**To:** Howland, Debra

**Subject:** Support of Solar and Net Metering

Hi Debra,

I live in Plainfield NH and wanted to express that net metering benefits all electric customers and helps to preserve our New Hampshire way of life – while keeping us moving forward into a healthy, clean energy future. It helps us avoid dirty energy projects and scarring transmission lines, and empowers families to take control of their energy – and climate – futures.

With all the changes in our world, we should step forward not backward and keep solar as a key source of energy which is encouraged by the communities and the state of NH.

Thanks for listening to the voice of the people.

Greg Castell
