4		Dana Nute, Director	4	* * * * * * * * *
5		Reptg. Conservation Law Foundation: Jonathan Peress, Esq.	5	MS. THUNBERG: Thank you for the
6		Reptg. the Office of Energy & Planning:	6	break. Prior to our break, I had distributed
7		Eric Steltzer, Energy Policy Analyst	7	a three-page document. I have since retracted
8		Reptg. Residential Ratepayers: Rorie E. P. Hollenberg, Esq.	8	that document and replaced it with a one-page
9		Stephen R. Eckberg Office of Consumer Advocate	9	document which should help us steer clear of
10		Reptg. NHPUC Staff:	10	any unintended supplementing of the PSNH IRI
11		Marcia A.B. Thunberg, Esq.	11	docket. But with that, I'd still like to have
12		James J. Cunningham, Jr., Electric Div. Al-Azad Iqbal, Electric Division	12	Staff ask the question first of this document
13			13	and wait to make sure that Gerry doesn't have
14			14	any objection to it. Thank you.
15			15	CHAIRMAN IGNATIUS: All right.
16			16	Well, let's mark this for identification as
17				•
			17	37. And that's the one page entitled "Exhibit
18			18	IV-15."
19			19	(The document, as described, was
20			20	herewith marked as 37 for
21			21	identification.)
22			22	MR. EATON: And maybe counsel
23			23	could correct me, but it appears to be a page
			24	from the original filing of the Least Cost
24				from the original fining of the Least Cost

	DE 10-188 2011 CORE E	LEC		IC PROGRAMS
[WI]	NESS PANEL: GELINEAU PALMA] Page 5	[WI7	TNES	S PANEL: GELINEAU PALMA] Page 7
1	Plan, which I think was marked as Exhibit 1 in	1		HPwES Program, the number are the same; is
2	the Least Cost Integrated Resource Plan	2		that correct?
3	docket.	3	Δ	(By Mr. Gelineau) I don't think so. And I
4	MS. THUNBERG: That is correct.	4	л.	guess I have to look. But I think that
5	This page is pulled from Exhibit 1. Thank	5	\circ	But both are 226; is that correct?
6	you.	6	Q. A.	
	CHAIRMAN IGNATIUS: All right.	7	л.	I think that the exhibit well, the table
7	CROSS-EXAMINATION			that you're looking at in is this
8	BY MR. IQBAL:	8		exhibit I don't know what exhibit
	Q. We are talking about Exhibit 37 on that	10	Q.	
10	page, Page 61. The table title also called	11	Q. A.	•
11				· · · · ·
12	Exhibit IV-16, "Residential Obtainable	12	Q.	Thirty-seven.
13	Potential Revisions." My question relate to the weatherization. I understand that the		A.	• •
14		14		about weatherization in general. It's not
15	first column that is "Obtainable Potential"	15		talking about that one program. I think it
16	identified by GDS and is that right?	16		probably includes both the low-income
17	A. (By Mr. Gelineau) I'm waiting for Attorney	17		program and the weatherization the Home
18	Eaton to tell me whether I can answer this,	18		Performance program. So that would be a sum
19	I guess.	19		of two of them.
20	MR. EATON: Yes, you can answer	20		And if you look at the other exhibit
21	that.	21		that you're looking at, there's some
22	A. (By Mr. Gelineau) That's correct.	22		764-megawatt hours associated with that.
23	Q. And the next column is "Adjusted Potential."	23		So, I mean, it would be the combination of
24	It is done by PSNH; is that correct?	24		those two, I believe, would be the

I mean, you've got a number called the "Adjusted Potential," and I'm not sure that anybody really understands what those column headings mean in here without additional explanation. There's quite a bit of explanation that went into the document from
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	 A. (By Mr. Gelineau) That's correct. Q. And the third column is "2010 Cold Service," and it is 226; is that correct? A. (By Mr. Gelineau) That's correct. Q. Yup. And if you look at Page 24 of Exhibit 23 MS. THUNBERG: And just to remind folks, that was the CORE Program attached to the settlement agreement that was filed in December 2011. A. (By Mr. Palma) Page 24 or 25? BY MR. IQBAL: Q. Twenty-four. MS. THUNBERG: For right now, 24, yes. BY MR. IQBAL: Q. On Home Performance with ENERGY STAR, if you look at the column "Annual Megawatt 	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. A. Q.	comparable number. Okay. Then you are trying to say that your adjusted potential, that 640 megawatt hour, is wrong. (By Mr. Gelineau) Is wrong? Yeah, because you're saying that you are achieving 2012 more than that. (By Mr. Gelineau) Well, I think it would be worthwhile if we explained what these columns are for people who are not familiar with the Least Cost Plan. I mean, you've got a number called the "Adjusted Potential," and I'm not sure that anybody really understands what those column headings mean in here without additional explanation. There's quite a bit of explanation that went into the document from which this was taken that is not available
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	 A. (By Mr. Gelineau) That's correct. Q. And the third column is "2010 Cold Service," and it is 226; is that correct? A. (By Mr. Gelineau) That's correct. Q. Yup. And if you look at Page 24 of Exhibit 23 MS. THUNBERG: And just to remind folks, that was the CORE Program attached to the settlement agreement that was filed in December 2011. A. (By Mr. Palma) Page 24 or 25? BY MR. IQBAL: Q. Twenty-four. MS. THUNBERG: For right now, 24, yes. BY MR. IQBAL: Q. On Home Performance with ENERGY STAR, if you look at the column "Annual Megawatt Savings," it also mention 226 megawatt hour. 	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	Q. A. Q.	comparable number. Okay. Then you are trying to say that your adjusted potential, that 640 megawatt hour, is wrong. (By Mr. Gelineau) Is wrong? Yeah, because you're saying that you are achieving 2012 more than that. (By Mr. Gelineau) Well, I think it would be worthwhile if we explained what these columns are for people who are not familiar with the Least Cost Plan. I mean, you've got a number called the "Adjusted Potential," and I'm not sure that anybody really understands what those column headings mean in here without additional explanation. There's quite a bit of explanation that went into the document from which this was taken that is not available to most of the folks in the room. So, I
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	 A. (By Mr. Gelineau) That's correct. Q. And the third column is "2010 Cold Service," and it is 226; is that correct? A. (By Mr. Gelineau) That's correct. Q. Yup. And if you look at Page 24 of Exhibit 23 MS. THUNBERG: And just to remind folks, that was the CORE Program attached to the settlement agreement that was filed in December 2011. A. (By Mr. Palma) Page 24 or 25? BY MR. IQBAL: Q. Twenty-four. MS. THUNBERG: For right now, 24, yes. BY MR. IQBAL: Q. On Home Performance with ENERGY STAR, if you look at the column "Annual Megawatt Savings," it also mention 226 megawatt hour. A. (By Mr. Gelineau) Yeah. 	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. A. Q.	comparable number. Okay. Then you are trying to say that your adjusted potential, that 640 megawatt hour, is wrong. (By Mr. Gelineau) Is wrong? Yeah, because you're saying that you are achieving 2012 more than that. (By Mr. Gelineau) Well, I think it would be worthwhile if we explained what these columns are for people who are not familiar with the Least Cost Plan. I mean, you've got a number called the "Adjusted Potential," and I'm not sure that anybody really understands what those column headings mean in here without additional explanation. There's quite a bit of explanation that went into the document from which this was taken that is not available to most of the folks in the room. So, I think it would be worthwhile just going
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	 A. (By Mr. Gelineau) That's correct. Q. And the third column is "2010 Cold Service," and it is 226; is that correct? A. (By Mr. Gelineau) That's correct. Q. Yup. And if you look at Page 24 of Exhibit 23 MS. THUNBERG: And just to remind folks, that was the CORE Program attached to the settlement agreement that was filed in December 2011. A. (By Mr. Palma) Page 24 or 25? BY MR. IQBAL: Q. Twenty-four. MS. THUNBERG: For right now, 24, yes. BY MR. IQBAL: Q. On Home Performance with ENERGY STAR, if you look at the column "Annual Megawatt Savings," it also mention 226 megawatt hour. A. (By Mr. Gelineau) Yeah. Q. So we can say that this table on Exhibit 37 	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. A. Q.	comparable number. Okay. Then you are trying to say that your adjusted potential, that 640 megawatt hour, is wrong. (By Mr. Gelineau) Is wrong? Yeah, because you're saying that you are achieving 2012 more than that. (By Mr. Gelineau) Well, I think it would be worthwhile if we explained what these columns are for people who are not familiar with the Least Cost Plan. I mean, you've got a number called the "Adjusted Potential," and I'm not sure that anybody really understands what those column headings mean in here without additional explanation. There's quite a bit of explanation that went into the document from which this was taken that is not available to most of the folks in the room. So, I think it would be worthwhile just going through what these columns mean in order to
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	 A. (By Mr. Gelineau) That's correct. Q. And the third column is "2010 Cold Service," and it is 226; is that correct? A. (By Mr. Gelineau) That's correct. Q. Yup. And if you look at Page 24 of Exhibit 23 MS. THUNBERG: And just to remind folks, that was the CORE Program attached to the settlement agreement that was filed in December 2011. A. (By Mr. Palma) Page 24 or 25? BY MR. IQBAL: Q. Twenty-four. MS. THUNBERG: For right now, 24, yes. BY MR. IQBAL: Q. On Home Performance with ENERGY STAR, if you look at the column "Annual Megawatt Savings," it also mention 226 megawatt hour. A. (By Mr. Gelineau) Yeah. Q. So we can say that this table on Exhibit 37 could be used for 2012 plan because the 	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. A. Q.	comparable number. Okay. Then you are trying to say that your adjusted potential, that 640 megawatt hour, is wrong. (By Mr. Gelineau) Is wrong? Yeah, because you're saying that you are achieving 2012 more than that. (By Mr. Gelineau) Well, I think it would be worthwhile if we explained what these columns are for people who are not familiar with the Least Cost Plan. I mean, you've got a number called the "Adjusted Potential," and I'm not sure that anybody really understands what those column headings mean in here without additional explanation. There's quite a bit of explanation that went into the document from which this was taken that is not available to most of the folks in the room. So, I think it would be worthwhile just going through what these columns mean in order to understand what is going on here.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	 A. (By Mr. Gelineau) That's correct. Q. And the third column is "2010 Cold Service," and it is 226; is that correct? A. [\//	TNESS PANEL: GELINEAU PALMA] Page 9			S PANEL: GELINEAU PALMA] Page
[vvi		[VVI	INLO	
1	creeping into the other docket any further.	1		this potential.
2	And most of the parties to that docket are not	2	A.	(By Mr. Gelineau) I'm sorry, but I don't see
3	here, and we are not reopening the evidentiary	3		35 percent anywhere, and I'm not sure what
4	record.	4		it is you're referring to.
5	Ms. Thunberg, can you give	5	Q.	Yeah. If you divide 226 by 640, you get
6	me an offer of proof on why the Exhibit 37	6		around 35.
7	numbers are significant to what we're trying	7	A.	(By Mr. Gelineau) Well, I don't think you're
8	to work through today?	8		interpreting the table from the Least Cost
9	MS. THUNBERG: Iqbal Al-Azad	9		Plan correctly, for starters. But if I
0	[sic] can answer it a lot more succinctly than	10		could just say that it indicates here in
1	I can, so I'm deferring to him.	11		that table, in the last column, it says that
2	CHAIRMAN IGNATIUS: All right.	12		the 2015 Market Potential is 619, what we
3	MR. IQBAL: We are looking at	13		said succinctly is that in 2015 we would
4	that number because that identified	14		save, annually, 619. What we're saying in
5	weatherization potential annually, which is	15		the 2012 plan is that we're going to save
6	submitted by PSNH. They said that they can	16		993. So we're actually about a third higher
	save 640 megawatt hour every year, but they	17		than what it is than what it is that's
.7	are saving 226 megawatt hour. So the point we	18		shown here.
8	are trying to make, that on one side they are	19		So I'm not sure what in other words,
9				
0	saying that they cannot find these potential	20		as I indicated, this is weatherization, all
1	customers, but GDS found that every year they	21		weatherization, for both low-income and the
2	could save 400 640 megawatt hour and leave	22		Home Performance with ENERGY STAR Program
3	it they are saving only 226. So they are	23		And so its value, as I say, is 619. And if
24	leaving out almost 65-percent annual saving	24		you look at the addition associated under
WI	TNESS PANEL: GELINEAU PALMA] Page 10	[WI]	TNES	S PANEL: GELINEAU PALMA] Page
1	potential every year.	1		the annual megawatt hours of the 767.4 and
1	CHAIRMAN IGNATIUS: All right.			the 226.0, you're going to get 993.4, which
2	· ·	2		is substantially higher than what's in the
3	Why don't you ask that question and focus on	3		Least Cost Plan.
4	what PSNH believes is the potential for these	4	0	
5	programs, which is consistent with other	5	Q.	So you're saying that on Exhibit 37, this
6	testimony today, as opposed to what did it	6		226 megawatt hour doesn't include the
7	mean in the Least Cost Plan and how is it	7		low-income program?
8	developed. All right?	8	A.	(By Mr. Gelineau) It does include it. But
9	MS. THUNBERG: So we can forego	9		you see, again, without explaining what this
0	the offer of explaining the columns from	10		table is, we're using these numbers we're
1	CHAIRMAN IGNATIUS: Well, why	11		pulling these numbers out of this table and
.2	don't we begin, first, with the question. I'm	12		not explaining what it is that this table is
3	hoping it's not necessary to go into that	13		supposed to characterize. And I think
4	detail, but	14		it's I don't think you're using the table
5	BY MR. IQBAL:	15		correctly. That's my bottom line.
6	Q. So the direct question is that you	16		CROSS-EXAMINATION (cont'd)
7	identified that you are saving only one	17	ВЪ	MS. THUNBERG:
8	35 percent of the annual potential in	18		Final question on this point is, if there
9	your in this docket and leaving out	19		are potential energy savings out there, why
0	almost 65 percent of the potential every	20		is PSNH and Unitil going after HPwES or
1	year; whereas, here you are saying that we	21		why is the vast majority of savings in HPwES
2	have to shift this money to save fuels or	22		coming from the non-electric savings? And
	other sources; whereas, you identified that	23		we talked about that either 98 percent or
23	you are not even achieving 35 percent of			90 percent.
24	you are not even achieving 33 percent of	24		90 percent.

