Re: Docket No. DW 10-217, Tioga River Water Company, Inc. (Company)  
Petition for an Increase in Rates/Filing of Settlement Agreement

Dear Ms. Howland:

Staff has reached a settlement, dated today, with the Company regarding its rate filing on this docket. The Settlement Agreement and related Supporting Schedules are enclosed for the Commission's consideration. Staff notes that a hearing regarding this case is scheduled for Thursday, October 6 at 10:00 am, two weeks hence; if the Commission would require more time for pre-hearing review of this matter, please contact me for rescheduling of the hearing (in consultation with parties).

Thank you; please let me know if you have any questions.

Sincerely,

Alexander F. Speidel  
Staff Attorney

PUBLIC UTILITIES COMMISSION**

**DW 10-217**

**Tioga River Water Company, Inc.**

**Permanent Rate Filing**

**SETTLEMENT AGREEMENT**

**I. INTRODUCTION**

This agreement is entered into this twenty-second day of September, 2011, between Tioga River Water Company, Inc. (Tioga or Company) and the Staff of the New Hampshire Public Utilities Commission (Staff) (collectively the settling parties) with the intent of resolving certain issues, more fully described below, in the above captioned proceeding.

**II. PROCEDURAL BACKGROUND**

On August 16, 2010, Tioga River Water Company, Inc., a water utility serving approximately 22 customers in its Tioga Division in the Town of Belmont and approximately 38 customers in its Gilford Village Water District (GVWD) Division in the Town of Gilford, filed a notice of intent to file rate schedules along with a request for waiver from certain filing requirements contained in N.H. Code Admin. R. Puc 1604.01. On October 15, 2011, Tioga filed revised tariff pages along with supporting testimony and exhibits for an increase in revenues for its Tioga Division of \$13,335, or 127.12%, annually, and an increase in revenues in its GVWD Division of \$19,295, or 147.05%, annually. The Company used a test year ending October 31, 2009 in making its determinations. The Company proposed that the new permanent rates should be made effective on January 1, 2011.

On November 15, 2010 the Commission issued Order No. 25,169 suspending the revised tariff pages as well as granting the Company's waiver request pursuant to Puc 201.05. The order also scheduled a prehearing conference and technical session for December 14, 2010 and ordered the Company to provide a copy of the order to all its customers. The prehearing conference was held as scheduled, with appearances entered by Tioga, Staff and the Tioga Drive Homeowners which made a motion to intervene in this proceeding. That motion was granted by the Commission during the prehearing conference. The Office of Consumer Advocate did not participate in the case. Subsequent to the prehearing conference, the parties met in a technical session to devise a procedural schedule and discuss the rate filing. On behalf of the Staff and the parties, Staff filed a proposed procedural schedule with the Commission on December 21, 2010 which was approved by secretarial letter dated December 28, 2010.

On April 19, 2011, Staff filed correspondence with the Commission requesting a temporary suspension in the procedural schedule until June 10, 2011. Staff cited as the reason for its request the Company's continued non-compliance with Commission requirements relative to its record keeping for fixed plant. This issue came to light during the discovery phase of the proceeding and Staff indicated that a suspension of the procedural schedule was necessary in order to allow Tioga sufficient time to rectify its recordkeeping deficiencies. Staff stated that the Company and all interveners were in agreement with Staff's request. On April 25, 2011, the Commission granted Staff's request by secretarial letter. On June 15, 2011, Staff requested an extension of the suspension of the procedural schedule until July 15, 2011 citing that more time was necessary for Tioga to improve its plant records. On June 21, 2011, a secretarial letter was issued granting Staff's request for further extension of the procedural schedule suspension.

On July 7, 2011, Staff submitted correspondence to the Commission stating that Tioga's plant recordkeeping compliance issues had been rectified to Staff's satisfaction. Staff also submitted a revised procedural schedule for the purpose of resuming the case. The Commission approved the revised procedural schedule in a secretarial letter issued on July 11, 2011. On August 18, 2011, the Company, Staff and the Tioga Drive Homeowners met in a technical session which also included discussions towards a possible settlement of the case.

### **III. TERMS OF AGREEMENT**

Tioga and Staff have reached agreement on all issues and submit the following terms of settlement for the Commission's consideration.

#### **A. Revenue Requirement**

##### **1. Tioga Division**

Tioga and Staff agree that the Tioga Division should be permitted an overall increase in its rates in order to have the opportunity to earn an annual revenue requirement of \$20,769 which represents a 97.98% increase over the Tioga Division's test year operating revenues. This overall increase in the Tioga Division's operating revenues are illustrated on Attachment A to this Settlement Agreement and consists of a permanent increase based upon the test year as well as a step increase based on certain 2010 plant additions.

