SUBJECT: Staff Recommendation Re: DE 09-250, DE 09-251, DE 09-252, DE 09-253 and DE 09-254, New Hampshire Electric Cooperative, Inc. Certification Applications for Class II Eligibility Pursuant to RSA 362-F on behalf of homeowners Barton N. Green, Gilbert W. Sutcliffe, Harriet B. Forkey, John E. Nyblom and Arnold R. Miller

TO: Chairman Thomas B. Getz
Commissioner Clifton C. Below
Commissioner Amy L. Ignatius
Debra A. Howland, Executive Director and Secretary

CC: Jack K. Ruderman, Director, Sustainable Energy Division
Suzanne Amidon, Staff Attorney *SA*

Summary

On December 7, 2009, New Hampshire Electric Cooperative, Inc. (NHEC) submitted applications on behalf of homeowners Barton N. Green, Gilbert W. Sutcliffe, Harriet B. Forkey, John E. Nyblom and Arnold R. Miller requesting that the Commission grant approval of photovoltaic facilities at their residences to produce Class II Renewable Energy Certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Pursuant to RSA 362-F:4, II, Class II eligibility requires that a facility produce electricity from solar technologies and that it began operation after January 1, 2006.

Pursuant to RSA 362-F, the Commission, in a non-adjudicative process, is required to issue a determination of whether a facility meets a particular classification within 45 days of receipt of a completed application. The five above-named facilities are customer-sited rooftop photovoltaic facilities that began operation in 2009. The facilities meet the Class II eligibility requirements under RSA 362-F:4, II. Based on its review of the applications, Staff recommends that the Commission approve the facilities as eligible for Class II RECs effective December 7, 2009.

Analysis

The facilities are customer-sited photovoltaic rooftop arrays located in New Hampshire that began operation in 2009. The facilities' gross nameplate capacities range from 1.6 kilowatts (kW) to 3.9 kW. The details for each facility are listed in the following table.

Commission Assigned Docket #	Facility Owner	Facility Location	Equipment Vendor	Installing Electrician	Operation Date¹	Total kW listed in application (DC Arrays)
DE 09-250	Barton N. Green	Andover, NH	Snow Dragon Renewable Energy	Marshall Wetmore	August 31, 2009	3.60
DE 09-251	Gilbert W. Sutcliffe	Plymouth, NH	Mauchly Electric, LLC	Larry Mauchly	September 25, 2009	1.60
DE 09-252	Harriet B. Forkey	Alexandria, NH	Plymouth Area Renewable Energy Initiative	Larry Mauchly	September 29, 2009	3.90
DE 09-253	John E. Nyblom	Charlestown, NH	Clear Mountain Solar, LLC	Mike Laraway	July 27, 2009	2.00
DE 09-254	Arnold R. Miller	Laconia, NH	Frase Electric, LLC	Kim Frase	October 9, 2009	2.05

Pursuant to N. H. Code of Admin. Rules Puc 2505.08, the applicant is required to submit a complete list of the equipment used at the facilities and certain information regarding the installer, seller and independent monitor. Each facility's equipment vendor and installing electrician are listed in the previous table. The ISO-NE asset identification numbers are not applicable as the facilities are customer-sited sources. Since the facilities are customer-sited sources, their output is not recorded in the NEPOOL Market Settlement System and, as a result, their output must be monitored and verified by an independent monitor pursuant to Puc 2505. The applications identify NHEC as the independent monitor. The Commission granted NHEC such status on May 12, 2009 in DE 09-006.

The applicant is also required to provide a copy of the interconnection agreement, proof that the applicant's distribution utility approved the installation, and a signed attestation that the facility meets applicable building codes. NHEC provided a copy of the approved interconnection agreements with each facility and signed attestations that NHEC, as the distribution utility, approved the installation of each facility. Each application included a signed attestation that was originally provided to NHEC indicating that each project was installed and operating in conformance with any applicable building

¹ NHEC considers the operation date listed in the table above, and in Appendix E of each application, to be the date on which NHEC inspected the facility and installed a revenue quality meter to record the electricity that will be eligible for Class II RECs. The date listed in each interconnection application pertains to the installation and interconnection of the facility and may be different than the operation date listed in the above table.

codes. Staff recommends that the Commission find these signed attestations have met Puc 2005.08 (b) (7) and (8).

Recommendation

Staff has reviewed NHEC's applications for photovoltaic facilities located on the above-named homeowners' rooftops and can affirm they are complete pursuant to N. H. Code of Admin. Rules Puc 2500. Staff recommends that the Commission certify the Barton N. Green, Gilbert W. Sutcliffe, Harriet B. Forkey, John E. Nyblom and Arnold R. Miller facilities as eligible for Class II RECs effective December 7, 2009, the date on which Staff was able to make a determination that the facilities met the requirements for certification as Class II renewable energy sources.