					C I KOGKAWS	
[WI	NESS PAI	NEL: GELINEAU PALMA] Page 13	[WIT	NES	S PANEL: GELINEAU PALMA] Page	15
1	A. (By	Mr. Gelineau) Couple of things. First	1		electric savings, they also have potential	
2		all, the reason that the large majority	2		non-electric savings. And it turns out that	
3		the savings are going to come from	3		the non-electric savings exceed the electric	
4		n-electric measures goes back to my point	4		savings, which is not a result different	
5		t I made earlier. You can't do this	5		from what it is that we have in this	
6		gram cost-effectively unless you include	6		particular program. And that, too, is in	
7	_	atherization. Weatherization is the	7		our testimony.	
8		-ticket item. And so it's going to be	8	\circ	On Page 22, which paragraph are you reading	
9	_	an be expected that if you do	9	Q.	from?	
10		atherization for a non-electric home, it's	10	A.	(By Mr. Gelineau) The very first one at the	
11		ng to have a significant amount of the	11	л.	top of the page that says "Recommendation."	
		ings that's not going to be electric.	12	Q.	And the final sentence is, "It is important	
12		d if you don't do those measures, you are	13	Q.	to recognize that such expansion would	
13		· · · · · · · · · · · · · · · · · · ·			require providing services to customers that	
14	_	ng to do two things: One is you're not	14		heat with fuels other than electric or	
15	_	ng to be able to do the program	15			
16		t-effectively; and the other thing is the going to miss out on a lot of	16 17		natural gas. Issues regarding who would pay for the provision of services to such	
17	-				customers would need to be addressed."	
18		ings.	18	٨	(By Mr. Gelineau) That's correct.	
19		And I guess I would call your attention recommendation that comes out of the	19		· · · ·	
20			20	Q.	That's the section that you're talking	
21		S report. And that GDS report says and just basically, this is a	21 22		about. Okay. MS. THUNBERG: I have a question	
22		ommendation which appears on Page 22 of			coming a series of questions coming from	
23 24		GDS study. It's talking about trying to	23 24		Mr. Franz.	
24	tile	ODS study. It's talking about trying to	24		MI. I Idilz.

[WI]	TNES	S PANEL: GELINEAU PALMA] Page 21	[WI	TNES	S PANEL: GELINEAU PALMA] Page 23
1 2		It's 698,069,156 estimated annual savings in kilowatt hours.	1 2		budget that we are using. We have a budget of about \$7 million. They're using a budget
3		CHAIRMAN IGNATIUS: Thank you.	3		of about \$38 million. We have a savings of
4	ΒX	MS. THUNBERG:	4		16.1. Their savings is 69.8. So there
5	Q.	Now, would you agree that there appear to be	5		is you know, all of those factors need to
6	Q.	significant remaining potentially obtainable	6		be considered as you're considering the
7		overall annual residential electric sector	7		comparison of these numbers.
8		savings?	8	Q.	-
9	A.	(By Mr. Gelineau) Yes.	9	Q.	we're in agreement, then, is it fair to say,
10	Q.	Given that there are	10		that there are potentially obtainable annual
11	A.	(By Mr. Gelineau) One point of clarity here	11		savings that remain in
12		before we get too far into this, though.	12	A.	
13		What's not really clear from looking at this	13	Q.	
14		table is that these numbers represent a	14	A.	(By Mr. Palma) To the extent it's exactly
15		10-year implementation. And so if you want	15		this number that GDS has indicated is not
16		to consider the annual value, you need to	16		you know, requires more study. This is a
17		divide that number by 10. So that's not	17		potential study. It's not an exact science.
18		698 or 698 annually. It's 69.8 annually.	18		CMSR. HARRINGTON: Can I just
19	Q.	Thank you for that clarification.	19		ask a clarifying question on this? Maybe I
20	A.	(By Mr. Gelineau) And I will say that it's	20		can't read this. Is this number that we're
21		not very I think that this report is	21		talking about, the 69,156, those are commas
22		particularly confusing in this aspect. But	22		and not decimal points there?
23		that's I did contact the principal who	23		MS. THUNBERG: Those are commas,
24		wrote the report prior to our meeting today	24		yes.
[WI]	TNES	S PANEL: GELINEAU PALMA] Page 22	[WI	TNES	S PANEL: GELINEAU PALMA] Page 24
1		to get clarification on that.	1		CMSR. HARRINGTON: So we're
2	Q.	Now, do you still have page Mr. Gelineau,	2		dealing with, at this level, before we
3		do you still have Page 24 of this was the	3		adjusted by a factor of 10, it's 698 million,
4		CORE document that was Attachment A with	4		et cetera.
5		Exhibit 23.	5		MS. THUNBERG: Hmm-hmm.
6	A.	(By Mr. Gelineau) Yes.	6		CMSR. HARRINGTON: And then if
7	Q.	And that shows annual megawatt savings	7		
8			'		we divide that by 10, we're at 69 million, not
9	A.	(By Mr. Gelineau) Correct.	8		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean,
	A. Q.	(By Mr. Gelineau) Correct of 16,113.2?			we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start
10	Q. A.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct.	8 9 10		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000
10 11	Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we	8 9 10 11		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually
10 11 12	Q. A.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million	8 9 10 11 12		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million
10 11 12 13	Q. A.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less	8 9 10 11 12 13	A.	we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner.
10 11 12 13 14	Q. A. Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct?	8 9 10 11 12 13	A.	we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are
10 11 12 13 14 15	Q. A.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the	8 9 10 11 12 13 14 15	A.	we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours.
10 11 12 13 14 15	Q. A. Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the other thing that you want to look at as	8 9 10 11 12 13 14 15 16	A.	we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours. CMSR. HARRINGTON: Kilowatt
10 11 12 13 14 15 16 17	Q. A. Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the other thing that you want to look at as you're reviewing that is Column No. 2, which	8 9 10 11 12 13 14 15 16 17		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours. CMSR. HARRINGTON: Kilowatt hours. Okay.
10 11 12 13 14 15 16 17	Q. A. Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the other thing that you want to look at as you're reviewing that is Column No. 2, which talks about utility costs of \$7 million.	8 9 10 11 12 13 14 15 16 17 18	A. A.	we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours. CMSR. HARRINGTON: Kilowatt hours. Okay. (By Mr. Gelineau) So they do work out to be
10 11 12 13 14 15 16 17 18	Q. A. Q.	(By Mr. Gelineau) Correct. of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the other thing that you want to look at as you're reviewing that is Column No. 2, which talks about utility costs of \$7 million. And the last column in this report which	8 9 10 11 12 13 14 15 16 17 18		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours. CMSR. HARRINGTON: Kilowatt hours. Okay. (By Mr. Gelineau) So they do work out to be the same factor.
10 11 12 13 14 15 16 17 18 19	Q. A. Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the other thing that you want to look at as you're reviewing that is Column No. 2, which talks about utility costs of \$7 million. And the last column in this report which says that you've got even when you divide	8 9 10 11 12 13 14 15 16 17 18 19		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours. CMSR. HARRINGTON: Kilowatt hours. Okay. (By Mr. Gelineau) So they do work out to be the same factor. CMSR. HARRINGTON: That's what I
10 11 12 13 14 15 16 17 18 19 20 21	Q. A. Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the other thing that you want to look at as you're reviewing that is Column No. 2, which talks about utility costs of \$7 million. And the last column in this report which says that you've got even when you divide by 10, you've got a budget of almost	8 9 10 11 12 13 14 15 16 17 18 19 20 21		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours. CMSR. HARRINGTON: Kilowatt hours. Okay. (By Mr. Gelineau) So they do work out to be the same factor. CMSR. HARRINGTON: That's what I was trying to get straight, because people
10 11 12 13 14 15 16 17 18 19 20 21 22	Q. A. Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the other thing that you want to look at as you're reviewing that is Column No. 2, which talks about utility costs of \$7 million. And the last column in this report which says that you've got even when you divide by 10, you've got a budget of almost \$40 million. You've got \$38-something	8 9 10 11 12 13 14 15 16 17 18 19 20 21 22		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours. CMSR. HARRINGTON: Kilowatt hours. Okay. (By Mr. Gelineau) So they do work out to be the same factor. CMSR. HARRINGTON: That's what I was trying to get straight, because people were using the terms back and forth, megawatt
10 11 12 13 14 15 16 17 18 19 20 21	Q. A. Q.	(By Mr. Gelineau) Correct of 16,113.2? (By Mr. Gelineau) Yes, that's correct. And that 16,000 number is less than if we back into divide by 10 the 698 million that comes out to 69,000. So 16 is less than that; correct? (By Mr. Gelineau) That's correct. But the other thing that you want to look at as you're reviewing that is Column No. 2, which talks about utility costs of \$7 million. And the last column in this report which says that you've got even when you divide by 10, you've got a budget of almost	8 9 10 11 12 13 14 15 16 17 18 19 20 21		we divide that by 10, we're at 69 million, not 69,000 as people were saying. So, I mean, that's a pretty big difference when you start to compare, 'cause you're talking about 16,000 on Page 24 comparing to 69,000. It's actually 69 million (By Mr. Gelineau) I'm sorry, Commissioner. It's 16.1-megawatt hours, and these are kilowatt hours. CMSR. HARRINGTON: Kilowatt hours. Okay. (By Mr. Gelineau) So they do work out to be the same factor. CMSR. HARRINGTON: That's what I was trying to get straight, because people