##### **a. Permanent Increase**

Attachment A, Schedule 1 illustrates the calculation of the permanent increase portion of the Tioga Division's revenue requirement. The permanent increase portion of the Tioga Division's revenue requirement is \$12,822 which represents a \$2,332, or 22.23%, increase over adjusted test year water revenues of \$10,490. Tioga and Staff agree that certain rate base and test year adjustments are appropriate and should be

included in calculating the revenue requirement shown above. These adjustments are shown on Attachment A, Schedules 2a and 3a. Tioga and Staff agree that the test year rate base for the Tioga Division should be \$27,058 as shown on Attachment A, Schedule 2. Tioga and Staff agree that the rate of return to be applied to the Tioga Division's rate base should be 6.00% which is based on the Company's debt directly attributable to the Tioga Division as indicated on Attachment A, Schedule 1a. The Company and Staff agree that for purposes of computing its capital structure as of 10/31/09, the Company's equity component is a negative \$15,131 and does not factor into the determination of a rate of return for the Tioga Division.

**b. Step Increase**

Attachment A, Schedule 4 illustrates the step increase portion of the Tioga Division's revenue requirement. The step increase portion of the Tioga Division's revenue requirement is \$7,947, representing an additional 75.75% increase over the Tioga Division's adjusted test year water revenues. The basis for this step increase is a new pump station completed in 2010 which serves the Tioga Division. The cost of the new pump station is \$134,084 and was mostly financed by a state revolving fund (SRF) loan administered by the New Hampshire Department of Environmental Services (NHDES). Tioga was also approved for a grant which will result in the forgiveness of 50% of the principal balance of the SRF borrowing. The SRF loan was previously considered by the Commission in docket DW 09-117 and was approved in Order No. 24,988 issued on July 23, 2009. Tioga also borrowed \$3,580 in 2010 from its affiliate, Gilford Well Company, in order to finance engineering work associated with the Tioga Division project.

Tioga and Staff agree that the new construction and the associated financing arrangement will increase the Tioga Division's rate base by \$70,166 as illustrated on Attachment A, Schedule 4. The rate of return, calculated on Attachment A, Schedule 4c, that is applied to the additional rate base is 3.221% which is based on the total annual cost of debt related to the Tioga Division's borrowings towards this project. Tioga and Staff agree that the application of this rate of return will increase the Tioga Division's net operating income requirement by \$2,260 (See Attachment A, Schedule 4). In addition, Tioga and Staff agree that the new plant in service will increase the Tioga Division's annual operating expenses by \$5,687 through increased depreciation expense and property taxes (See Attachment A, Schedules 4a and 4b).

As of the date of this agreement, an audit of the new plant placed in service during 2010 has not been completed by the Commission Audit Staff. It is anticipated that this examination will be completed in the near future and a report will be issued by the Audit Staff. In addition, the final documentation for the SRF loan has not yet been completed. The Company, however, has been informed of the anticipated terms associated with this loan including repayment term and interest rate. If the Audit Staff's report or the final documentation for the SRF loan reveal any material discrepancies in the amounts presented in the schedules to this Settlement Agreement, Staff will notify the Commission of these as well as the resulting impact on proposed customer rates.

## **2. GVWD Division**

Tioga and Staff agree that the GVWD Division should be permitted an overall increase in its rates in order to have the opportunity to earn an annual revenue requirement of \$26,786 which represents a 110.55% increase over the GVWD Division's test year operating revenues. This

overall increase in the GVWD Division's operating revenues are illustrated on Attachment B to this Settlement Agreement and consists of a permanent increase based upon the test year as well as a step increase based on certain 2010 plant additions.

**a. Permanent Increase**

Attachment B, Schedule 1 illustrates the calculation of the permanent increase portion of the GVWD Division's revenue requirement. The permanent increase portion of the GVWD Division's revenue requirement is \$21,034 which represents an \$8,312, or 65.34%, increase over adjusted test year water revenues of \$12,722. Tioga and Staff agree that certain rate base and test year adjustments are appropriate and should be included in calculating the revenue requirement shown above. These adjustments are shown on Attachment B, Schedules 2a and 3a. Tioga and Staff agree that the test year rate base for the GVWD Division should be \$38,759 as shown on Attachment B, Schedule 2. Tioga and Staff agree that the rate of return to be applied to the GVWD Division's rate base should be 7.77% which is based on the Company's debt directly attributable to the GVWD Division as indicated on Attachment B, Schedule 1a. The Company and Staff agree that for purposes of computing its capital structure as of 10/31/09, the Company's equity component is a negative \$15,131 and does not factor into the determination of a rate of return for the GVWD Division.

