Subject: docket No. 10-211

Importance: High

After reading the following article in the Nashua telegraph:

<http://www.nashuatelegraph.com/news/901574-196/603-can-stay-single-for-a-few.html>

My suggestion is to simply issue a separate New Hampshire area code for all new Cell phones. So that all cell phones (maybe older ones get grandfathered in) in New Hampshire have the same area code, and land lines remain 603. That way you will not have to make everyone change their phone numbers!~

Best Regards,

James E. Britton, CMBA
