I. INTRODUCTION

This agreement is entered into this 25th day of September, 2008, between Lakes Region Water Company, Inc. (LRWC), and the Staff (Staff) of the New Hampshire Public Utilities Commission (Commission), (collectively, the "settling parties") with the intent of resolving certain issues, more fully described below, in the above-captioned proceeding.

II. BACKGROUND

On May 15, 2008, LRWC filed a petition for approval to finance approximately \$779,930 to complete a number of capital projects amounting to \$1,244,430 offset by a \$300,000 contribution in aid of construction, and for approval of three step adjustments to recover its investment in those capital projects. LRWC proposed to borrow a total of \$629,930 from its stockholders, Thomas and Barbara Mason, on a 20 year term and at an annual interest rate of 9.75%. The balance of \$150,000 would be provided as an equity contribution from the Masons. The funds would be used for construction of a 325,000 gallon water storage tank and connecting water main at LRWC's Paradise Shores system; installation of a new well at Indian Mound; installation of a new pump station at LRWC's Gunstock Glen system and interconnection of that system with the neighboring Brake Hill Acres system; purchase of two service vehicles, a hand held meter reader and software, and miscellaneous shop and field

DW 08-070 – Lakes Region Water Company, Inc.
Stipulation Agreement
September 25, 2008

equipment; installation and deepening of wells, installation of well meters, booster pumps and related monitoring equipment at Hidden Valley; and installation of 1,220 feet of new water mains to replace existing PVC mains at LRWC's 175 Estates system.

In order to recover its investments in these capital improvements, LRWC proposed to adjust its customer rates in three step adjustments. The first, proposed to be effective immediately, would incorporate the completed Hidden Valley, 175 Estates, and Indian Mound improvements as well as the vehicles and shop equipment. This initial step adjustment was proposed to increase LRWC's revenues by \$67,990 or about 9%. The proposed second step, to be effective July 1, 2008, would encompass the Paradise Shores projects completed as of June 30, 2008, and would increase LRWC's revenues by \$77,914 or about 10%. The third step adjustment, proposed for effect January 1, 2009, would incorporate the remainder of the capital improvements completed by the end of 2008 and would increase LRWC's revenues by an additional \$36,169 or about 5%.

LRWC's filing also requested Commission authorization to change the rates it charges its Gunstock Glen customers. Based on the capital improvements at the Gunstock Glen system and the interconnection with Brake Hill Acres, LRWC proposed to begin applying its consolidated rate to those customers.

An Order of Notice was issued on May 29, 2008 setting a prehearing conference which was held before a hearings examiner on July 2, 2008. The Office of the Consumer Advocate (OCA) filed notice of its intent to participate on May 21, 2008 and the Property Owners Association at Suissevale, Inc. (Suissevale) filed a petition to intervene on June 26, 2008. A technical session was held subsequent to the prehearing conference and the parties agreed upon a proposed procedural schedule to govern the

DW 08-070 – Lakes Region Water Company, Inc.
Stipulation Agreement
September 25, 2008

remainder of the proceeding. The Hearing Examiner filed a report of the prehearing conference on July 8, 2008. The Commission issued Order No. 24,883 on August 5, 2008 which approved the procedural schedule.

On September 4, 2008, the OCA filed the direct testimony of Kenneth Traum and Stephen Eckberg.

III. TERMS OF AGREEMENT

The settling parties believe that the Commission should approve this agreement in order to further the financial health and stability of LRWC by permitting the company to recover its substantial investments in capital improvements. Over the past two years LRWC has invested approximately \$950,000 into its water systems to enhance service and reliability. The new water storage facility at LRWC's Paradise Shores system was begun in 2004 but recovery of the company's investment in that facility was substantially delayed by construction defects and subsequent litigation. Therefore the settling parties agree that it is imperative that rate relief be authorized at this time in order for LRWC to remain financially viable. To that end the settling parties have reached agreement on all issues as specified below.

A. Step Adjustments

i. Summary

The settling parties agree that LRWC should be granted an overall increase in revenues of approximately 19.13%, based on its 2007 operating water revenues. See Attachment D. This agreed increase in revenues will be realized through three step adjustments in rates. Since all of the assets in LRWC's requested step 1 and step 2 are now in service and used and useful, the

DW 08-070 – Lakes Region Water Company, Inc.
Stipulation Agreement
September 25, 2008

settling parties agree that it is appropriate for the two steps to be implemented simultaneously. These two step adjustments together increase LRWC's revenues by \$112,739 or 15.62%¹. The settling parties agree that these two step adjustments in rates should be implemented on a bills rendered basis for bills issued on or after November 30, 2008. The settling parties agree that the third step adjustment to rates should increase LRWC's revenues by approximately \$25,380 or 3.52%. This step would be implemented following audit review of the costs and assurance that the related assets are in service and used and useful. The settling parties agree that the service lives assigned to all assets in the three proposed step adjustments, and the resulting depreciation rates, are the same as the service lives and depreciation rates for similar assets on the books of the company. The rate of return applied to the additional rate base in all three step adjustments is 9.27%, which results from a weighted average of the debt and equity capital used for purchase or construction of the assets in these step adjustments. That overall rate of return results from a weighting of debt capital (21% of the capital) at a cost rate of 7.47% and equity capital (79% of the capital) at a cost rate of 9.75%. See Attachment E.

ii. First and Second Step Adjustments to Rates

The settling parties agree that LRWC's first two requested step adjustments should be implemented simultaneously since all of the assets are now in service to customers and used and useful. These assets and the calculation of the step adjustment revenues are detailed on Attachments A and B. Step adjustment 1 provides a return on assets installed at LRWC's Hidden Valley, 175 Estates, and Indian Mound systems, as well as common assets including

¹ The effective rate of increase to water rates is 17.57% since wholesale revenues and new revenues resulting from the conversion of Gunstock Glen customers to LRWC's consolidated rate are excluded. See Attachment G.

