Re: DE 08-167, Conservation Services Group's  
Certification Application for Class I Eligibility pursuant to RSA 362-F

Dear Ms. Stanton:

On December 30, 2008, Conservation Services Group submitted an application on behalf of Innovative Energy Systems requesting certification of the Colonie landfill gas facility (Colonie facility) as eligible to produce Class I renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval noting that the Conservation Services Group application was complete on December 30, 2008.

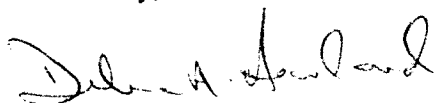

Class I eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from certain renewable sources, one of which is methane gas. The application indicates that the Colonie facility has a gross nameplate capacity of 4.8 megawatts, is fueled by methane gas and is located at 1319 New London Road, Cohoes, New York. The facility began commercial operation in March 2006. The facility's NEPOOL generation information system facility code is IMP 32854.

The Commission has reviewed the Conservation Services Group application and determined that it has provided all the necessary information to demonstrate that the Colonie facility is eligible for certification as a Class I facility. Therefore, the Commission hereby certifies that the Colonie facility is a Class I renewable energy source effective December 30, 2008 and is eligible to be issued New Hampshire Class I renewable energy certificates. For the issuance of any renewable energy certificates, please be aware that since the facility is located in an adjacent control area, the applicant will need to provide proof to the Commission pursuant to Puc 2504.01 (a)(2) that the associated electricity produced by the facility was imported into the New England control area. The applicant must provide such proof when it submits similar information to the GIS administrator as required by GIS Operating Rule 2.7(c).

February 11, 2009  
Page two

Attached please find a copy of the notice of this certification provided to the GIS administrator. The New Hampshire Renewable Portfolio Standard certification code for the Colonie landfill methane gas facility is NH-I-09-008.

Sincerely,

A handwritten signature in black ink, appearing to read "Debra A. Howland". The signature is fluid and cursive, with the first name "Debra" being more prominent.

Re: DE 08-167 Innovative Energy Systems' Colonie Facility  
Certification as a New Hampshire RPS Class I Facility pursuant to RSA 362-F  
New Hampshire Certification Code NH-I-09-008

Dear Mr. Webb:

Please be advised that, pursuant to NH RSA 362-F, the New Hampshire Public Utilities Commission has certified Innovative Energy Systems' Colonie landfill methane gas facility as a Class I renewable energy source effective December 30, 2008. Accordingly, Innovative Energy Systems' Colonie facility is eligible to be issued New Hampshire Class I renewable energy certificates.

The Colonie facility has a gross nameplate capacity of 4.8 megawatts, is fueled by methane gas and is located at 1319 New London Road, Cohoes, New York. The facility's initial commercial operation date was March 2006. Its NEPOOL GIS facility code is IMP 32854. The New Hampshire RPS certification code is NH-I-09-008.

Sincerely,

  
Debra A. Howland  
Executive Director
