

Debra Howland  
Executive Director and Secretary  
New Hampshire Public Utilities Commission  
21 S. Fruit Street  
Suite 10  
Concord, N.H., 03301

Dear Ms. Howland:

It is a civil, human, and environmental responsibility that PUC not allow Liberty Utilities to move forward with its goal of increasing the availability of natural gas in Keene, N.H. without allowing people to publicly share their feelings, knowledge, and deep concerns that must be part of the decision making process. What follows are several reasons why I hope that LU not be allowed to move forward with its dark vision.

(A) Although there will be, apparently, no pipelining, fracking or shale gas development in New Hampshire, there may be a Liberty Utilities attempt to do so in its connection with Kinder Morgan in order for the natural gas to be delivered to Keene and beyond Keene to other states in the northeast as well as other countries. Whatever steps Liberty Utilities attempts are and will not be compatible with Keene's support for the Paris Climate Accord. Furthermore, it is important that you study Kinder Morgan's very dark history. To do so, Google this: Kinder Morgan Accidents & Safety Violations. The piece covers from 2003 through 2014. This, in itself, is enough to make the decision that honors civil, human, and environmental rights.

(B) Given the above, go to Bill Moyers web-site to read "What the Anti-Fracking Movement Brings to the Climate Movement" and click on a section of the article that will bring you to the 103 page Compendium document. The Moyers web site for this reading is: <http://billmoyers.com/2014/08/26what-the-anti-fracking-movement-brings-to-the-climate-movement/>. --- In my opinion, this document is one of the most important one can read to prepare for opposition to fracking, the construction and placement of pipelines, and the continued pressure to promote fossil fuel use. Such a document helps us stay focused on healthy environmental respect for planet earth and all who live here. In the forward to the Compendium document, the following is referenced as one of the "emerging trends in the new data": "... natural gas is a bigger threat to the climate than previously supposed." (Note: underlining is my own.)

(C) Lastly, if the PUC is fearful of taking a strong step in the right direction, consult with CELDF (Community Environmental Legal Defense Fund) whose Executive Director is Thomas Linzey, Esq. CELDF has a wonderful history of

helping many cities to ban fracking etc. The web site is <http://www.celdf.org>. There is a local New Hampshire CELDF organizer that you can contact and discuss this with. Her name is Michelle Sanborn. She may be contacted at [michelle@celdf.org](mailto:michelle@celdf.org) or at 603-524-2468.

Respectfully,

Peter Majoy
