**Subject:** Net metering for solar

Dear Ms. Howland,

I'm urging you to please continue net-metering for solar. I'm requesting this not on a personal level, although we do have rooftop solar, but because converting to renewable energy is a must for our planet. Having retired here from our southern progressive neighbor MA, we found NH to lag in incentives for 21st century energy.

Climate change, although politicized, is a simple scientific fact. It is imperative that we listen to the scientists and move away from dirty fossil fuels and the infrastructure surrounding these.

Please support solar net-metering,  
Susan Shamel  
Hillsborough, NH