1	relative terms. Thank you.	1		identification.)
2	BY MS. THUNBERG:	2	B'	Y MS. THUNBERG:
3	Q. A follow-up question. Now that we've	3	Q.	Have you had a chance to refresh your
4	established that there are a significant	4		recollection with this response?
5	amount of potentially obtainable savings,	5		(Witness reviews document.)
6	again, it begs the question: Why design a	6	A.	(By Mr. Gelineau) Yes, I have.
7	HPwES program to go after the non-electric	7	Q.	• •
8	savings?	8		"500,000-kilowatt hours." Can you tell me
9	A. (By Mr. Gelineau) I think we certainly	9		what percentage that number represents of
10	wouldn't suggest that it's designed to go	10		the total equivalent lifetime savings of the
11	after the non-electric savings. It's	11		HPwES program, if you know?
12	designed to go after all of the savings,	12		(Witness reviews document.)
13	both electric and non-electric, in the most	13	A.	
14	cost-effective way possible. Again, we	14		if I remember correctly. I think Staff
15	indicated earlier that it's important to get	15		calculated something like 79 million
16	all the savings when you go to a home. And	16		kilowatt hours or 79 million MMBtus. No.
17	it's important that, if you're going to do a	17		MR. CUNNINGHAM: I'm sorry.
18	program, that you get the weatherization,	18		You're correct. That included the equivalent
19	because that is the thing that provides the	19		MMBtus.
20	cost-effectiveness. That's where all the	20	A.	(By Mr. Gelineau) Right. So it would be a
21	energy savings are. You need to do that in	21		relatively small number. I don't have I
22	order to have something that's going to be	22		guess if you can give me a few minutes I can
23	cost-effective.	23		do the calculation, but
24	I think I just got through indicating	24		But I guess, again, I'm going to go
	TNESS PANEL: GELINEAU PALMA] Page 26 that the GDS report has a recommendation,		TNES	SS PANEL: GELINEAU PALMA] Page 28 back to my earlier testimony in which I
1 2	and I think you just brought I think you	1 2		suggested that, if the one were to use the
3	made an exhibit out of it and that	3		GDS numbers that they came up with for the
4	recommendation says that if you want to get	4		savings that might be associated with the
5	the electric savings, you need to consider	5		so-called "ancillary savings," it's much,
6	expanding to provide services to other fuels	6		much larger than the 42 than the 42
7	other than electricity for weatherization,	7		kilowatt hours shown here. And, in fact,
8	other than electric and natural gas. And	8		that is I'm just trying to it's
9	that's part of what the recommendation	9		roughly 35 times more. So, if that is the
10	that's one of the recommendations from the	10		right answer and I don't know what the
11	GDS report. And they are assuming that when	11		right answer is. But if that were the
12	they come up with these potential savings.	12		correct amount, we have a range between 42
13	They're assuming that you're going to do	13		and some 1400 that GDS came up with. That's
14	that; otherwise, you can't get all of these	14		a big range. And right now, you're using
15	savings.	15		the number on the lowest end of the range.
16	MS. THUNBERG: Going to shift	16		If we were to use the number on the highest
17	gears a little bit. I have another data	17		end of the range for these ancillary
18	response to pass out. If I can identify it	18		savings, the result would be quite
19	for the record, it is PSNH and Unitil's	19		different.
20	response to Staff 5-17.	20	Q.	Let's shift gears a little bit. Has PSNH
21	CHAIRMAN IGNATIUS: We'll mark	21		and Unitil been of the opinion that Staff
22	this for identification as Exhibit 39.	22		opposes a permanent fuel-neutral HPwES
23	(The document, as described, was	23		program? I can reask the question.
24	herewith marked as 39 for	24	A.	(By Mr. Palma) Sure.

		DAY 1 - MIDAFTERNOON S DE 10-188 2011 CORE F	SESS ELEC	ION CTRI	NONLY - June 6, 2012 IC PROGRAMS
[WI	TNES	S PANEL: GELINEAU PALMA] Page 29	[WI]	TNES	SS PANEL: GELINEAU PALMA] Page 31
1	Q.	Is PSNH and Unitil of the opinion that Staff	1		that.
2	•	opposes a permanent fuel-neutral HPwES	2	A.	
3		program?	3		close to exhausting all of the potential
4	A.	(By Mr. Gelineau) Well, I would hope so,	4		savings opportunities identified in the
5		because otherwise I don't know why we're	5		Climate Action Plan. If this question is
6		here, quite frankly.	6		intended to get at the I think that in
7	Q.	- · · · · · · · · · · · · · · · · · · ·	7		Staff testimony there was some discussion as
8	A.		8		to a portion of the Climate Action Plan
9		nothing's ever permanent. But I think for	9		addressed electric measures as opposed to
10		the foreseeable two-year plan, they do	10		other types of measures. And I think that
11		oppose	11		we tried to indicate in our testimony that,
12	Q.	Would you agree that Staff to the extent	12		with the exception of maximized efficiency
13		you think that Staff opposes it, would you	13		in buildings, all of the other electric,
14		agree that Staff only opposes HPwES because	14		so-called "electric measures," are outside
15		it's based on the system benefit charge and	15		the scope of what it is that one would do in
16		raises the issues of fairness?	16		the energy-efficiency arena, particularly as
17	A.	(By Mr. Gelineau) Certainly I believe that	17		it relates to the systems benefits charge.
18		Staff's feeling is that that is an issue.	18		I mean, some of these measures include
19		I think that one of my one of my	19		things like the RPS; they include REGGI;
20		concerns is that this issue has come up time	20		they include nuclear power; they include
21		and again, even after the Commission had	21		I'm trying to remember all of them. But the
22		ruled that it was all right to use systems	22		only 1 out of the 10 recommendations that
23		benefits charges for fuel-neutral programs.	23		relate directly to the systems benefits
24		And I think that, more than anything, that's	24		charge and energy efficiency is maximizing
		, ,			
[WI	TNES	S PANEL: GELINEAU PALMA] Page 30	[WI]	TNES	SS PANEL: GELINEAU PALMA] Page 32
1		why I'm glad that we're here today and we'll	1		efficiency in buildings, which is also a
2		finally have an opportunity to get this	2		recommendation from another portion of the
3		issue to bed, in back of us.	3		plan, and that's the portion under which
4	Q.	Do you think that PSNH and Unitil exhausted	4		this particular program is focused. It is
5		all electric savings opportunities which	5		aimed at trying to reduce energy in
6		support the New Hampshire Climate Action	6		buildings. All energy.
7		Plan goal of reducing greenhouse gas	7	Q.	
8		emissions?	8		incentive, to wrap up.
9	A.	(By Mr. Gelineau) Have we exhausted all	9		MS. THUNBERG: And Chairman
10		possibilities of have we done all the	10		Ignatius, I just want clarification. I forget
11		savings associated with the Climate Action	11		how in depth we can go or should not go on
12		Plan?	12		performance incentive. We talked about it
13	Q.	Do you have an opinion as to the extent of	13		this morning, whether it was ripe for
14		exhaustion PSNH and Unitil have done with	14		discussion today. I just had a few questions
15		looking at electric savings opportunities	15		bringing in the VEIC report. But I guess I
16		and, I guess, exhausting those opportunities	16		need a refreshing refreshment on the extent
17		to support the New Hampshire Climate Action	17		I should be going into it.
18		Plan? You've mentioned your programs in the	18		CHAIRMAN IGNATIUS: Well, my
19		past or let me retract that.	19		sense was the question of whether the HPwES
20		Your testimony earlier today included	20		program should be entitled to performance

	DE 10-188 2011 CORE E	LEC	CTR	IC PROGRAMS
[WITNE	SS PANEL: GELINEAU PALMA] Page 33	[WI	TNES	SS PANEL: GELINEAU PALMA] Page 35
1	any other program. But is it should it be	1		nodding. If that's correct, then these may be
2	earning on the non-electric measures; and if	2		good areas to explore as a foundation but not
3	so, why or why not. Is that too narrow a	3		to get into how one would actually do the
4	framework? That's what I meant when I was	4		measurement and the calculations. Is that
5	using those words.	5		correct? I mean, I'm a little in the dark
6	MS. THUNBERG: I have about 10	6		myself. So why don't you get started, and
7	questions on that subject, and I just feel	7		let's see where we go. But I think the
8	better about getting the perspective of the	8		primary focus is: Is it right to allow
9	VEIC on the record.	9		incentives for non-electric measures; and if
10	CHAIRMAN IGNATIUS: That's fine.	10		so, why?
11	MS. THUNBERG: And to that end,	11		So why don't we, for
12	I would like to not bring in the full VEIC	12		identification, mark this Chapter 40
13	report, but just enter into the record Chapter	13		excuse me Chapter 9 as Exhibit 40.
14	9 that relates to the performance incentive	14		MS. THUNBERG: Thank you.
15	for discussion purposes.	15		(The document, as described, was
16	CHAIRMAN IGNATIUS: Is there any	16		herewith marked as 40 for
17	objection to introducing that chapter?	17		identification.)
18	MS. GOLDWASSER: I guess my only	18	В	Y MS. THUNBERG:
19	comment would be, to the extent this is	19	Q.	
20	relevant to the question before the	20		report in Chapter 9?
21	Commission, I don't have a problem with it.	21	A.	(By Mr. Palma) Yes.
22	But to the extent we're going to get into this	22		And does this chapter discuss many
23	question of what the working group should be	23	`	recommendations recommended changes to
24	looking at and, you know, not all of the	24		or areas of inquiry for the performance
[WITNE	SS PANEL: GELINEAU PALMA] Page 34	[WI]	TNES	SS PANEL: GELINEAU PALMA] Page 36
1	parties to the larger CORE docket in 10-188	1		incentive?
2	are actively engaged in this part of the	2	A.	(By Mr. Gelineau) Yes.
3	proceeding. So, for example: The New	3		And is it correct that you are asking for a
4	Hampshire Electric Co-Op doesn't have their	4	-	12-percent performance incentive on the full
5	counsel here today, and they're part of the	5		fuel-blind HPwES program?
6	working group. So that's my only concern, is	6	A.	(By Mr. Gelineau) No, that's not correct.
7	to the extent this reaches into the larger	7		We're asking for we're asking for the
8	question, as the Chairman described it, that	8		incentive just as it is for all of the other
9	we be careful that we don't go past where	9		programs, and that incentive range is
10	people here today are ready to talk about.	10		between zero and 12 percent.
11	CHAIRMAN IGNATIUS: Well, I	11	Q.	Thank you for that clarification.
12	think that as long as we're not getting	12		Are you familiar with the
13	into correct me if I'm wrong. Mr. Eaton	13		recommendation in this Chapter 9 that talks
14	said at the beginning, if there were approval	14		about an incentive of a much lower level
15	for this program to earn incentives for	15		could be enough of an incentive?
16	non-electric measures, the Company would then	16		MR. EATON: Objection. I think
17	develop a proposal to do so, and presumably	17		that goes into what the future design of the
18	Unitil would as well. And that would be	18		performance incentive is. We're asking
19	submitted as part of the discussed through	19		that asking the Commission only to decide
20	the summer and submitted as part of the	20		whether we get the same performance incentive
21	Company's proposals in the next CORE docket.	21		on the full program as allowed in all the
22	And if that's correct	22		other programs. And if they're exploring
	MR. EATON: That's correct.	23		whether Home Performance with ENERGY STAR gets
23		23		
23	CHAIRMAN IGNATIUS: Mr. Eaton's	24		only zero to 6 percent, that's not what's in

