

Dear Director Deborah Howland,

As a resident of the Upper Valley, I oppose the Lebanon/Hanover fracked gas pipeline proposed by Liberty Utilities. We have a commitment to transition our community's electricity to 100 percent renewable sources by 2030, and heat and transportation by 2050. We need a renewable energy future, not more dangerous fossil fuels that create health hazards. I strongly urge you to reject Liberty's proposal to expand this fracked gas pipeline!

Sincerely,

Laurie Charba

Docket No.: DG 16-852

To the Public Utility Commission
members:

I hope you will encourage our
energy suppliers (Liberty Utilities
and others) to invest in
sustainable, harmless technologies
by voting against the plan for
a natural gas pipeline through
the Upper Valley.

Thank you.

Please oppose the fracking oil pipeline
in Lebanon and Hanover! The pipeline
is not only dangerous for these
communities, but ~~it~~ would promote the
use of fossil fuels. As a young person,
I feel distressed at even the thought
of these communities using such energy
types that put the environment and
humanity's health at risk. Make your
decision wisely.

Dear Dr. Howland,

I strongly oppose the proposed
pipeline to transport fracked natural
gas in Lebanon, NH. As an MPH
and an MD¹, the health and sustainability
of our community is at stake. Don't
let our state move backwards. Protect our
health!

Sincerely,

I DO NOT WANT A PIPELINE
IN MY COMMUNITY! I also
don't want to support fracking
anywhere. This is a project
that goes in the wrong direction
in terms of energy needs, usage,
and production/distribution.

Dear P.U.C.,

I oppose the construction of a pipeline proposed by Liberty Utilities for so many reasons that have to do with negative environmental repercussions from natural gas extraction, the financial "lock-in," and because there are sustainable solutions at hand!

Too many uncertainties,
no secured customers,
no need of this fuel,
communities are moving
beyond fossil fuels, so

WHY? No pipeline
please!

Lebanon and Hanover do not need a pipeline! It pollutes the air, causes increased traffic, and has a high explosion risk. Consider the health and happiness of the environment and people. Oppose the pipeline please!

Please read the IPCC

time to reduce greenhouse gas
emissions to zero than the
life time of this proposed
