Subject: support for clean energy

Debra,

As a new home owner with solar panels on my roof in Cornish, I am very environmentally concerned about the future of clean energy in our state. We all know of the advantages to not just ourselves but also to our future generations and the state, country and world. Please know that there are many of us who are doing our utmost to further our individual efforts toward living with clean energy. Each of us has a stake in our future and programs such as net metering is, as you know so well, advantageous to each of us as well as our environment. Thank you for supporting NH residents in our mission toward increased sustainable energy usage.
Sincerely, Christine Alexander
