**Subject:** Rooftop solar

I am a RI voter consumer and activist. I am proud that I am standing up for our future. The earths future!! Please allow the citizens of New Hampshire the ability to procure their choice of solar energy. The sun is free. It will help to offset the terrible disgusting pollution that these energy companies are producing. You need to stand up and fight against the filthy and I do mean filthy rich companies that condemn our future. Just take a look at the recent presidential election and you will realize the majority of the people have spoken!! No more stepping on the hard working people of the USA!!! Thank you Jeannine Fortin Pascoag RI
