleted: 4.28

Distribution Energy Charges

Regular Use

~~1.623~~ cents per kilowatt-hour for the first 250 kilowatt-hours
~~4.226~~ cents per kilowatt-hour for the excess of 250 kilowatt-hours

Deleted: 1.611
Deleted: 4.195

For customers who received service under the off-peak provisions of the Domestic Service Rate D prior to April 1, 1991, the following rates shall apply:

Off-Peak Use: 16 Hour Control

For all electricity separately metered and delivered during off-peak hours, the price of such electricity shall be:

~~1.552~~ cents per kilowatt-hour if a Customer has installed an electric water heater of a type approved by the Company, and electricity delivered to such water heater is supplied only under this rate.

Deleted: 1.541

Off-peak hours shall be the hours between:

- January 1 – March 8 11:00 p.m. and 7:00 a.m. on the next day
- March 9 – April 5 12:00 a.m. and 8:00 a.m.*
- April 6 – October 25 11:00 p.m. and 7:00 a.m. on the next day
- October 26 – November 1 10:00 p.m. and 6:00 a.m. on the next day*
- November 2 – December 31 11:00 p.m. and 7:00 a.m. on the next day

*The off-peak hours defined above are applicable during 2008 and reflect the difference between when the customer's meter records off-peak kWh consistent with the pre-2007 Daylight Savings Time schedule and the revised Daylight Savings Time schedule mandated by the federal Energy Policy Act of 2005.

Off-Peak Use: 6 Hour Control

For all electricity separately metered and subject to the Company's right to limit the operation of the bottom water heating element up to 6 hours a day, the price of such electricity shall be:

1.623 cents per kilowatt-hour if a Customer has installed an electric water heater of a type approved by the Company, and electricity delivered to such water heater is supplied only under this rate.

Deleted: 1.611

Farm use

The availability of the Farm Use Section is limited to those locations which were served under the Farm Use Section of Domestic Rate D, N.H.P.U.C. No. 8 - Electricity immediately prior to the effective date of this rate. For such farm customers, where all electricity is supplied by the Company, the RATE PER MONTH is modified as follows:

2.524 cents per kilowatt-hour for all Regular Use kilowatt-hours in excess of the greater of the following:
(a) 500 kilowatt-hours
(b) 100 kilowatt-hours per kilovolt-ampere of transformer capacity needed to serve the Customer

Deleted: 2.505

APPROVED TYPES OF WATER HEATERS FOR USE UNDER PROVISIONS OF
OFF-PEAK USE CLAUSE OF DOMESTIC RATE D

The specifications for an approved type of water heater for all domestic applications are as follows:

(1) It shall be of standard manufacture and have a capacity and corresponding heating elements as specified below:

<u>Approx. Tank Size Gallons</u>	<u>Rating Top Unit Watts</u>	<u>Rating Bottom Unit Watts</u>
80*	4500	3000
100 to 120	4500	4500
150	5000	5000

*Water heaters of less than 80 gallons with top and bottom heating elements of not more than 4500 watts each may be installed at the Company's option, with the permission of the Regional Executive.

(2) It shall be equipped with a top and bottom heating element, each controlled by a separate thermostatic switch. The thermostatic switch for the top element shall be of a double-throw type so connected as to

permit operation of only one heating element at a time. The thermostat for the bottom element shall be of single-pole, single-throw type. The top and bottom units shall be designed for nominal 240-volt operation.

- (3) It shall have a pressure rating of not less than 250 pounds-per-square-inch test.
- (4) It shall be equipped as purchased with an approved fuel cut-off type temperature limit switch having its temperature sensitive element in contact with tank surface within 12 inches of top and so connected as to completely disconnect the heating elements from the power supply.
- (5) The thermostats for the top and the bottom heating units shall have a range of temperature settings extending from 120 degrees to 170 degrees Fahrenheit with the bottom element setting maintaining approximately a 10-degree differential above the setting of the top element.
- (6) The water heater and the installation thereof shall conform to the National Electric Code, to any State of local requirements, and to those of the Company.

The Customer shall provide a separate circuit for the water heater, of ample capacity and designed for 240-volt operation, to which no equipment other than the water heater shall be connected. Specific water heating connection diagrams for each type of service and rate application are available from the Company.

INTERRUPTIBLE CREDITS

The Company will provide, own and maintain a suitable switch designed to control the operation of selected appliances so that the appliance may operate only during the hours chosen by the Company.

If the Customer has installed an electric water heater of a type approved by the Company, and permits the Company to control the operation of the water heater for the specified number of hours per day and during emergency situations, the Customer will receive the following credit each month:

SYSTEM BENEFITS CHARGE ADJUSTMENT PROVISION

Customers taking service under this rate will be charged a System Benefits Charge as provided on Page 77 of the Tariff of which this rate is a part. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

MINIMUM CHARGE

\$7.40 per month Customer Charge

Deleted: 7.35

TERMS OF PAYMENT

The above rate is net, billed monthly or bimonthly and payable upon presentation of the bill.