	DE 10-188 2011 CORE F	LEC	TRI	IC PROGRAMS
[WIT	NESS PANEL: GELINEAU PALMA] Page 37	[WIT	NES	S PANEL: GELINEAU PALMA] Page 39
1	front of the Commission today, I think.	1		Do you remember back when that was in
2	MS. THUNBERG: I will withdraw	2		existence, what percentage of the costs it
3	the question.	3		was? And I offer that Staff was doing a
4	CMSR. HARRINGTON: Response?	4		calculation and was thinking that the Home
5	MS. THUNBERG: I will withdraw	5		Energy Solutions Program represented about
6	the question. It's easier that way.	6		44 percent of the cost total. And just to
7	Chairman Ignatius, I've	7		put that in perspective, we were comparing
8	been trying to cull down the questions,	8		it to the 70 percent that I just talked
9	given the lateness of the hour. And I know	9		about in the earlier question.
10	that I just had this marked for	10	A.	(By Mr. Gelineau) So you're suggesting that
11	identification, but most of my questions go	11		it's 2.8 million, something like that? How
12	to ripeness. So at this point, I think I	12		much did you say? Forty percent?
13	will withdraw my request well,	13	Q.	I'm wondering if you would agree that the
14	prematurely to have this marked. And I	14		Home Energy Solutions Program, when it
15	don't know if you want to just not have this	15		existed, represented about 44 percent oh,
16	as a number or how you want to proceed with	16		I'm having a clarification here while I'm
17	other people having exhibits coming	17		asking this.
18	afterwards. But I think for economy	18		(Discussion among Staff)
19	CHAIRMAN IGNATIUS: That's fine.	19	ВЪ	Y MS. THUNBERG:
20	So why don't we withdraw 40. We'll save that	20	Q.	Let me rephrase the question. I asked about
21	number for something yet to come. Thank you.	21		$Home\ Energy\ Assistance,\ HPwES,\ ENERGY\ STAR$
22	(Exhibit 40 withdrawn for	22		Homes, and those three, at least on Page 24,
23	identification.)	23		represent 70 percent. Now, if we replace
24	(Pause in proceedings)	24		HPwES with Home Energy Solutions, Staff
[WI]	TNESS PANEL: GELINEAU PALMA] Page 38	[WI]	NES	S PANEL: GELINEAU PALMA] Page 40
1	BY MS. THUNBERG:	1		believes it comes up to about 44 percent.
2	Q. Do you still have Page 24 of the CORE	2		Do you have any comment on that?
3	Program that was attached to the settlement	3	Α	
4	agreement, which I believe was Exhibit 23,			(By Mr. Gelineau) Subject to check, I'm not

I'm not asking for the (By Mr. Gelineau) Well, 2009 really wouldn't have been a year in which there was Home
6 7 8 9 10 11 12 13 14 15 16	in front of you? A. (By Mr. Palma) Yes. Q. And I'd like to draw your attention to the Utility Costs column. It is the third one over. Now, in particular, focusing on Home Energy Assistance Program, Home Performance with ENERGY STAR, and then the Home the ENERGY STAR Homes Program, those three, subject to check, would you agree that these programs represent about 70 percent of that cost number, the Total Residential Cost number? A. (By Mr. Palma) Subject to check, yes.	5 6 7 8 9 10 11 12 13 14 15 16	Q.	going to argue that that's an incorrect calculation. Would you have a particular year in mind or (Discussion among Staff) I wonder if it would be better if well, I was going to ask for a record request. But I believe, to answer your question, I believe it was 2009; right? Because in 2009 you had the Home Energy Solutions Program? That would have been the last data we would have had. I'm not asking for the (By Mr. Gelineau) Well, 2009 really wouldn't have been a year in which there was Home Energy Solutions, because we began operating
6 7 8 9 10 11 12 13 14 15 16 17	in front of you? A. (By Mr. Palma) Yes. Q. And I'd like to draw your attention to the Utility Costs column. It is the third one over. Now, in particular, focusing on Home Energy Assistance Program, Home Performance with ENERGY STAR, and then the Home the ENERGY STAR Homes Program, those three, subject to check, would you agree that these programs represent about 70 percent of that cost number, the Total Residential Cost number? A. (By Mr. Palma) Subject to check, yes. Q. Okay. And these three programs are	5 6 7 8 9 10 11 12 13 14 15 16 17	Q.	going to argue that that's an incorrect calculation. Would you have a particular year in mind or (Discussion among Staff) I wonder if it would be better if well, I was going to ask for a record request. But I believe, to answer your question, I believe it was 2009; right? Because in 2009 you had the Home Energy Solutions Program? That would have been the last data we would have had. I'm not asking for the (By Mr. Gelineau) Well, 2009 really wouldn't have been a year in which there was Home Energy Solutions, because we began operating the Home Performance with ENERGY STAR
6 7 8 9 10 11 12 13 14 15 16 17 18	in front of you? A. (By Mr. Palma) Yes. Q. And I'd like to draw your attention to the Utility Costs column. It is the third one over. Now, in particular, focusing on Home Energy Assistance Program, Home Performance with ENERGY STAR, and then the Home the ENERGY STAR Homes Program, those three, subject to check, would you agree that these programs represent about 70 percent of that cost number, the Total Residential Cost number? A. (By Mr. Palma) Subject to check, yes. Q. Okay. And these three programs are fuel-neutral programs; is that correct?	5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q.	going to argue that that's an incorrect calculation. Would you have a particular year in mind or (Discussion among Staff) I wonder if it would be better if well, I was going to ask for a record request. But I believe, to answer your question, I believe it was 2009; right? Because in 2009 you had the Home Energy Solutions Program? That would have been the last data we would have had. I'm not asking for the (By Mr. Gelineau) Well, 2009 really wouldn't have been a year in which there was Home Energy Solutions, because we began operating the Home Performance with ENERGY STAR Program in June of that year. So that would
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	in front of you? A. (By Mr. Palma) Yes. Q. And I'd like to draw your attention to the Utility Costs column. It is the third one over. Now, in particular, focusing on Home Energy Assistance Program, Home Performance with ENERGY STAR, and then the Home the ENERGY STAR Homes Program, those three, subject to check, would you agree that these programs represent about 70 percent of that cost number, the Total Residential Cost number? A. (By Mr. Palma) Subject to check, yes. Q. Okay. And these three programs are fuel-neutral programs; is that correct? A. (By Mr. Gelineau) That's correct.	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q.	going to argue that that's an incorrect calculation. Would you have a particular year in mind or (Discussion among Staff) I wonder if it would be better if well, I was going to ask for a record request. But I believe, to answer your question, I believe it was 2009; right? Because in 2009 you had the Home Energy Solutions Program? That would have been the last data we would have had. I'm not asking for the (By Mr. Gelineau) Well, 2009 really wouldn't have been a year in which there was Home Energy Solutions, because we began operating the Home Performance with ENERGY STAR Program in June of that year. So that would be a mixed year, if you will.
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	in front of you? A. (By Mr. Palma) Yes. Q. And I'd like to draw your attention to the Utility Costs column. It is the third one over. Now, in particular, focusing on Home Energy Assistance Program, Home Performance with ENERGY STAR, and then the Home the ENERGY STAR Homes Program, those three, subject to check, would you agree that these programs represent about 70 percent of that cost number, the Total Residential Cost number? A. (By Mr. Palma) Subject to check, yes. Q. Okay. And these three programs are fuel-neutral programs; is that correct? A. (By Mr. Gelineau) That's correct. Q. Now I'm going to ask a question about the,	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q.	going to argue that that's an incorrect calculation. Would you have a particular year in mind or (Discussion among Staff) I wonder if it would be better if well, I was going to ask for a record request. But I believe, to answer your question, I believe it was 2009; right? Because in 2009 you had the Home Energy Solutions Program? That would have been the last data we would have had. I'm not asking for the (By Mr. Gelineau) Well, 2009 really wouldn't have been a year in which there was Home Energy Solutions, because we began operating the Home Performance with ENERGY STAR Program in June of that year. So that would be a mixed year, if you will. Okay. Let me ask this way: Would you agree
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	in front of you? A. (By Mr. Palma) Yes. Q. And I'd like to draw your attention to the Utility Costs column. It is the third one over. Now, in particular, focusing on Home Energy Assistance Program, Home Performance with ENERGY STAR, and then the Home the ENERGY STAR Homes Program, those three, subject to check, would you agree that these programs represent about 70 percent of that cost number, the Total Residential Cost number? A. (By Mr. Palma) Subject to check, yes. Q. Okay. And these three programs are fuel-neutral programs; is that correct? A. (By Mr. Gelineau) That's correct. Q. Now I'm going to ask a question about the, oh, gosh, the HES Program, Home Energy	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q.	going to argue that that's an incorrect calculation. Would you have a particular year in mind or (Discussion among Staff) I wonder if it would be better if well, I was going to ask for a record request. But I believe, to answer your question, I believe it was 2009; right? Because in 2009 you had the Home Energy Solutions Program? That would have been the last data we would have had. I'm not asking for the (By Mr. Gelineau) Well, 2009 really wouldn't have been a year in which there was Home Energy Solutions, because we began operating the Home Performance with ENERGY STAR Program in June of that year. So that would be a mixed year, if you will. Okay. Let me ask this way: Would you agree that over the past handful of years, that
6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	in front of you? A. (By Mr. Palma) Yes. Q. And I'd like to draw your attention to the Utility Costs column. It is the third one over. Now, in particular, focusing on Home Energy Assistance Program, Home Performance with ENERGY STAR, and then the Home the ENERGY STAR Homes Program, those three, subject to check, would you agree that these programs represent about 70 percent of that cost number, the Total Residential Cost number? A. (By Mr. Palma) Subject to check, yes. Q. Okay. And these three programs are fuel-neutral programs; is that correct? A. (By Mr. Gelineau) That's correct. Q. Now I'm going to ask a question about the,	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q.	going to argue that that's an incorrect calculation. Would you have a particular year in mind or (Discussion among Staff) I wonder if it would be better if well, I was going to ask for a record request. But I believe, to answer your question, I believe it was 2009; right? Because in 2009 you had the Home Energy Solutions Program? That would have been the last data we would have had. I'm not asking for the (By Mr. Gelineau) Well, 2009 really wouldn't have been a year in which there was Home Energy Solutions, because we began operating the Home Performance with ENERGY STAR Program in June of that year. So that would be a mixed year, if you will. Okay. Let me ask this way: Would you agree

[WI	TNES	S PANEL: GELINEAU PALMA] Page 41	[WI	TNES	S PANEL: GELINEAU PALMA]	Page 43
1	A.	(By Mr. Gelineau) Certainly.	1		that aside.	
2	Q.	· · ·	2		But if it is utility costs, utility	
3	ζ.	of these costs that we talked about on	3		needed a budget to achieve that potentia	1
4		Page 24, the 7,053.1 number. It's these	4		around 38 million; is that correct addition	
5		costs that you are asking to be included in	5	A.	•	
6		the performance incentive calculation; is	6	11.	question, please?	,
7		that correct?	7	0	That you divide that 383 by 10, it gives	
8	A.	(By Mr. Gelineau) It would be a number	8	₹.	38 million?	
9	11.	similar to that, in all likelihood, but it's	9	A.		
10		not exactly the same. The way the	10	Q.	So, to achieve this 69 million megawatt	hour
11		performance calculation is done as of right	11	₹.	by year, you need a budget around	11041
12		now, it would use the actual expenditures as	12		38 million. That's what GDS is saying.	Is
13		opposed to the planned expenditures. So, to	13		it correct?	15
14		the extent that there is a difference, then	14	A.		
15		there would be an adjustment there.	15	11.	know yes.	
16	Q.	Fair enough. Thank you.	16	Q.	So what is the budget for residential	
17	Q٠	MS. THUNBERG: Sorry. I'm just	17	Q.	customers right now?	
18		doing a last call on questions from Staff.	18	A.	(By Mr. Gelineau) Well, 7 million.	
19		CHAIRMAN IGNATIUS: Please, take	19	Q.	So it's almost one fifth of that number?	
20		your time.	20	A.	(By Mr. Gelineau) Again, it'd be good to	2
21		CROSS-EXAMINATION (cont'd)	21	11.	know whether or not the number in the

24		unity costs. But we call let's keep	24		desire to actually lifest in energy	
16 17 18 19 20 21 22 23 24	A. Q.	not certain. I think this may be the overall cost, both customer and utility here. (By Mr. Palma) Well, just to show where it might require digging back a few pages in the study to see what the definition is of that column. Let's take a my understanding is it is utility costs. But we can let's keep	16 17 18 19 20 21 22 23 24	A.	look at all fuels. So if we fail to do that, we're going to leave a lot of electric savings on the table. We're not going to get them. (By Mr. Palma) One thing I want to point is that potential studies shows what potential exists, but it doesn't factor in the customer's ability and interest and desire to actually invest in energy	c

