Request from: Office of Consumer Advocate

**Request:**

Are the costs of Connecticut transmission projects which have been designated as localized costs included in the LNS rates and recovered from PSNH and its customers?

**Response:**

All transmission costs that have been identified by the FERC as local to Connecticut are being charged to Connecticut customers only. None are being charged to New Hampshire customers through the LNS rates. NU's tariff for LNS contains a provision which provides for the recovery of costs imposed by individual states from customers within the state.
