Re: Docket Nos. DE 06-028 and DE 09-035, Delivery Service Rate Proceedings
Report to the Public Utilities Commission Detailing Eversource's Reliability Enhancement Program
(REP) Activities for the Period January 1, 2014 Through December 31, 2014.

Dear Ms. Howland:

Article II, Section 2.1.6 of the Settlement Agreement in the Delivery Service Rate Proceeding for Public Service Company of New Hampshire d/b/a Eversource Energy ("Eversource") in Docket No. DE 06-028, requires that on or about April 1 of each year Eversource provide a report to the Commission showing its actual Reliability Enhancement Program ("REP") activities and costs for the previous calendar year and its planned activities for the current calendar year. Pursuant to the terms contained in the settlement, "[Eversource] shall explain the process it used to determine the REP activities undertaken in the subject year, and will identify which REP activities recommended by Mr. Cannata were performed in the subject year." Eversource has submitted the required annual reports each year subsequent to the Settlement Agreement in that docket.

On June 28, 2010 the Commission issued Order No. 25,123 in Docket No. DE 09-035 captioned Order Approving Settlement Agreement on Permanent Rates. The Settlement Agreement approved by the Commission in that docket continued to fund Eversource's initial REP ("Base REP"), but also established an expanded reliability program referred to as REP II which became operational on July 1, 2010. The result is that the Base REP and REP II programs are now operated on a combined basis and this report provides details on the overall program.

Enclosed is a report detailing Eversource's overall REP activities and achievements for calendar year 2014 as well as a projection of major program expenditures for capital and O&M through June, 2015. The report has been developed as a complete reference source of information on the overall REP program and includes details on each operation and maintenance and capital item.

Very truly yours,

Allen M. Desbiens