	DE 10-188 2011 CORE I	ELEC		
[WITNE	SS PANEL: GELINEAU PALMA] Page 45	[WI	TNES	S PANEL: GELINEAU PALMA] Page 4
1	efficiency. So there may be potential in	1		includes an adjustment to reflect that some
2	Concord to save 10 megawatt hours, and we	2		customers, despite that it's a great idea,
3	may have great programs. But without those	3		may decide not to go forward.
4	customers actually taking action, because	4		MS. THUNBERG: Thank you,
5	they want to invest in and I hate to use	5		gentlemen, for your time.
6	the term you know, granite countertops	6		CHAIRMAN IGNATIUS: Thank you
7	instead, this potential is just a	7		Commissioner Harrington, do you have
8	theoretical potential. It's not an actual	8		questions?
9	potential.	9		CMSR. HARRINGTON: Yes.
10 Q.	Doesn't it say "potentially obtainable"?	10	IN'	TERROGATORIES BY CMSR. HARRINGTON:
11 A.	(By Mr. Palma) Right. Potentially	11	Q.	Good afternoon. We will start with trying
12	obtainable if all the customers were willing	12		to just straighten out a lot of discussion
13	to chip in and pay for that measures. But	13		on this.
14	as we pointed out several times, even though	14		Going to Exhibit 33, which is the CORE
15	we've done a lot of marketing, there are a	15		Energy Efficiency Program from some years
16	lot of electric heat customers. You know,	16		ago, specifically to the 15 with a circle
17	the ability to actually bring in electric	17		around it on the bottom of the page.
18	heat customers is limited to the percentages	18	A.	(By Mr. Gelineau) We have that out.
19	we've gone through, probably five or six	19	Q.	Now, if you look at that page, under A2 it
20	times. And part of that may be they're just	20		talks about current market conditions, with
21	not interested. They have granite	21		the understanding that these are 10 years
22	countertops or they have other needs for	22		old. It says 63,700 customers have been
23	their money besides energy efficiency.	23		identified as high-use electric customers.
24	So, this is a great study that GDS did.	24		Earlier in the document, it defines that as
[WITNE:	SS PANEL: GELINEAU PALMA] Page 46	[WI	TNES	SS PANEL: GELINEAU PALMA] Page 4
1	But it's showing the potential. It doesn't	1		being someone who uses at least 30 kilowatt
2	factor in the customer's abilities.	2		hours a day, base-load consumption, during
э Q.		3		the months of May, June, September and
4	technical potential, best only; technical	4		October. So they're using 30 kilowatts a
5	potential, traditional; maximum achievable	5		day in non- heating seasons.
6	potential; maximum achievable cost-effective	6		Now, below that it also lists under 2B,
7	potential; and the last one is potentially	7		22,000 electrical heat customers have been
8	obtainable. So we are not saying that it is	8		identified. Is there overlap between those
9	the top part, which is technically	9		two numbers?
10	potential, or maximum achievable potential,	10	A.	
11	or maximum achievable cost-effective	11		understanding that there is.
12	potential. It is defined as "potentially	12	Q.	_
13	obtainable." So I understand your	13	∢.	know are high use, in that they meet the
14	explanation. Is it possible that that	14		criteria I just read, some of which may be
15	explanation doesn't apply to this particular	15		electric heat customers and some of which
16	item?	16		may not be. Would that be correct to say?
10 17 A.		17		(No verbal response)
1 <i>7 A</i> . 18	at Page 4 of that same report, your	18	Q.	Okay. So we got that at least straightened
19	characterization is correct. And in	19	Ų.	out.
	particular, it says that under the	20		Now, either way, whether they're
20 21	potentially obtainable scenario, it takes	21		let's just say if they're not electric heat
21	customer behavior into consideration, as			* *
22		22		customers, the fact that they're using that
23	well as the price. So that last scenario,	23		amount of electricity not for heat during
24	the potentially obtainable scenario,	24		the months of May, June well, maybe this

		DAY 1 - MIDAFTERNOON S DE 10-188 2011 CORE E	ESS LE(ION CTRI	ONLY - June 6, 2012 IC PROGRAMS
[WIT	NES	S PANEL: GELINEAU PALMA] Page 49	[WI7	TNES:	S PANEL: GELINEAU PALMA] Page 51
1		June they'll be using it. But most of June	1	Q.	So the best guess is 10,000, average. Gives
2		they wouldn't be. May, June, September and	2		us somewhere around 53,000 of those
3		October, they're using 30 kilowatts a day.	3		customers that have not participated. Okay.
4		That would tell me that there's a	4		I just wanted to get that issue straight,
5		substantial potential at least there for	5		'cause we spent an awful lot of time
6		some electric efficiency measures simply	6		discussing that.
7		because of the large amounts of electricity	7		Kind of moving along to a different
8		being consumed. That sound correct?	8		subject, just to kind of get some of the
9	A.	(By Mr. Gelineau) That's correct. That's	9		basics down so I make sure we're talking
10		exactly why they were on the list.	10		about the same thing, where does the money
11	Q.	So if we have the other customers that	11		come from for the I can't even pronounce
12		still even if they do have electric heat,	12		this thing H-P-W-E-S?
13		they're even using more electricity then,	13	A.	(By Mr. Gelineau) Systems benefits charge.
14		because during the non-heating season they	14	Q.	So the pilot program comes from systems
15		still meet the 30-kilowatts-a-day criteria,	15		benefits charge. And you're proposing if
16		which would make me think, in the heating	16		this new permanent more permanent program
17		season, for the people that did have	17		comes in, it would come from the systems
18		electric heat and used it, it would even be	18		benefits charge as well?
19		higher than that.	19	A.	
20	A.	· •	20	Q.	**
21	Q.	Okay. So we've established that now.	21		benefits charge revenues over the last
22		How many of these 63,700 customers have	22		couple years? Just generally. Has the
23		participated in the program to date that	23		trend been a large increase, about the same,
24		you're aware of? I mean, what would that	24		decrease?
[WIT	NES	S PANEL: GELINEAU PALMA] Page 50	[WI]	TNES:	S PANEL: GELINEAU PALMA] Page 52
1		number be now of those initial 63,700? If	1	A.	,
2		you just look back on page circle 9 there,	2		you know, overall, things are starting
3		it says only about 250 of these high-use	3		there is another component that goes into
4		customers have participated in general	4		this. It's not just the systems benefits
5		high-use, retrofit energy-efficiency	5		charge revenue. It also includes the
6		programs. That, of course, was at the time.	6		Forward Capacity Market revenue, which has
7		That's 10 years ago. Trying to find out, of	7		been going up.
8		these 63,700 customers, how many out there	8	Q.	•
9		have not participated.	9	A.	, 1
10	A.	(By Mr. Gelineau) I think a round number to	10		10 percent now, something like that.
11		use would probably be about 1,000 customers	11	Q.	So the Forward Capacity Market, flat on the
12	_	a year.	12		systems benefits charge, but increases on
13	Q.	So that would be 10,000 customers probably	13		the Forward Capacity Market.
14		have participated?	14	A.	(By Mr. Gelineau) We're about \$21 million
15	A.	(By Mr. Gelineau) Something like that, yeah.	15	_	overall right now.
16		And I think it's also fair to say that	16	Q.	Now, if this program, this how is it
17		customers are going to drop off of that for	17		pronounced again?
18		other reasons other than participation in	18	A.	Home Performance with ENERGY STAR.
4 0		the macanam mentionlends there have		, \	4 Ninnen - 19114 -4 - 14 In 4 In a 11 13 437 12 67

the program, particularly those that have Q. Okay. I'll just stick with the H-P-W-E-S 19 19 then. Those funds come out of the systems 20 electric heat. 20 benefits charge. Right now there's no plans

21 Q. But you could also add some of those ones, the ones for non-electric heat. You might 22

add some. 23

24 A. (By Mr. Gelineau) Possibly, yes.

to increase the systems benefits charge. So

21

1		all of those.	1		their own money yet to put in
2	A.	(By Mr. Gelineau) We have that situation	2		energy-efficiency measures, as compared to
3		today. And quite frankly, we are looking at	3		the person who went out and spent money and
4		trying to start a marketing campaign. We	4		bought new windows and maybe a more
5		don't customers are not banging down the	5		efficient furnace or put in insulation, so
6		door to get this stuff. And I think that	6		that their consumption of fuel was lower, as
7		we I think that the Commissioners may be	7		compared to the neighbor across street who
8		aware that there's a companion program that	8		didn't. The first house who spent their own
9		we just started with the Better Buildings	9		money, your little formula would say too
10		Program, which is giving which is putting	10		bad, you don't qualify; whereas, the person
11		additional money into this particular	11		who chose not to spend their own money would
12		program. And that is going to allow us to	12		qualify; is that correct?
13		do some extra homes. And our concern right	13	A.	(By Mr. Gelineau) Presumably if they got a
14		now is not that we have too many customers,	14	11.	good deal on the first house, that's
15		but can we get everybody that we have monies	15		absolutely true.
16		available for. So we are definitely going	16	Q.	So we got through that part. Let me see.
17		to be doing some marketing to reach out to	17	Q.	Well, let's go over this, because this
18		those customers and bring them in.	18		was something you sort of brought up when
19		There is another thing here going on,	19		you talked about DR in the Forward Capacity
20		and that is that this is a program of	20		Market. So you kind of look at I'm just
21		self-selection. In order to participate in	21		trying to get an idea on where we go with
22		the program, customers need to have this	22		the limits of this program. Now, I've heard
23		gas-gauge home heating index that says that	23		you say it would apply to all customers.
24		they have sufficient opportunity within	24		And this, again, either one of you answer as
2.1		they have sufficient opportunity within	21		Third this, again, ertiler one of you this wer as
[WIT	NES	S PANEL: GELINEAU PALMA] Page 58	[WI]	TNES:	S PANEL: GELINEAU[PALMA] Page 60
1		their home to be able to justify our	1		appropriate, please.
2		visiting and doing an audit. And so that is	2		So let's say there was a residence that
3		a process that they need to go through.	3		had received, from one of the various
4		They can either do it online themselves or	4		programs, grants to put in either a solar or
5		call us, and we'll help them through the	5		wind project, and they had been doing net
6		process. But we need to have some data from	6		metering, and they had little net electric
7		them that will allow us to determine that	7		consumption. So they were effectively
8		they are in fact qualified or that the	8		paying very, very little systems benefits
9		potential exists at their particular	9		charge because their electric bill was
10		residence to make it worthwhile to go out	10		extremely small because of this net metered
11		there and work with them.	11		solar or wind project. Would they be
12	Q.	And that potential in the short term is	12		eligible under your proposal?
13	-	basically how much do you how much fuel	13	A.	
14		do you consume, converted to Btus, divided	14	Q.	And let's go to the further extreme. Let's
15		by the square footage of your house.	15	-	say their net meter was so effective, they
16	A.	(By Mr. Gelineau) That's correct. That's	16		consumed absolutely no electricity. Would
17		the starting point. And we also do require	17		they still be eligible?
18		that we have billing data, so that we know	18	A.	Under the current proposal, yes.
19		that they actually some verification, so	19	Q.	Okay. One more step. Their house doesn't
20		when they say they use 2,000 gallons of oil,	20	-	have electric service to them at all, but
21		we'd like to, you know, validate that that	21		they burn fuel. They for whatever
22		in fact is true.	22		reason, they decide to live in the woods and
	Q.	Okay. So, I mean, to some extent then, this	23		they burn have a wood-burning stove and

