

Independent Monitor's Annual Electricity Production Report for 2015

Facility Name: Elysium
NH Certificate Code NH-II-10-116
Nameplate Capacity (DC) 82 kW
1 <sup>st</sup> quarter production: 4,542 kWh
2 <sup>nd</sup> quarter production: 24,465 kWh
3 <sup>rd</sup> quarter production: 28,328 kWh
4 <sup>th</sup> quarter production: 8,902 kWh
Total annual production: 66,237 kWh
NH Class II Source Effective Date: October 28, 2010
*Estimated Class II RECs to be created from annual production: 65 RECs

\* Please note that after the 1<sup>st</sup> quarter, the reporting methodology switched from reporting whole megawatt-hours and carrying forward excess kilowatt-hours to the next month, to simply reporting directly in kilowatt-hour increments. This switch means that the NEPOOL GIS carries forward excess kilowatt-hours within its system since the RECs are only minted in megawatt-hour denominations.
