Re: DE 09-210, Conservation Services Group on behalf of Seaman Energy LLC
Certification Application for Class I Eligibility of the Gardner Landfill Methane Gas
Facility Pursuant to RSA 362-F

Dear Ms. Stanton:

On November 2, 2009, Conservation Services Group (CSG) submitted an application on behalf of Seaman Energy LLC requesting that the Commission grant approval of the Gardner landfill methane gas facility (Gardner facility) as eligible to produce Class I Renewable Energy Certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval noting that the CSG application was complete on May 18, 2010.

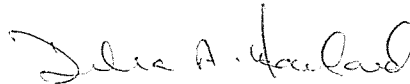

Class I eligibility requires a facility to begin the production of electricity after January 1, 2006 and to use certain sources to produce electricity, one of which is methane gas. The application indicates that the Gardner facility is powered by methane gas, has a gross nameplate capacity of one megawatt and began commercial operation on March 31, 2010. The facility is located at 808 West Street, Gardner, Massachusetts. The facility's New England Power Pool Generation Information System facility code is MSS 17259.

The Commission has reviewed the Gardner facility application and has determined that CSG has provided all the necessary documentation to demonstrate that the Gardner facility is eligible for certification as a Class I facility. Therefore, the Commission hereby certifies that the Gardner facility is a Class I renewable energy source and is eligible to receive New Hampshire Class I RECs effective May 18, 2010.

Re: DE 09-210 Seaman Energy LLC's Certification of the Gardner Landfill Methane Gas Facility as a New Hampshire RPS Class I Facility pursuant to RSA 362-F
New Hampshire Certification Code NH-I-10-058

Dear Mr. Webb:

Please be advised that, pursuant to NH RSA 362-F, the New Hampshire Public Utilities Commission has certified the Gardner landfill methane gas facility as eligible for Class I Renewable Energy Certificates (RECs). Accordingly, the Gardner facility is eligible to receive New Hampshire Class I RECs effective May 18, 2010.

The application indicates that the Gardner facility is powered by methane gas, has a gross nameplate capacity of 1 megawatt and began commercial operation on March 31, 2010. The facility is located at 808 West Street, Gardner, Massachusetts. The facility's New England Power Pool Generation Information System facility code is MSS 17259. The New Hampshire Renewable Portfolio Standard certification code is NH-I-10-058.

Sincerely,

A handwritten signature in cursive script that reads "Debra A. Howland".
