Subject: Pennichuck Rate Increase

NHPUC 18JUL'13AM11:39

We already pay for water that we do not use. Now they want us to pay more money for the same water we do not use. The water is not drinkable and many times we end up taking a shower in dirty water. You can tell by the toilet how unclean or impure the water is. The water has been contaminated and you can smell the chlorine that they add periodically. Another reason not to drink the water.

Many of us are simply trying to hold on to our homes. Pennichuck simply wants excessive profits.
