Re: DE 08-122, The Lee Company  
Certification Application for Class II Eligibility pursuant to RSA 362-F

Dear Mr. Lee:

On September 23, 2008, The Lee Company (Lee) submitted an application requesting certification of its facility as eligible to produce Class II renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval noting that the Lee application was complete on October 16, 2008.

Class II eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from solar technologies. The application indicates that The Lee Company has installed solar photovoltaic equipment with a gross nameplate capacity of .308 MW located at 2 Pettipaug Rd. in Westbrook, CT. The facility began commercial operation on June 30, 2008. According to the application, the facility's ISO-NE asset ID number and NEPOOL generation information system facility code were unavailable but will be provided to the Commission when obtained.

The Commission has reviewed The Lee Company's application and determined that it has provided all the necessary information to demonstrate that the facility is eligible for certification as a Class II facility. Therefore, the Commission hereby certifies that The Lee Company facility is a Class II renewable energy source effective October 16, 2008, and is eligible to be issued New Hampshire Class II renewable energy certificates.

November 19, 2008

Re: DE 08-122, The Lee Company  
Certification as a New Hampshire RPS Class II Facility pursuant to RSA 362-F  
New Hampshire Certification Code NH-II-08-017

Dear Mr. Webb:

Please be advised that, pursuant to NH RSA 362-F, the New Hampshire Public Utilities Commission has certified The Lee Company facility as a Class II renewable energy source effective October 16, 2008. Accordingly, The Lee Company is eligible to be issued New Hampshire Class II renewable energy certificates.

The Lee Company facility has installed solar photovoltaic equipment with a gross nameplate capacity of .308 MW located at 2 Pettipaug Road in Westbrook, CT. The Lee Company began commercial operation on June 30, 2008. The facility's ISO-NE asset identification number is unavailable at this time, but will be provided to the Commission when obtained. The New Hampshire RPS certification code is NH-II-08-017.

Sincerely,

A handwritten signature in cursive script, appearing to read "Debra A. Howland".
