Comments: this company wants a 38% increase to customers. Our area has an old system that was built in the mid 70's. they are only responsible to the property line of the owners. This system must have been paid for years ago. They have no plans for improvements in this area. This increase will be a hardship for most of my neighbors and seems the money will be used to enlarge the company off the backs of the customers with no chance of being a share holder.