**b. Step Increase**

Attachment B, Schedule 4 illustrates the step increase portion of the GVWD Division's revenue requirement. The step increase portion of the GVWD Division's revenue requirement is \$5,751, representing an additional 45.21% increase over the GVWD Division's adjusted test year water revenues. The basis for this step increase is

DW 10-217  
Tioga River Water Company, Inc.  
Settlement Agreement

new booster pumps and a treatment system completed in 2010 which serves the GVWD Division. The cost of the new plant is \$106,758 and was mainly financed by a state revolving fund (SRF) loan administered by the New Hampshire Department of Environmental Services (NHDES). Tioga was also approved for a grant which will result in the forgiveness of 50% of the principal balance of the SRF borrowing. The SRF loan was previously considered by the Commission in docket DW 09-117 and was approved in Order No. 24,988 issued on July 23, 2009.

Tioga and Staff agree that the new construction and the associated financing arrangement will increase the GVWD Division's rate base by \$52,255 as illustrated on Attachment B, Schedule 4. The rate of return, calculated on Attachment B, Schedule 4c, that is applied to the additional rate base is 3.188% which is based on the total annual cost of debt related to the GVWD Division's portion of the SRF loan. Tioga and Staff agree that the application of this rate of return will increase the GVWD Division's net operating income requirement by \$1,666 (See Attachment B, Schedule 4). In addition, Tioga and Staff agree that the new plant in service will increase the GVWD Division's annual operating expenses by \$4,086 in the form of increased depreciation expense and property taxes (See Attachment B, Schedules 4a and 4b).

As of the date of this agreement, an audit of the new plant placed in service during 2010 has not been completed by the Commission Audit Staff. It is anticipated that this examination will be completed in the near future and a report will be issued by the Audit Staff. In addition, the final documentation for the SRF loan has not yet been completed. The Company, however, has been informed of the anticipated terms associated with this loan including repayment term and interest rate. If the Audit Staff's

report or the final documentation for the SRF loan reveal any material discrepancies in the amounts presented in the schedules to this Settlement Agreement, Staff will notify the Commission of these as well as the resulting impact on proposed customer rates.

**B. Rate Design and Effect on Customer Rates**

**1. Tioga Division**

The recommendation of Tioga and Staff with respect to the Tioga Division's rate design is illustrated on Attachment A, Schedule 5 and includes the effects of both the permanent increase and the step increase discussed in Section A.1, above. The settling parties recommend a fixed quarterly charge of \$60.00 per billable unit (\$240.00 annually) and a consumption charge of \$0.1181 per cubic foot of water used. The parties agree that an average single-unit residential customer in the Tioga Division who uses approximately 5,963 cubic feet of water annually will pay \$944 per year under these proposed rates. This is compared to a present annual charge of \$473 under current rates, or an approximate 100% increase.

**2. GVWD Division**

The recommendation of Tioga and Staff with respect to the GVWD Division's rate design is illustrated on Attachment B, Schedule 5 and includes the effects of both the permanent increase and the step increase discussed in Section A.2, above. The settling parties recommend a fixed quarterly charge of \$36.07 per billable unit (\$144.29 annually) and a consumption charge of \$0.0410 per cubic foot of water used. The parties agree that an average single-unit residential customer in the GVWD Division who uses approximately 3,907 cubic feet of water annually will pay \$304 per year under these proposed rates. This is compared to a present annual charge of \$143 under current rates, or an approximate 113% increase.

**C. Effective Date**

Tioga and Staff agree that the stipulated revenue requirements for both the Tioga Division and the GVWD Division should become effective on a service rendered basis on or after October 1, 2011 so as to coincide with the Company's current quarterly billing cycle.

**D. Loans from Affiliate and Shareholder**

**1. Tioga Division**

During 2010, Tioga borrowed \$3,580 from its affiliate, Gilford Well Company, in order to finance engineering work associated with the construction of the Tioga Division's new pump station completed in 2010. Tioga and Staff agree that this loan should be repaid in monthly installments of principal and interest over a term of twenty (20) years. Tioga and Staff also agree that the interest rate of the loan should be based on the historical average annual majority prime rate charged by banks on short-term business loans plus 1.33% and adjusted every five years. Therefore, the initial interest rate of this loan will be 4.58% (3.25% + 1.33%). The revenue impact of this financing is reflected in the Tioga Division's step increase discussed in Section A.1.b, above. Tioga and Staff also agree that Tioga will file an executed copy of this note with the Commission within 30 days of the Commission's order approving this Settlement Agreement.

