**FROM:** David Goyette, Utility Analyst III - Telecommunications

**SUBJECT:** DT 12-158 Northland Telephone Company of Maine, Inc. d/b/a  
FairPoint Communications  
Intrastate Access Reform

**TO:** Commissioners  
Debra Howland, Executive Director

On June 1, 2012, Northland Telephone Company of Maine, Inc. d/b/a FairPoint Communications (Northland) filed changes to its access tariff, NHPUC No. 2, to comply with the Federal Communications Commission's (FCC's) transitional access service pricing requirements in the USF/ICC Order<sup>1</sup>.

The USF/ICC Order requires each rate-of-return<sup>2</sup> ILEC whose intrastate access rates exceed its interstate access rates to reduce intrastate access revenue by half the difference between 1) revenue based on intrastate rates times fiscal year 2011 intrastate switched access demand and 2) revenue based on interstate rates times fiscal year 2011 intrastate switched access demand. The USF/ICC Order requires such carriers to produce an intrastate rate design that achieves, by July 3, 2012, the allowed revenue and, by July 1, 2013, the carrier's interstate rate level and rate structure.

Northland submitted a completed version of a spreadsheet template prepared by Staff, which included demand data and related calculations. Pursuant to Order 25,363, the demand data and related calculations have been granted confidential treatment.

Staff has reviewed the proposed tariff and supporting work papers submitted by Northland, to confirm the changes comply with the FCC's requirements. Staff recommends the tariff be allowed to go into effect as proposed, on July 1, 2012.