DW 08-070 – Lakes Region Water Company, Inc.
Stipulation Agreement
September 25, 2008

vehicles. Step adjustment 2 contains return on the water storage facility at Paradise Shores. The costs related to all assets in Step adjustments 1 and 2 have been reviewed by Commission audit staff for accuracy and reasonableness. The total final costs of the water storage facility at the Paradise Shores system have been partially offset by a capital contribution of \$300,000 from Property Owners Association at Suissevale, Inc. (Suissevale), a wholesale customer of LRWC.

iii. Third Step Adjustment to Rates

The settling parties agree that the third step adjustment to rates should be implemented once the related assets are in service to customers and are used and useful. Attachment C illustrates the anticipated level of revenues that would result from this final step adjustment. The settling parties anticipate the assets to be in service by the end of 2008. LRWC agrees to make a filing with the Commission summarizing the costs and the calculation of the step adjustment revenues in the same manner as Attachment C. Staff will audit the costs, verify that the assets are used and useful, and provide a recommendation to the Commission for its approval. Step adjustment 3 contains assets to be completed at LRWC's Hidden Valley and Gunstock Glen systems, as well as completion of a frost barrier and wood frame control room at the storage tank at Paradise Shores.

B. Financing Request and Cost of Capital

During the course of this proceeding, LRWC has modified its request for financing approval. In lieu of a loan from the company's stockholders, LRWC will now accept an equity infusion in the total amount of \$724,430 to substantially fund the capital projects that are the subject of rate recovery in this proceeding. Therefore, LRWC withdraws its request for

DW 08-070 – Lakes Region Water Company, Inc.
Stipulation Agreement
September 25, 2008

Commission approval of debt financing pursuant to RSA 369. The settling parties agree that this equity infusion substantially strengthens LRWC financially. As detailed above, the overall weighted cost of capital applied to the plant additions in each of the step adjustments is 9.27%. The settling parties agree that LRWC's resulting capital structure is reasonable.

C. Consolidated Rate for Gunstock Glen Customers

The settling parties agree that it is appropriate, and recommend the Commission approve application of LRWC's consolidated rate to customers of its Gunstock Glen system. Gunstock Glen was acquired in 2004 and has since remained on its own individual rate. At this time the pump station is being remodeled and repiped, and the system is being interconnected with the nearby Brake Hill Acres system. In addition, a SCADA control system is being added in order to control, coordinate, and monitor three wells in the systems and to remotely report to the office. The additional revenues that LRWC will derive from application of the consolidated rate to the Gunstock Glen customers has been accounted for in developing the step adjustments that are recommended in this agreement. Since the capital improvements at the Gunstock Glen system are to be included in the third step adjustment, the settling parties recommend that the consolidated rate be applied to Gunstock Glen customers on a service rendered basis as of the date of the Commission's order approving the third step adjustment.

D. Calculation of Rates

Attachment G illustrates the calculation of new customer rates resulting from the proposed implementation of Step adjustments 1 and 2. Page 1 of Attachment G illustrates the calculation of the percent increase to be applied to 2007 retail water sales (which is total 2007

DW 08-070 – Lakes Region Water Company, Inc.
Stipulation Agreement
September 25, 2008

water sales minus revenues from wholesale sales to Suissevale minus the additional revenues from shifting Gunstock Glen customers to LRWC's consolidated rate) to yield the additional revenues from Step adjustments 1 and 2. Page 2 illustrates the calculation of the new customer minimum charge and consumption charge. Page 3 illustrates the revenues to be realized from LRWC's unmetered systems by applying the overall effective rate increase of 17.57% to the existing flat rate.

E. Rate Case Expenses

The settling parties agree that recovery of rate case expenses incurred by LRWC in this proceeding is appropriate. The settling parties agree that such expenses should only be related to the request for new rates through the step adjustments recommended in this agreement, and that LRWC will not seek recovery of costs related to the financing portion of this docket. In addition, LRWC will not seek recovery of costs relating to the Staff's audit or of costs relating to routine bookkeeping or accounting associated with the assets that form the basis for rate recovery in this docket. The settling parties agree that, subsequent to the Commission's order approving this agreement, LRWC will submit its request for recovery of rate case expenses to Staff, with supporting documentation, and that Staff will review that documentation. It is the intent of the settling parties to submit a joint recommendation to the Commission. If the settling parties are unable to reach agreement on a joint recommendation, Staff and LRWC will each file a separate recommendation to the Commission for its consideration.

DW 08-070 – Lakes Region Water Company, Inc.
Stipulation Agreement
September 25, 2008

IV. CONDITIONS

The making of this agreement shall not be deemed in any respect to constitute an admission by any party that any allegation or contention in these proceedings is true or valid. This agreement represents a compromise by the settling parties of their respective issues or claims, taken together.

This agreement is expressly conditioned upon the Commission's acceptance of all its provisions, without change or condition, and if the Commission does not accept said provisions in their entirety, without change or condition, the agreement shall, at Staff's, or LRWC's option, exercised within thirty days of such Commission order, be deemed to be null and void and without effect and shall not constitute any part of the record in this proceeding nor be used for any other purpose.

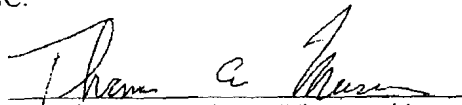

The Commission's acceptance of this agreement does not constitute continuing approval of, or precedent regarding, any particular principle or issue in this proceeding, but such acceptance does constitute a determination that (as the settling parties believe) the adjustments and provisions set forth herein in their totality are just and reasonable and that the revenues contemplated will be just and reasonable under the circumstances.