is targeting the people that haven't spent

24

propane lights. They would qualify -- let's

24

[WIT	NES	S PANEL: GELINEAU PALMA] Page 69			S PANEL: GELINEAU PALMA] Page 71
1		customers. And I think maybe I got this	1		8500 customers. We had exactly 4-1/2
2		number wrong. You talked, again, around	2		percent that have actually participated in
3		5500 people or customers who are involved,	3		the program in the calendar years 2010,
4		and the participation level was extremely	4		2011. So, both of those numbers and that
5		low, even though you apparently had pretty	5		reflects the electric heat participants.
6		much direct contact with every one of them.	6		The other participants, the other
7		So it wasn't like you had an ad on	7		96 percent, were other fuels.
8		Channel 9, "If you got electric heat, give	8		So, if your question is why do we
9		us a call." You actually sent them	9		expect additional will participate, I mean,
10		something in the mail or whatever? I assume	10		it's I'm not sure that more electric heat
11		that doesn't work or	11		customers will participate.
	A.	(By Mr. Gelineau) Eighty-five hundred	12	Q.	Well, let me clarify my question, and maybe
13	,	customers received direct mail from us,	13	₹.	I can target it and make it a little bit
14		along with a brochure asking for their	14		clearer. It was probably kind of ambiguous.
15		participation.	15		I apologize.
16	Q.	And yet, you said that a very small number	16		When you had this basically around the
17	Ψ.	of those actually participated; is that	17		same amount of money targeted at a much
18		correct?	18		smaller population, just the electric heat
	Α	I tried not to use I think I said	19		users, I'm assuming and correct me if I'm
20		4 percent. The number is 396, I believe.	20		wrong that there was more money per
21	\circ	That's a very small number, I think.	21		resident available at that time?
	A.	(By Mr. Gelineau) Okay. I tried not to	22	A.	
23	11.	characterize it.	23	11.	about the there's been some changes that
	Q.		24		made comparisons difficult, and Mr. Palma's
	Ψ.				
[WIT	NES	S PANEL: GELINEAU PALMA] Page 70	[WI	TNES	S PANEL: GELINEAU PALMA] Page 72
1		Well, given that, why do you expect	1		pointing that out. But the overall spending
2		that there would be a much higher	2		has been reasonably it's gone up a little
3		participation and maybe you don't. Maybe	3		bit, but it's been reasonably constant.
4		that's all you expect. But it would seem to	4		What's changed is the amount that might be
5		me, with you're talking about people that	5		contributed by the utility. That has gone
6		have pretty high heating bills if they're	6		down. We had been providing 75 percent of
7		using electric heat. So now we're moving	7		the funds towards the completion of these
8		across to people who have probably pretty	8		programs, and we're currently at 50 percent.
9		much the same I don't know the exact	9	Q.	
10		numbers now. Maybe it's just a little	10	-	mean ratepayers or the actual stockholders?
11		cheaper for oil. But it's in the ballpark.	11	A.	
12		If you go to oil customers, there's been a	12	A.	(By Mr. Gelineau) I mean the systems
13		number of years of tax rebates, where people	13		benefits charge
14		could buy insulation or windows or whatever	14	Q.	So, the ratepayers.
15		and get a tax break on those. So why would	15	A.	~ *
16		you think that now, just because you're not	16		50 percent right now to the cost of that
17		using electric heating customers, why would	17		program. You had kind of indicated, well,
18		you anticipate anything higher than	18		what happens if the demand you seemed to
19		4 percent? Or maybe you're not.	19		be looking at what happens if demand goes
20	A.	(By Mr. Gelineau) Four percent of the total	20		up. Well, one of the things that has
21		number of customers okay. We have this	21		happened is that the rebate goes down. And
22		number 4 percent comes up in a couple	22		we have that as a going-forward way of
2.2		places. In one place A percent west the	2.2		trying to deal with additional austamore

places. In one place, 4 percent was the

response rate from our direct mailing for

4 5 6 7 8 9	Q.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So	2 3 4 5 6 7 8 9	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective,
4 5 6 7 8 9 10	Q.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years	2 3 4 5 6 7 8 9 10	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be
4 5 6 7 8 9 10 11	Q.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable	2 3 4 5 6 7 8 9 10 11	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular
4 5 6 7 8 9 10 11 12 13	Q.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our	2 3 4 5 6 7 8 9 10 11 12	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562
4 5 6 7 8 9 10 11 12 13	Q.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we	2 3 4 5 6 7 8 9 10 11 12 13	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We
4 5 6 7 8 9 10 11 12 13 14	Q.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric
4 5 6 7 8 9 10 11 12 13 14 15	Q.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric heat. I think there's some 200-some that
4 5 6 7 8 9 10 11 12 13 14 15 16	Q. A.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally think there's less than 100 that actually	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric heat. I think there's some 200-some that are oil heat. There's another there's
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. A.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally think there's less than 100 that actually That actually uses	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric heat. I think there's some 200-some that are oil heat. There's another there's one that's kerosene. These are all
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. A.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally think there's less than 100 that actually That actually uses (By Mr. Palma) would actually qualify for	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric heat. I think there's some 200-some that are oil heat. There's another there's one that's kerosene. These are all projections. But I mean this is what we
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. A.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally think there's less than 100 that actually That actually uses (By Mr. Palma) would actually qualify for the program. And there's probably half or	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric heat. I think there's some 200-some that are oil heat. There's another there's one that's kerosene. These are all projections. But I mean this is what we projected in our plan. And the actual
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q. A.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally think there's less than 100 that actually That actually uses (By Mr. Palma) would actually qualify for the program. And there's probably half or less than that that would actually even pick	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21		even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric heat. I think there's some 200-some that are oil heat. There's another there's one that's kerosene. These are all projections. But I mean this is what we projected in our plan. And the actual results may vary, but
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. A.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally think there's less than 100 that actually That actually uses (By Mr. Palma) would actually qualify for the program. And there's probably half or less than that that would actually even pick up the phone and call us to want to do	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Q.	even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric heat. I think there's some 200-some that are oil heat. There's another there's one that's kerosene. These are all projections. But I mean this is what we projected in our plan. And the actual results may vary, but And is part of the reason for the expansion
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. A.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally think there's less than 100 that actually That actually uses (By Mr. Palma) would actually qualify for the program. And there's probably half or less than that that would actually even pick up the phone and call us to want to do something. So you're down to maybe a third,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23		even though you don't anticipate a percentage of the other fuel people being much higher than the electric heat people do, the number of them is big enough so that you'll increase your potential population; is that correct? (By Mr. Gelineau) I'm afraid that there's a confusion with this 4 percent. Four percent doesn't mean anything, from my perspective, other than the fact that that happened to be the response rate from a particular offering. Again, we're trying to have 562 customers sign up for the program. We expect that five of them will be electric heat. I think there's some 200-some that are oil heat. There's another there's one that's kerosene. These are all projections. But I mean this is what we projected in our plan. And the actual results may vary, but And is part of the reason for the expansion to other fuels, then, the fact that you
4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. A.	disappears. But I mean the program and everything about it is consistent. (By Mr. Palma) For Unitil, we have approximately 60,000 residential customers. And if 4 percent is the magic number, we'd be looking at 2400 all fuel customers. Twenty-four hundred. (By Mr. Palma) Twenty-four hundred. And we'd do something like 60 units a year. So that's several you know, that's 40 years of customers, which would make a sustainable program versus you know, in my in our calculations, I think we came out with we think there's 800 electric heat customers. When I look at the numbers, I personally think there's less than 100 that actually That actually uses (By Mr. Palma) would actually qualify for the program. 1		any other market that's willing to pay you	1	A.	(By Mr. Gelineau) What we're saying is that
2		for it right now; is that correct?	2	л.	it's likely that we would have to find some
3	A.	(By Mr. Gelineau) That's correct. But the	3		other program or some other way to
	л.	point that we're trying to also bring forth	4		effectively use the systems benefits charge
4		is that, unless you seek those other			funds. If we are only weatherizing electric
5			5		·
6		savings, you're going to leave a lot of	6		homes, it's likely that we won't be able to
7	0	electric savings on the table as well.	7		weatherize any homes. We'll have to do
8	Q.	Okay. Fair enough. And the last one I wanted to mention on that same line is we	8		something else, likely. I don't want to say
9			9		categorically we're at this point. But I
10		have I don't know if you're familiar with	10		think it's fair to say that if you don't do
11		this, you may not be the electrical	11		the weatherization, the program won't be
12		savings that we're getting from the	12		cost-effective. And if it's not
13		energy-efficiency programs have recently	13		cost-effective, then what are you going to
14		been incorporated into the transmission	14		do? And I think we are struggling with this
15		planning process in New England. In fact,	15		issue in not only this arena, but if you
16		they have been put into the Vermont-New	16		look at lighting, lighting is another area
17		Hampshire 10-year needs assessment. And the	17		where that has been the cash cow, if you
18		result is just for Vermont-New Hampshire,	18		will, for energy-efficiency programs. It's
19		over the next 20 years there's about a	19		got the best benefit cost ratio
20		\$200-plus million savings in either deferred	20		traditionally. And it's the place that
21		or completely eliminated transmission	21		we're able to make the most savings for the
22		building.	22		least dollars. But there, again, the
23		Now, again, electrical energy savings	23		lighting world is turning upside down with
24		will add to that. But no matter how much we	24		the changes in standards. We anticipate
1	INES	S PANEL: GELINEAU PALMA] Page 82 save on oil and wood, or whatever you use to	1	INES	S PANEL: GELINEAU PALMA] Page 84 that it's going to it may be difficult to
2		heat your house with besides electricity,	2		justify providing continued rebates for some
3		it's not going to have any effect on	3		of the lighting products.
4		transmission planning, say, because	4		Now, at the same time that the CFL and
5	A.	(By Mr. Gelineau) That's certainly true.	5		incandescent battle is being waged, LED
6		But I think that and this is certainly a	6		lights are coming in. Their prices are
7		policy question there are other benefits	7		dropping. So it's a market that's in great
8		for these other fuels being saved.	8		flux. We're watching it closely. But it is
9	Q.	I understand that. Right.	9		a concern that we have that. You know, the
10	A.	(By Mr. Gelineau) Okay. So it's not a zero	10		thing that has provided the big savings in
11		sum gain. I mean, there are other savings	11		the past for the low dollars is another area
12		in other arenas. Now, whether or not that's	12		that is in flux. And we're looking for
13		appropriate, that's beyond my why I'm	13		things that, you know, we can use and do
14		here.	14		cost-effectively that are going to be of
15	Q.	And I am coming to an end here. I'm trying	15		benefit to customers.
16		to get where you're heading on this thing.	16	Q.	And just on that issue, the residential
17		Would I be correct in heading down this	17		portion of this, is there a fixed ratio
18		direction: What you're saying is that,	18		that's required in your I mean, I know
19		given the restraints on the present program	19		you have those categories that we've seen on
20		to limit the residential portion to just to	20		the charts here. How do those come up? The
21		electric heat, that you could not find	21		residential, commercial, industrial, you
22		enough other potential savings to use the	22		know, is that
23		money on if it's not expanded to allow this	23	A.	· •
24		fuel-neutral program?	24		traditionally is to try to provide funding

