Ms. Debra Howland
Executive Director and Secretary
N.H. Public Utilities Commission
21 South Fruit Street, Suite 10
Concord, N.H. 03301

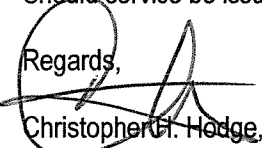

Ref: PUC Docket No: 09-067

Dear Ms. Howland,

Eastern Construction Management, LLC has been closely following PUC Docket No:09-067. We respectfully request the addition of ECM to the Service List concerning this docket. Eastern Construction Management has been active in lobbying for the advancement of the Clean Power Development, Biomass Energy Production Facility proposed for Berlin, NH. We believe that the Clean Power project is the only environmentally and economically responsible option for biomass energy production in the area. Our firm feels that Public Service Company of New Hampshire has a constitutional, statutory, regulatory, and ethical responsibility to consider all power supply offers. By repeatedly failing to even consider a purchase power agreement from an indigenous renewable energy provider, they have demonstrated a disregard for free and fair competition. As a regulated utility with an exclusive distribution franchise, their failure to encourage competitive energy markets and provide electricity buyers and sellers with appropriate price signals is clearly contrary to the requirements of state law and policy.

Should service be issued electronically please email to c.hodge@easternconstructionmanagement.com

Regards,

Christopher G. Hodge, President
Eastern Construction Management, LLC