**2. GVWD Division**

Tioga's filing included a request for approval of three loans to its GVWD Division. Each such financing occurred in a prior year, however, and the Company did not file for Commission approval of these pursuant to RSA 369. In 2006, the Company borrowed \$12,810 from its affiliate, Gilford Well Company. The funds were used for the replacement of pumping equipment and meters as well as to meet operating expenses. In 2007, Tioga borrowed \$11,928

DW 10-217  
Tioga River Water Company, Inc.  
Settlement Agreement

from its shareholder, Norman Harris, Jr. The proceeds from this borrowing were used for the replacement of pumping equipment and to meet operating expenses. In 2008, the Company borrowed an additional \$8,429 from Norman Harris, Jr. for the replacement of tanks and pumping equipment as well as to meet operating expenses. Tioga and Staff agree that each loan should be repaid in monthly installments of principal and interest over a term of twenty (20) years. With regard to the interest rates associated with each loan, Tioga and Staff agree that each should be based on the historical average annual majority prime rate charged by banks on short-term business loans plus 1.33% and adjusted every five years. Therefore, the initial interest rates on these loans are as follows: for the 2006 loan the interest rate is 9.29% (7.96% + 1.33%); for the 2007 loan the interest rate is 9.38% (8.05% + 1.33%); for the 2008 loan the interest rate is 6.42% (5.09% + 1.33%). Tioga and Staff agree that it is just and reasonable for Tioga to undertake these loans and recommend that the three prior year financings be approved. The revenue impact of these financings is reflected in the GVWD Division's permanent increase discussed in Section A.2.a, above. Tioga and Staff also agree that Tioga will file executed copies of each note with the Commission within 30 days of the Commission's order approving this Settlement Agreement.

**E. Plant Records**

Tioga and Staff agree that the Company will maintain and continually update its system of Continuing Property Records as well as its Work Order System in accordance with the Commission's Uniform System of Accounts. Tioga and Staff also agree that the following schedule attachments to this Settlement Agreement will be the basis for Tioga's future recordkeeping requirements for fixed plant, accumulated depreciation and depreciation expense beginning with the fiscal year ended October 31, 2010 and following: for the Tioga Division,

Attachment A, Schedules 2c and 4a; and, for the GVWD Division, Attachment B, Schedules 2c and 4a. Any prior period adjustments that may be necessary in order to bring the Company's fixed plant and accumulated depreciation balances into conformity with these schedules should be reflected in the Company's annual report to the Commission for the fiscal year ended October 31, 2011.

**F. Plant Improvements – Tioga Division**

Tioga and Staff agree that Tioga will install and have operational by October 6, 2011 an auto-dialer in the Belmont pump station to notify the Company directly of any system alarms.

**G. Rate Case Expenses**

Tioga and Staff agree that the Company ought to be entitled to recover its reasonable and prudently incurred rate case expenses in this proceeding. Following the final hearing in this docket, the Company will submit to Staff its request as well as supporting documentation for recovery of rate case expenses for Staff's review. It is the intention of Tioga and Staff to provide a joint recommendation to the Commission. If the settling parties are unable to provide a joint recommendation, Tioga and Staff will each provide a recommendation to the Commission for its review.

**IV. CONDITIONS**

This agreement shall not be deemed in any respect to constitute an admission by any party that any allegation or contention in these proceedings is true or valid. This agreement is expressly conditioned upon the Commission's acceptance of all its provisions, without change or condition, and if the Commission does not accept said provisions in their entirety, without change or condition, the agreement shall at Tioga's or the Staff's, option, exercised within thirty

DW 10-217

Tioga River Water Company, Inc.  
Settlement Agreement

days of such Commission order, be deemed to be null and void and without effect and shall not constitute any part of the record in this proceeding nor be used for any other purpose.

The Commission's acceptance of this agreement does not constitute continuing approval of, or precedent regarding, any particular principle or issue in this proceeding, but such acceptance does constitute a determination that (as the settling parties believe) the adjustments and provisions set forth herein in their totality are just and reasonable and that the revenues contemplated will be just and reasonable under the circumstances.

IN WITNESS WHEREOF, the settling parties have caused this agreement to be duly executed in their respective names by their fully authorized agents.
