Subject: PSNH Rate Hike Request

Dear Commission,

I recently read that PSNH is seeking a \$ 00.1054/KWH rate increase approval. PSNH is claiming it is necessary due to rising fuel and energy costs. I trust that due to just the opposite occurring (gas/fuel prices have lowered dramatically) this rate increase will not be approved. Actually, the rate should go down due to the decrease in costs.

PSNH provides very good service; I see no justification for allowing an increase at this time.

Thank You,

Gary Molaghan