TERMS OF AGREEMENT

The agreement for service under this rate will continue for an initial term of one year if electricity can be properly delivered to a Customer without an uneconomic expenditure by the Company. The agreement may be terminated at any time on or after the expiration date of the initial term by twelve (12) months prior written notice.

TERMS AND CONDITIONS

The Company's Terms and Conditions in effect from time to time, where not inconsistent with any specific provisions hereof, are a part of this rate.

GENERAL SERVICE TIME-OF-USE RATE G-1

AVAILABILITY

Retail Delivery Service under this rate is available for all purposes except resale, subject to the provisions of this section. A Customer will take delivery service on this rate if the Company estimates that its average use will be greater than or equal to 200 kW of Demand.

A Customer may be transferred from rate G-1 at its request or at the option of the Company if the customer's 12 month average monthly demand is less than 180 kW of Demand for 3 consecutive months.

If electricity is delivered through more than one meter, except at the Company's option, the charge for electricity delivered through each meter shall be computed separately under this rate. If any electricity is delivered hereunder at a given location, then all electricity delivered by the Company at such location shall be furnished hereunder, except such electricity as may be delivered under the provisions of the Limited Commercial Space Heating Rate V.

The actual delivery of service and the rendering of bills under this rate is contingent upon the installation of the necessary time-of-use metering equipment by the Company; subject to both the availability of such meters from the Company's supplier and the conversion or installation procedures established by the Company.

All customers served on this rate must elect to take their total electric service under the time-of-use metering installation as approved by the Company. If delivery is through more than one meter, except at the Company's option, the Monthly Charge for service through each meter shall be computed separately under this rate.

CHARACTER OF SERVICE

Service supplied under this rate will be 60 cycle, three-phase alternating current normally at a nominal voltage of 120/208, 277/480, 2400, 4160, 4800, 7200, 13,200 and 13,800 volts.

All voltages are not available in every area.

RATE PER MONTH

The Rate Per Month will be the sum of the applicable Customer, Demand and Energy Charges subject to the adjustments in this tariff.

Rates for Retail Delivery Service

Customer Charge

\$91.92 per month.

Distribution Demand Charge

\$4.02 per kW of Peak Hours Demand per Month

Deleted: 3.99

Distribution Energy Charges

Peak Hours Use 0.133 cents per Kilowatt-hour

Deleted: 0.132

Off-Peak Hours Use 0.000 cents per Kilowatt-hour

Peak hours will occur daily on Monday through Friday, excluding holidays, on the following schedule:

January 1 – March 8	8:00 a.m. to 9:00 p.m.
March 9 – April 5	9:00 a.m. to 10:00 p.m.*
April 6 – October 25	8:00 a.m. to 9:00 p.m.
October 26 – November 1	7:00 a.m. to 8:00 p.m.*
November 2 – December 31	8:00 a.m. to 9:00 p.m.

*The Peak hours defined above are applicable during 2008 and reflect the difference between when the customer's meter records peak kWh, peak kW, peak kVa and peak kWh consistent with the pre-2007 Daylight Savings Time schedule and the revised Daylight Savings Time schedule mandated by the federal Energy Policy Act of 2005.

Off-Peak hours will be all other hours daily Monday through Friday, and all day on Saturdays, Sundays, and holidays.

The holidays will be: New Year's Day, President's Day, Memorial Day, Independence Day, Columbus Day, Labor Day, Veteran's Day, Thanksgiving Day and Christmas Day. All holidays will be the nationally observed day.

TRANSMISSION SERVICE COST ADJUSTMENT

Transmission service is available to all retail Customers taking service under this rate. For those Customers, the Transmission Energy Charge shall be calculated in accordance with the Company's Transmission Service Cost Adjustment Provision as provided on Page 79 of the Tariff of which this rate is a part. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

STRANDED COST ADJUSTMENT

All energy billed under this rate is subject to a Stranded Cost Energy Charge which rate shall be adjusted from time to time in accordance with the Company's Stranded Cost Adjustment Provision as provided on Page 80 of the Tariff of which this rate is a part. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

GENERAL LONG HOUR SERVICE RATE G-2

AVAILABILITY

Retail Delivery Service under this rate is available for all purposes except resale, subject to the provisions of this section. A Customer will take delivery service on this rate if the Company estimates that its average use will be greater than or equal to 20 kW of Demand but is less than 200 kW of Demand. If electricity is delivered through more than one meter, except at the Company's option, the charge for electricity delivered through each meter shall be computed separately under this rate.

A customer may be transferred from rate G-2 at its request or at the option of the Company if the customer's twelve (12) month average monthly demand is less than 18 kW of demand for three consecutive months.

If any electricity is delivered hereunder at a given location, then all electricity delivered by the Company at such location shall be furnished hereunder, except such electricity as may be delivered under the provisions of the Limited Commercial Space Heating Rate V.

CHARACTER OF SERVICE

Service supplied under this rate will be 60 cycle, three-phase alternating current normally at a nominal voltage of 120/208, 277/480, 2400, 4160, 4800, 7200, 13,200 and 13,800 volts.

