The purpose of this filing is to add Business Safety Line Service to the tariff. Business Safety Line Service is an optional bundle for business customers who have their main telephone service with a wireless provider, but require a landline for emergency back-up and high speed data.

The proposed effective date for this filing is January 3, 2011.

The revenue impact is estimated to be a reduction of \$114.60 in the first year of availability. This impact would equate to a 41% change in annual revenue associated with the customers subscribing to these packages.

Note: Some of the required supporting documents for this tariff filing are being filed as "confidential" under a separate cover letter. Documents included in the confidential filing include a support narrative of the offering, a revenue impact statement, and a cost support document.
