Re: DE 09-217, DE 09-218 and DE 09-219, New Hampshire Electric Cooperative, Inc.
Certification Applications for Class II Eligibility Pursuant to RSA 362-F on behalf of
homeowners Joshua Ingalls, Kim Frase and Richard Bonin

Dear Mr. McNeil:

On November 9, 2009, you submitted applications on behalf of homeowners Joshua Ingalls, Kim Frase and Richard Bonin requesting certification of three customer-sited rooftop photovoltaic facilities as eligible to produce Class II renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the applications and recommended approval noting that the applications were complete on November 9, 2009.

Class II eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from solar technologies. The applications indicate that the facilities are customer-sited photovoltaic rooftop arrays located in New Hampshire and that they began operation during the third quarter of 2009. The details for each facility are listed in the following table:

Commission Assigned Docket #	Facility Owner	Facility Location	Operation Date ¹	Total kW listed in application (DC Arrays)	NH Certification Code
DE 09-217	Joshua Ingalls	116 Lufkin Road Acworth, NH	07/29/09	1.36	NH-II-09-052
DE 09-218	Kim Frase	789 Whittier Highway South Tamworth, NH	08/25/09	4.90	NH-II-09-053
DE 09-219	Richard Bonin	33 Marshall Road Kingston, NH	09/14/09	2.10	NH-II-09-054

¹ NHEC considers the operation date to be the date in which NHEC inspected the facility and installed a revenue quality meter to record the electricity that will be eligible for Class II RECs. This date is the installed date listed in Exhibit E of the applications and may be different than the installation and interconnection dates listed in the interconnection applications. The dates listed in the interconnection applications pertain to the installation and interconnection of the facility, not the revenue quality meter.

Since the facilities are customer-sited sources, their output is not recorded in the NEPOOL Market Settlement System and, as a result, their output must be monitored and verified by an independent monitor. The applications state that NHEC will monitor the facilities' output as required by N.H. Code Admin. Rule Puc 2505.08.

Based on Staff's recommendation, the Commission has determined that NHEC has provided all the necessary information to demonstrate that the facilities are eligible for certification as Class II facilities. Therefore, the Commission hereby certifies that the Joshua Ingalls, Kim Frase and Richard Bonin facilities are Class II renewable energy sources effective November 9, 2009 and are eligible to be issued New Hampshire Class II renewable energy certificates.

The New Hampshire Renewable Portfolio Standard certification codes for the NHEC solar photovoltaic facilities are listed in the previous table.

Sincerely,

A handwritten signature in black ink, appearing to read "Debra A. Howland". The signature is fluid and cursive, with the first name being the most prominent.

Debra A. Howland