1	for programs in proportion to the	1		electric heat customer and I decide I want	
2	contributions to the systems benefits charge	2		to go ahead, do I get preference? Do I get	
3	of residential and C & I customers. That	3		to go the front of the line? Or is it	
4	proportion is worked out after the	4		merely most likely my scoring would indicat	te
5	low-income program has been funded by both	5		that I would qualify? How do we work that	
6	C & I and residential customers. And right	6		out?	
7	now, just for sake of numbers, it's close to	7	A.	(By Mr. Gelineau) Right now, it's first	
8	the 50/50. It's probably 49/51 residential/	8		come, first serve. We're serving everybody	
9	C & I in terms of the overall split.	9		that comes. It hasn't been an issue in	
10	Q. But if, let's say, for example, because	10		terms of trying to prioritize somebody.	
11	there was a it was becoming more	11		They're all you know, it's first come,	
12	difficult to find cost-effective	12		first serve.	
13	energy-efficiency measures in residential	13	Q.	And is my presumption correct, that the	
14	houses, if more additional money was	14		electric heat customer, I'd probably get	
15	transferred to commercial and industrial, if	15		there would be less doubt that I would be	
16	that were done, the residential customer	16		able to qualify and meet the criteria? Is	
17	would still see the savings advantage	17		that correct?	
18	through the lower LMPs, the additional DR	18	A.	(By Mr. Palma) Depends on your usage and	
19	going to the FCA, and the lower transmission	19		your square footage, basically. You know,	
20	costs in the future; is that correct?	20		if you called in October, and for some	
21	A. (By Mr. Gelineau) That would be correct.	21		reason we were actually subscribed for the	
22	And I think that the issue that would need	22		year, we would just ask you to wait until	
23	to be considered is 374-F, which has a	23		January. So, ultimately, everybody that	
24	section I think it's Section VI that	24		wants to get served gets served. They just	
	TNESS PANEL: GELINEAU PALMA] Page 86		ΓNES	<u> </u>	e 88
1	addresses the idea that the monies from the	1	0	may have to wait a few months, that's all.	
2	systems benefits charge need to be provided	2	Q.	Okay. And again, this is all traveled	
3	and distributed in an equitable way to all customers. And we traditionally interpreted	3		ground from today. We've talked at some	
4	that as trying to provide a proportional	4		length you've talked at some length regarding the viability of having a	
5	benefit or proportional funding for	5		weatherization program without going	
6	residential programs and C & I programs	6 7		fuel-neutral, and that the benefits in	
8	based on the amount contributed by each of	8		fact, you mentioned the GDS study, if I	
9	those customer classes, if that makes sense.	9		remember correctly to get some of the	
10	Q. Thanks very much, gentlemen. Appreciate	10		remaining electric reductions, you really	
11	your answers.	11		need to go down the fuel-neutral road. Is	
12	A. (By Mr. Palma) Sure.	12		that a correct statement?	
13	CHAIRMAN IGNATIUS: Commissioner	13	A.	(By Mr. Palma) That's the recommendation i	in
14	Scott.	14		the GDS study. And that is our experience	
15	INTERROGATORIES BY CMSR. SCOTT:	15		right now, in terms of being able to	
16	Q. Good afternoon. And thank you. It's been a	16		cost-effectively serve customers with a	
17	long day, I'm sure, for you both. You've	17		program like this.	
18	been up there for a while.	18	Q.	I was wondering if you can elaborate more o	n
19	On the program design itself, obviously	19	_	how they is it to get the customer in the	
20	we've heard it in quite some length, the	20		door you need the fuel-neutral? Is it the	
21	electric the pool of electric heat	21		fact that when you're looking at them and	
22	customers who haven't taken advantage of the	22		you're in the door, you see things?	
23	program yet.	23	A.	(By Mr. Gelineau) If you're going to have an	ı
24	In the current construct, if I am an	24		energy savings program, you need to save

1		energy. The big-ticket item in the home is	1		So they are doing those. This is a
2		the fuel for heating. And if you don't	2		supplement to that. And it is a there's
3		if you ignore that piece, there's just not	3		a certain closure that you get by doing it
4		enough energy savings there to capture. And	4		in this way. You have people that
5		so from a cost benefit standpoint, it really	5		professionals who are going into the home
6		doesn't either electric heat or heating	6		and making sure that the lights do get
7		with another fuel provides a sufficient	7		changed. They just don't buy them and stick
8		benefit at a cost that makes it very	8		them on a shelf, for example. So the lights
9		worthwhile to go in and do the work from a	9		that are purchased under this program are
10		cost benefit standpoint. Without that	10		actually installed. And that's one of the
11		piece, your the amount of savings that	11		things that was noted in the Cadmus review,
12		you can achieve by changing out lightbulbs	12		for example, that we really needed to make
13		in a home, for example, and putting in a	13		sure that our auditors were not just
14		better refrigerator, there's just not enough	14		bringing and dropping off bulbs, but they're
15		energy savings there to justify going out to	15		actually installing those bulbs, so that
16		the home, working with a customer to make	16		they're actually doing the job.
17		those savings. You're better off looking	17	Q.	And the mechanics, again, in the program
18		at, you know, providing them with a catalog,	18	•	I've signed up for the program, and I want
19		telling them to go to Home Depot and buy	19		my oil burner changed to be more efficient,
20		some lights. It's just the home delivery	20		let's say. Can I then elect not to have my
21		part of this is just too expensive to do if	21		whatever electrical component that's
22		you're not doing the weatherization.	22		identified not done?
23	Q.	So if I could paraphrase and again, I'm	23	Α.	(By Mr. Palma) You'd have to have the

		DAY 1 - MIDAFTERNOON S DE 10-188 2011 CORE I	ELE(CTR	IC PROGRAMS	
[WI	TNES	S PANEL: GELINEAU PALMA] Page 93	_		S PANEL: GELINEAU PALMA]	Page 95
1		designed the program so that it allows them	1		load from AC. I know intuitively we kn	now
2		to participate in the program and get	2		that. I was just curious if you had any	
3		advantage of the rebate associated with that	3		data.	
4		new oil system. And we would continue to	4	A.	(By Mr. Gelineau) The data that we have	e is
5		work with them to try and get them to do the	5		limited to what's in the GDS study. As	
6		insulation measures. But if they have a	6		indicated before, they have indicated th	
7		failed burner, you know, you're going to	7		for a fossil home, it's in the order of	
8		that's an emergency. You're going to	8		magnitude of 1050 kilowatts annually	
9		address that first. And so, rather than	9		associated with a home that has central	air
10		having them buy a standard efficiency, we're	10		conditioning. That's the overall electric	
11		going to try and get them to upgrade.	11		savings that one might achieve. But	
12	Q.	Okay.	12		that's and that would be for a home th	nat
13	A.	(By Mr. Palma) Just to quote or paraphrase	13		is the specific wording, as far as	
14		the GDS study, they there is a statement	14		how that that's the good, out of the	
15		in the study suggesting that replacing	15		good, better, best scenario. And if I	
16		heating equipment does lead to significant	16		remember correctly, the best scenario v	vould
17		savings. So, in some houses, replacing the	17		save you on the order of 3,000 kilowatt	
18		heating equipment may be the best measure.	18		hours. So there's a range. And I would	say
19	Q.	But hopefully an auditor would	19		that the better is only a couple hundred.	
20	A.	(By Mr. Palma) Right. We always send an	20		It's more like 1250. It's not in the midd	le
21		auditor out. And if they see a failed or	21		between 1050 and 3,000. It's more like	
22		failing piece of heating equipment and	22		1250. So that's the kind of range that	
23		there's insulation if we were to analyze	23		they're looking at. And typically what	
24		every project, you might find heating	24		our program is designed to be at the 12:	50

						Ü
1		equipment gives you higher savings than one of the other measures. It doesn't mean we	1		level, if you will. And those are the that does not include changing out any	of
2		don't want them to do all three. It's just	2		the circulating pumps or fans to	OI
3		that may be the best bang for that person's	3		high-efficiency units, okay. That's just	
5		buck right there.	4		doing the weatherization units, and that	
	0	And thinking out loud, I guess I'm wondering	5		would include a home that had central a	
7	Q.	with the existing program if there's a way	6 7	Q.	And on that front, I presume there's,	aii.
		to obviously there's some fuel-neutral	8	Q.	obviously for cost reasons, a lot more	
8		part that would get people in the door more	9		people with window air conditioners th	on
10		readily. Is there a way to steer them	10		central air. Do you have some kind of	
11		towards the electric side as a if you're	11		guess on the percentage of your custom	-
12		going to do that, you also have to do this?	12		that have air conditioning of some sort?	
13		But that's something to think about.	13	A.	(By Mr. Gelineau) I have when we di	
14		So, moving forward on a lot of	14	11.	study to look at the heating customers,	
15		discussion again this morning regarding	15		also looked at those that had a bump in	
16		electric heat users. And I know it's been	16		summertime. So I've got and I don't	
17		in the different reading we've had here with	17		it with me, but I think that we do have t	
18		the docket. Clearly, if you do	18		numbers of customers who would be	
19		weatherization, there's a benefit for	19		show increased usage during the summ	
20		cooling also. And, obviously, I'm not	20		There again, I can't say whether it's	-1011110.
21		saying anything people don't know already.	21		central air or window air, or whether or	not
22		The cooling demand in the summer is a	22		they have a big pool and pool filter. I	1100
23		significant issue also. I was curious if we	23		just can say they show more usage in the	ne
24		had any data on the impact of reducing the	24		summertime. And our intent in trying t	
47		mad any data on the impact of feducing the	44		banning time. This our mitche in a ying t	.o uo

		DAY 1 - MIDAFTERNOON S DE 10-188 2011 CORE E	ESS LEC	ION CTR	ONLY - June 6, 2012 IC PROGRAMS
[WI	TNES	S PANEL: GELINEAU PALMA] Page 97			S PANEL: GELINEAU PALMA] Page 99
1		that was to be able to capture and identify	1		number that was reflective of their
2		those customers while we were into the data	2		estimate, as far as what the savings would
3		base looking at that, you know, what's the	3		be for pumps and fans associated with the
4		name and address of those folks, so we could	4		furnace or boiler.
5		look to market to them as well.	5	Q.	
6	Q.	And I mentioned when I started this topic	6		And I think lastly, for me, again, on
7		about the impact on peak demand. Do you	7		the 1.4 or 1.3 percent going back to the
8		know if anybody's looking at the value of	8		electric heat customers, Staff has obviously
9		that reduction on peak demand?	9		talked about the energy the EIA data. I
10	A.	(By Mr. Gelineau) We do publish that as	10		was just curious if either one of you have
11		well. And I think that Exhibit 23, I guess,	11		experience in the past using EIA data.
12		shows what the program's value is on peak	12	A.	
13		demand. There's a column there that shows	13	A.	
14		you what the anticipated reduction on summer	14		again, I well, yes, I have used it.
15		and winter savings in kW are.	15	Q.	•
16		CHAIRMAN IGNATIUS: And	16		answer you're about to say.
17		that's Exhibit 23 was in the prior phase of	17		When you have used it, do you find that
18		this proceeding. We saw two pages brought in	18		to be more or less granular, if you will,
19		today; is that right?	19		than doing your own, talking to your own
20	A.	(By Mr. Gelineau) Yes. I'm sorry. I didn't	20		customers and surveying your own customers?
21		keep track of it, what the exhibits are.	21	A.	(By Mr. Gelineau) Certainly I feel as though
22		But I think it's 23, and it was a two-page	22		using the data we have on our own customers
23		exhibit. And this is on Page 24 and 25.	23		is far more accurate.
24	A.	(By Mr. Palma) December filing.	24		CMSR. SCOTT: Thank you very
[WI	TNES	S PANEL: GELINEAU PALMA] Page 98	[WI]	INES	S PANEL: GELINEAU PALMA] Page 100
1	Q.	That was handed out today also.	1		much.
2		(By Mr. Gelineau) Yes.	2		CHAIRMAN IGNATIUS: I have a few
3	Q.	And I think I can't remember if it's in	3		other questions, but many of them have been
4		the reading or the docket or one of your	4		addressed.
5		statements. Is it Cadmus? Is that the name	5	IN	TERROGATORIES BY CHAIRMAN IGNATIUS:
6		of the company?	6	Q.	1 5
7	A.	(By Mr. Gelineau) Cadmus, yes.	7		partway into 2009?
8	Q.	You've asked them to re-look at the impact	8	A.	` 3
9		evaluation; is that correct?	9	_	approved.
10	A.	(By Mr. Gelineau) That's correct. They	10	Q.	And so it's been in operation these last
11		found some 22.3 million Btus, on average,	11		couple of years under the term of a "pilot."
12		for the energy savings in a home. And they	12		Is there anything that's being proposed by
13		expressed all of the energy savings in	13		the companies to change in the program?
14		so-called MMBtu or thermal unit. We've	14	A.	, ,
15		asked them to take a look at that and see	15		it's been pointed out, the major change to
16		exactly what whether they've got the data	16		date has been the cut-back in the rebate
17		to break that out in any more detail as it	17		from the first two years or year and a
18	0	would relate to electric-specific savings.	18		half, when it was operating at 50 percent
19	Q.	And do you know when that might be	19		75-percent rebate, and it's been cut back to

available? Will that be publicly available?

