Re: **DE 11-160, DE 11-161**, New Hampshire Electric Cooperative, Inc. Certification Applications for Class II Eligibility Pursuant to RSA 362-F on behalf of homeowner Jonathan Sands, and the Town of Sandwich, Central Fire Station

Dear Mr. McNeil:

On July 20, 2011 you submitted applications on behalf of homeowner Jonathan Sands (Sands), and the Town of Sandwich, Central Fire Station (Fire Station) requesting certification of their customer-sited photovoltaic arrays as eligible to produce Class II renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and has recommended approval of both facilities as eligible for Class II RECs effective August 9, 2011.

Since these facilities are customer-sited sources, the output is not recorded in the New England Power Pool Market Settlement System and, as a result, the output must be monitored and verified by an independent monitor. Your application states that NHEC will monitor the facilities output as required by N.H. Code of Administrative Rules Puc 2505.08 and 2505.09. Total output will also be included in the *NHEC Class II Aggregation's* total output reported to the NEPOOL Generation Information System as approved by the Commission on April 9, 2010.

The details for each facility are listed in following table.

Commission Assigned Docket #	Facility Owner	Facility Location	Operation Date ¹	Total kW listed in application (DC Arrays)	Effective Date to Produce RECs	NH Certification Code
DE 11-160	Johnathan Sands	Orford, NH	06/20/11	2.58	07/20/11	NH-II-11-024
DE 11-161	Town of Sandwich, Central Fire Station	Sandwich, NH	06/27/11	11.985	07/20/11	NH-II-11-025

The Commission has determined that NHEC has provided all the information necessary to demonstrate both of these facilities' eligibility for certification and hereby certifies the Sands and the Fire Station photovoltaic arrays as eligible to receive Class II RECs effective August 9, 2011.

Sincerely,

Debra A. Howland
Executive Director

¹ NHEC considers the operation date listed in the table above, and in Exhibit E of each application, to be the date on which NHEC inspected each facility and installed a revenue quality meter to record the electricity that will be eligible for Class II RECs. The date listed in each interconnection application pertains to the installation and interconnection of the facility and may be different than the operation date listed in the above table.
