RE: Docket No. DE 16-576, Electric Distribution Utilities
Development of New Alternative Net Metering Tariffs
Filing in Lieu of Tariff Submission

Dear Director Howland:

On December 21, 2016, the Commission issued Order No. 25,972 in the above-captioned docket. That order granted a Staff motion to approve the implementation of an "interim" net metering tariff that would take effect on March 2, 2017 and end at the time the Commission issues a final order in the docket approving a successor tariff. As part of the order, the Commission required each utility, including Public Service Company of New Hampshire d/b/a Eversource Energy ("Eversource") to file revised tariff pages to implement the interim tariff.

Following the issuance of Order No. 25,972, Eversource reviewed its presently existing net metering tariff. Given the general language of the present tariff, and more specifically the language on page 24 of Eversource's tariff that "Projects 1,000 kilowatts and under using renewable generation shall have the option of being served under the Net Energy Billing Service as specified by NH RSA 362-A:9 and the rules promulgated by the appropriate regulatory agency." Eversource concluded that no revisions to the present tariff were necessary to have the tariff conform to the requirements of Order No. 25,972 for an interim tariff. Accordingly, Eversource requests that the Commission accept this letter in lieu of Eversource submitting revised tariff pages. Should the Commission determine that specific revisions to Eversource's tariff are, in fact, necessary, Eversource would request that the Commission identify the specific revisions and provide appropriate time for Eversource to make the revised submission.

If you have any questions, please do not hesitate to contact me. Thank you for your assistance with this matter.

Very truly yours,

Matthew J. Fossum
Senior Counsel