21 A. (By Mr. Gelineau) We'll certainly make it

publicly available if we can get it. We

have from them at this point is this 42

are -- we have gotten -- the only thing we

20

22

23

(By Mr. Palma) I think if you look down the list of programs, the ENERGY STAR Homes Program is very dependent on and that's not going to actually give more electric savings, because it's also fuel-neutral. So, skipping that and moving through the appliance and lighting programs, I don't have a great sense on those two programs, you know, if those are and maybe Mr. Gelineau could actually answer that question better as to do we typically peak out and	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21		it to be a good one. Can you describe any more about what they particularly liked about the program? (By Mr. Gelineau) Some of the things that were particularly noteworthy was the fact that our program had such a high closure rate. Many programs around the country have they specialize I want to say it this way: They do a lot of audits, but they don't get nearly as many completions of the energy-efficiency measures installed. There's a big focus on audits and very and not so much on getting the actual results done. And when you look at our program, we had one vendor who was making a 93-percent conversion rate. That is for every audit they did, 93 percent of them were converted into actual jobs where they actually installed measures. That's almost unheard of. And I think that when this award was made, we were in the 80-percent
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q.	something else. Mr. Palma, you had said that it's hard to find other electric measures to turn to and that you would do them if you could find them. Could you elaborate a little more? Are there any of your programs that you think could be expanded in the residential sector for greater electric savings if monies were shifted back into those programs instead of funding the HPwES Program? (By Mr. Palma) I think if you look down the list of programs, the ENERGY STAR Homes Program is very dependent on and that's not going to actually give more electric savings, because it's also fuel-neutral. So, skipping that and moving through the appliance and lighting programs, I don't have a great sense on those two programs, you know, if those are and maybe Mr. Gelineau could actually answer that question better as to do we typically peak out and spend all the money, or do we come up short.	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22		it to be a good one. Can you describe any more about what they particularly liked about the program? (By Mr. Gelineau) Some of the things that were particularly noteworthy was the fact that our program had such a high closure rate. Many programs around the country have they specialize I want to say it this way: They do a lot of audits, but they don't get nearly as many completions of the energy-efficiency measures installed. There's a big focus on audits and very and not so much on getting the actual results done. And when you look at our program, we had one vendor who was making a 93-percent conversion rate. That is for every audit they did, 93 percent of them were converted into actual jobs where they actually installed measures. That's almost unheard of. And I think that when this award was made, we were in the 80-percent range, I guess, overall for all of our
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Q.	something else. Mr. Palma, you had said that it's hard to find other electric measures to turn to and that you would do them if you could find them. Could you elaborate a little more? Are there any of your programs that you think could be expanded in the residential sector for greater electric savings if monies were shifted back into those programs instead of funding the HPwES Program? (By Mr. Palma) I think if you look down the list of programs, the ENERGY STAR Homes Program is very dependent on and that's not going to actually give more electric savings, because it's also fuel-neutral. So, skipping that and moving through the appliance and lighting programs, I don't have a great sense on those two programs, you know, if those are and maybe Mr. Gelineau could actually answer that question better as to do we typically peak out and	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21		it to be a good one. Can you describe any more about what they particularly liked about the program? (By Mr. Gelineau) Some of the things that were particularly noteworthy was the fact that our program had such a high closure rate. Many programs around the country have they specialize I want to say it this way: They do a lot of audits, but they don't get nearly as many completions of the energy-efficiency measures installed. There's a big focus on audits and very and not so much on getting the actual results done. And when you look at our program, we had one vendor who was making a 93-percent conversion rate. That is for every audit they did, 93 percent of them were converted into actual jobs where they actually installed measures. That's almost unheard of. And I think that when this award was made, we were in the 80-percent

[WITNI	ESS PANEL: GELINEAU PALMA] Page 105	[WI	TNES	S PANEL: GELINEAU[PALMA] Page 107
1	program was comported with all the	1		measures. So there's an incentive on the
2	requirements of a national program.	2		part of the auditor to make sure that it's
3	We did some things like our home	3		not just an audit, but they have to move
4	heating index, you'll find if you jump onto	4		forward and they actually get work done.
5	some other sites, like the Maine Efficiency	5		Because they are we don't have a we
6	site, you'll see they have a little gas	6		don't have a golden audit fee. Quite
7	gauge that looks strikingly familiar, one	7		frankly, it's a minimal audit fee. And it's
8	that you might find on "New Hampshire	8		designed to make sure that auditors work
9	Saves." And so what we did was we had	9		with the customer, establish a relationship
10	something that allowed customers to	10		and use that relationship to actually
11	self-select. So they were able to come to	11		consummate a deal where they go forward and
12	us already hey, I'm a good customer. I	12		they actually get measures installed.
13	would qualify for the program. And they've	13		So I think those are some of the things
14	already gathered up the information, so that	14		that were recognized and some of the reasons
15	when we work with one of our contractors,	15		why they felt that we were successful, and
16	when they get a lead from us, they knew that	16		why they recognized the program that we had
17	there was you know, this wasn't a cold	17		put together.
18	call. This was a call to somebody that	18	Q.	Let me ask you about the performance
19	actually had potential. They were	19		incentive issue. In traditional
20	interested.	20		energy-efficiency programs with electric
21	And we knew they were interested,	21		savings measures, the theory has been an
22	because we had another thing in place,	22		incentive is appropriate because here you
23	whereby the customer was required to do a	23		are doing all this work to reduce the amount
24	co-pay. They had to put in \$100 towards	24		of sales that you can make. And that's hard
[WITNI	ESS PANEL: GELINEAU PALMA] Page 106	[WI	TNES	S PANEL: GELINEAU PALMA] Page 108
1	their audit. And this was something that	1		for a company to actively find ways to sell
2	caused a lot of consternation among the	2		its product. In this case, you've got
3	utilities. You know, do we really want to	3		measures that will reduce other people's
4	do this? But what it does is it says that	4		sales oil, propane, other heating
5	downstream, if they're actually going to	5		sources. And so, why is it appropriate for
6	install measures, they're going to have to	6		the electric utility to earn an incentive on
7	pay for, initially it was 25 percent of the	7		savings that don't relate to their sales?
8	cost, now it's 50 percent of the cost. If	8	A.	(By Mr. Gelineau) Well, let me go back a
9	they're going to have to come up with that	9		ways. And I will tell you that this
10	money, you know, putting \$100 up front gives	10		performance incentive was something that
11	us some assurance that they, A, have the	11		Public Service fought tooth and nail. We
12	money and, B, are willing to spend it, so	12		did not want a performance incentive when it
13	that they have some skin in the game. So,	13		was originally proposed.
14	again, they self-selected. We knew they	14		If you go back to that point in time,
15	were qualified. We had some skin in the	15		you'll find that there was something called
16	game, in terms of they had some money on the	16		"lost fixed cost recovery," which
17	table. So our contractors were confident	17		compensated us for those lost kilowatt
18	when they went out, they had a really good	18		hours. And frankly, we were quite happy

when they went out, they had a really good hours. And frankly, we were quite happy 18 chance of making a sale with that customer. with that approach. As a consequence of the 19 And our contractors are also set up in energy-efficiency working group and the 20 such a way so that they are paid for the negotiations that were made there, we 21 audits that they do. But they also -- their agreed, as part of our agreement, to move 22 audit fee is such that they have -- they get 23 forward with a performance incentive, with more with the audit if they actually install the understanding that it was a performance 24

I think that another thing that perhaps is not clear to everybody here, one of the challenges that we face with these programs is that in the real world you go out and market things, and you try to sell as much as you possibly can, because each additional widget that you sell, you end up with more income. And that's a good thing. In the business that we're in with this energy-efficiency program, with a limited budget, if we go out and oversell, we're going to make customers particularly unhapp because they're not going to be able to participate. So we're in a balancing act, where we're trying to make sure that we try and balance the amount of demand for the product that we have with the amount of delivery that we can actually achieve. That's fair enough. Thank you. I think that's a pretty good explanation. Thanks.	уу

[WIT	NESS PANEL: GELINEAU PALMA] Page 117			S PANEL: GELINEAU PALMA] Page 119
1	CMSR. SCOTT: Thank you.	1	Α.	(By Mr. Gelineau) Correct.
2	INTERROGATORIES BY CMSR. SCOTT:	2		And all three of those are fuel-blind
3	Q. Following up on Commissioner Harrington's	3	ζ.	programs as proposed?
4	follow-up on my question. So what I was	4	Α.	(By Mr. Gelineau) Correct.
5	trying to get at, especially with air	5		All right. Now, I think the Staff talked to
6	conditioning, there's kilowatt savings	6	₹.	you about, if you were to divide the total
7	and that's certainly important but	7		benefits into the non-electric resource
8	there's also, when we look at high-energy	8		benefits for Home Performance with ENERGY
9	demand days, there's when those savings are,	9		STAR, you came up with something like
10	to the effect that if you're given a small	10		98 percent?
11	increment on those particular high peaks,	11	A.	(By Mr. Gelineau) I believe that was true.
12	there's a much larger impact than other	12	Q.	And if you did the same calculation for the
13	times. I was curious if, you know, the	13	ζ.	other two programs, would you agree, subject
14	re-study, if you will, from is it Cadmus?	14		to check, that if you divided the total
15	A. (By Mr. Gelineau) Yes.	15		benefits of the Home Energy Assistance into
16	Q was going to look at anything like that.	16		the non-electric resource benefits, you
17	I mean, the timing is very critical of	17		would come up with 85 percent?
18	the I'm sorry?	18	Α.	(By Mr. Gelineau) Yes.
19	A. (By Mr. Gelineau) We have asked that	19		And so that means that 85 percent of the
20	specific question.	20		benefits under that program are for
21	CMSR. SCOTT: Excellent. Thank	21		non-electric measures.
22	you.	22	A.	(By Mr. Gelineau) That would appear to be
23	CHAIRMAN IGNATIUS: Thank you.	23		true, yes, from a dollar perspective.
24	Mr. Eaton, do you have	24	Q.	And for the ENERGY STAR Homes, if you
[WI]	NESS PANEL: GELINEAU PALMA] Page 118	[WI	TNES:	S PANEL: GELINEAU PALMA] Page 120
1	redirect?	1		divided the total benefits into the
2	MR. EATON: I have about two	2		non-electric resource benefits, you would
3	minutes of redirect, but I'd like to talk to	3		come up with 86 to 87 percent as the
4	the witness about that.	4		non-electric resource benefit.
5	CHAIRMAN IGNATIUS: All right.	5	A.	(By Mr. Gelineau) Subject to check, yes.
6	Let's go off the record.	6		And the Home Assistance and ENERGY STAR
7	(Discussion off the record)	7		Homes programs have been operated for longer
8	CHAIRMAN IGNATIUS: Mr. Eaton,	8		than the Home Performance with ENERGY STAR
9	do you have questions?	9		Program; correct?
10	MR. EATON: Yes, I do.	10	A.	(By Mr. Gelineau) That's correct.
11	REDIRECT EXAMINATION	11	Q.	So you know well what the electric savings
12	BY MR. EATON:	12		are and what the non-electric savings are
13	Q. Mr. Gelineau, could you look at Exhibit 23.	13		based upon experience with the program.
14	That was the two pages, 24 and 25, that were	14	A.	(By Mr. Gelineau) That's true.
15	brought in during Staff examination of the	15	Q.	And we have yet to determine what the
16	panel.	16		ancillary benefits under Home Performance
17	A. (By Mr. Gelineau) Yes, I have it in front of	17		with ENERGY STAR are for the actual savings
18	me.	18		from weatherizing a home and the resulting
19	Q. Would you look at Page 25.	19		savings from the furnace.
20	A. (By Mr. Gelineau) Yes, it's in front of me.	20	A.	(By Mr. Gelineau) Correct. And air
21	Q. And there are three programs at the top	21	_	conditioning.
22	there: Home Energy Assistance, Home	22	Q.	And we've yet to find a handle for air
23	Performance ENERGY STAR and ENERGY STAR	23		conditioning; correct?
24	Homes.	24	A.	(By Mr. Gelineau) Correct.