All voltages are not available in every area.

GENERAL SERVICE RATE G-3

AVAILABILITY

Retail Delivery Service under this rate is available for all purposes except for resale. A Customer will take delivery service on this rate if the Company estimates that its average use will be less than 20 kW of demand. If electricity is delivered through more than one meter, except at the Company's option, the charge for electricity delivered through each meter shall be computed separately under this rate.

CHARACTER OF SERVICE

Service supplied under this rate will be 60 cycle, alternating current either:

- (a) Single-phase normally three-wire at a nominal voltage of 120/240 volts.
- (b) Three-phase secondary normally at a nominal voltage of 120/208, or 277/480 volts.
- (c) Three-phase primary normally at a nominal voltage of 2400, 4160, 4800, 7200, 13,200 or 13,800 volts.

All voltages are not available in every area.

RATE PER MONTH

SYSTEM BENEFITS CHARGE ADJUSTMENT PROVISION

Customers taking service under this rate will be charged a System Benefits Charge as provided on Page 77 of the Tariff of which this rate is a part. A summary of energy charges in effect, with all adjustments, is provided on Page 84 of this Tariff.

MINIMUM CHARGE

\$5.45 per Month Customer Charge

Deleted: 5.41

However, if the KVA transformer capacity needed to serve a customer exceeds 25 KVA, the minimum charge will be increased by \$1.61 for each KVA in excess of 25 KVA.

Deleted: 1.60

BIMONTHLY BILLING

The Company reserves the right to read meters and render bills on a bimonthly basis. When bills are rendered bimonthly, the Customer Charge and the Minimum Charge shall be multiplied by two.

TERMS OF PAYMENT

The above rate is net, billed monthly or bimonthly and payable upon presentation of the bill.

TERM OF AGREEMENT

A Customer served under this rate must provide the Company with one-year prior written notice before installing additional on-site, non-emergency generation for its own use. This notice provision shall be waived with respect to the installation of on-site non-emergency generation from renewable energy resources. Renewable energy resources shall mean fuel cells (including natural gas powered fuel cells), and emerging power generation technologies that produce electricity from wind energy, solar energy, small-scale hydro power, ocean power, landfill gas, sustainably managed biomass, and future clean renewable technologies.

OUTDOOR LIGHTING SERVICE RATE M

AVAILABILITY

Public Lighting

Available for Street or Highway lighting to any town, city or fire district.

Installations on limited access highways and the access and egress ramps thereto are subject to the Special Rate Conditions of this tariff.

Private Lighting

Available to private customers for outdoor lighting where necessary fixtures can be supported on existing poles and where such service can be supplied from existing secondary distribution facilities.

In special circumstances outlined in the pole and accessory section below, the Company will install a wooden pole.

LIMITED COMMERCIAL SPACE HEATING RATE V

AVAILABILITY

The availability of this rate is limited to the following customers: 1) those who immediately prior to the effective date of this rate were served under Commercial Space Heating Rate V, N.H.P.U.C. No. 8 - Electricity and are presently receiving service under this rate, and 2) those who requested service under this rate prior to May 1, 1982.

To such customers, delivery service under this Limited Commercial Space Heating Rate V is available for space heating in buildings other than residences, where the Customer's premises are heated exclusively by electricity.

Air conditioning used in addition to electric space heating at this same location may also be served under this rate, provided that electricity is the sole source of energy, and all the requirements for these purposes are metered hereunder.

Electric space heating equipment shall be permanently installed and be of a type and size approved by the Company.

Service under this rate will be metered separately.

Any other use of electricity must be taken under an applicable general service rate.

This rate is not available to seasonal customers, or for resale or auxiliary service.

CHARACTER OF SERVICE

Service supplied under this rate will be single phase, 60 cycle, alternating current, normally three-wire service at a nominal voltage of 120/240 volts or three-wire 120/208 volts, whichever is available at the location, or other voltages where available by special arrangement with the Company.

RATE PER MONTH

The rate per month will be the sum of the applicable Customer and Energy Charges subject to the adjustments in this tariff.

Granite State Electric Company d/b/a National Grid
Docket No. DE 08-072
Testimony of M.D. Laflamme

Exhibit 2

Responses to Staff 1-7 and Staff 1-8
of Staff's First Set of Data Requests

Staff 1-7

Request:

Reference Attachment 1, page 3 - Please provide supporting detail for the 3.7% 2007 composite depreciation rate.

Response:

The 3.7% 2007 composite depreciation rate reflects total calendar year 2007 distribution-related depreciation expense of \$3,793,188 as a percentage of average 2007 distribution-related depreciable plant of \$102,397,951.

Staff 1-8

Request:

Reference Attachment 1, page 3 - Please provide supporting detail for the 2.38% 2007 ratio of municipal tax expense to net plant in service.

Response:

The 2.38% 2007 ratio of municipal tax expense to net plant in service reflects calendar year 2007 property tax expense of \$1,573,117 as a percentage of average 2007 net plant in service of \$66,005,954.
