

Attention PUC Staff and Friends,

I urge the PUC to give serious consideration to including thermal renewable energy in the NH RPS in its recommendations to the Governor and Legislature when it issues its final report in November of this year.

My company, Heart Line Inc, has been involved in Bio Mass Fuel since 1986.

We have placed more than 8,000 Bio Mass appliances in homes and businesses and will continue to guide users to Bio Mass sources for heating.

We as well as our customers are proud to be involved in the Bio Mass movement and find great satisfaction in being less dependent upon petro-energy as a heating fuel for our homes and businesses.

**Respectfully,
Larry Miller, President
Heart Line Stove Shop
Unit of Heart Line Inc
Jaffrey, NH**
