**Debra A. Howland, Executive Director**  
New Hampshire Public Utilities Commission  
Re: Docket No. DE 16-576  
21 S. Fruit St., Suite 10  
Concord, NH 03301

Ms. Howland,

We installed a PV system at our home in Holderness about a year and a half ago. We were able to take advantage of credits available from the state, the federal government and our power provider, NHEC. Our system should pay for itself in roughly six years and we expect to be in our home for at least that long. We are not wealthy but well off enough to afford the up front costs. I wish that every NH resident with an appropriate solar location could do the same regardless of their financial situation or home ownership status.

Saving money is nice, but doing a little something to help save the planet is much more important. The change to renewables will happen, but will it happen soon enough? A whole bunch of little somethings add can add up to a big something. You are in a position to enable those little somethings to happen faster and I implore you to do so.

Sincerely,  
Gerald R Beck  
113 Sargent Rd  
Holderness NH 03245
