Plymouth, NH 03264

Re: DE 10-286, DE 10-287, DE 10-291 and DE 10-294 New Hampshire Electric Cooperative, Inc. Certification Applications for Class II Eligibility Pursuant to RSA 362-F on behalf of homeowners John Duffield, Scott Horton, Steven Olafsen and Paul Robinson

Dear Mr. McNeil:

On October 27, 2010 and November 3, 2010, you submitted applications on behalf of homeowners John Duffield, Scott Horton, Steven Olafsen and Paul Robinson requesting certification of customer-sited photovoltaic rooftop arrays as eligible to produce Class II renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the applications and recommended approval noting that the first three applications were completed on October 27, 2010 and the fourth application was completed on November 3, 2010.

Class II eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from solar technologies. The applications indicate that the facilities are customer-sited photovoltaic rooftop arrays located in New Hampshire and that they began operation in 2010. The details for each facility are listed in the table on the following page.

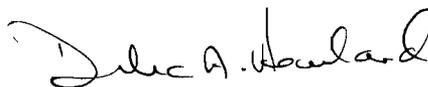

Commission Assigned Docket #	Facility Owner	Facility Location	Operation Date ¹	Total kW listed in application (DC Arrays)	Effective Date to Produce RECs	NH Certification Code
DE 10-286	John Duffield	Meredith, NH	10/06/10	4.60	10/27/10	NH-II-10-112
DE 10-287	Scott Horton	Meredith, NH	08/30/10	4.83	10/27/10	NH-II-10-113
DE 10-291	Steven Olafsen	Center Sandwich, NH	10/20/10	4.62	10/27/10	NH-II-10-114
DE 10-294	Paul Robinson	Brentwood, NH	10/27/10	4.83	11/03/10	NH-II-10-115

Since the facilities are customer-sited sources, their output is not recorded in the New England Power Pool Market Settlement System and, as a result, their output must be monitored and verified by an independent monitor. The applications state that NHEC will monitor the facilities' output as required by N.H. Code of Administrative Rules Puc 2505.08 and 2505.09. These facilities' total output will also be included in the *NHEC Class II Aggregation's* total output reported to the NEPOOL Generation Information System as approved by the Commission on April 9, 2010.

Based on Staff's recommendation, the Commission has determined that NHEC has provided all the necessary information to demonstrate that the facilities are eligible for certification as Class II facilities. Therefore, the Commission hereby certifies the John Duffield, Scott Horton and Steven Olafsen facilities as eligible for Class II RECs effective October 27, 2010 and the Paul Robinson facility as eligible effective November 3, 2010.

The New Hampshire Renewable Portfolio Standard certification codes for the above mentioned solar photovoltaic facilities are listed in the previous table.

Sincerely,

Debra A. Howland
Executive Director

¹ NHEC considers the operation date listed in the table above, and in Appendix E of each application, to be the date on which NHEC inspected the facility and installed a revenue quality meter to record the electricity that will be eligible for Class II RECs. The date listed in each interconnection application pertains to the installation and interconnection of the facility and may be different than the operation date listed in the above table.
