RE: Hannaford Energy, LLC, Competitive Electric Power Supplier Registration in
New Hampshire

Dear Ms. Gray:

This letter is in regard to Hannaford Energy, LLC, a supply customer of National Grid (the Company). Typically, the Company requires competitive electric power suppliers to complete electronic data interchange (EDI) testing in order to interface with the Company's system. The Company did not require Hannaford Energy, LLC, to certification because Hannaford Energy, LLC is a self-supplier with a very limited number of accounts.

The Company has successfully and without issue been able to meter and bill Hannaford Energy's accounts in New Hampshire since July. Therefore, Hannaford Energy has completed any technical specifications required for conducting business with the Company. No further action is required.

Regards,

Donna Marie Laura

RE: Hannaford Energy, LLC, Competitive Electric Power Supplier Registration in New Hampshire

Dear Rich Silkman:

This letter is in regard to Hannaford Energy, LLC who is a self supply customer of Public Service Company of New Hampshire (PSNH).

Typically, PSNH requires competitive electric power suppliers to complete electronic data interchange (EDI) testing in order to interface with our system. PSNH did not require Hannaford Energy to complete EDI testing because communicating by EDI is optional for self supply customers.

PSNH has successfully and without issue been able to meter and bill Hannaford Energy, LLC's accounts within PSNH's distribution area since August 2010 for the purpose of self supply. Therefore, there is no need for any further action involving EDI testing unless New Hampshire's Public Utility Commission requirements change in the future.

Sincerely,

Aaron Downing

Dear Mr. Iqbal,

We have been working with Hannaford energy for many months and they have met the needs of our communicating information regarding items such as enrollment and billing. We did not require Hannaford to conduct EDI testing because they serve their own load. However, it was in both of our interests to establish an efficient and effective communications. The process we have set up is acceptable to New Hampshire Electric Cooperative and apparently also works for Hannaford Energy.

Sincerely,

A William Bayard

RE: Hannaford Energy, LLC, Competitive Electric Power Supplier Registration in New Hampshire

Dear Ms. Gray:

This letter is in regard to Hannaford Energy, LLC, a supplier customer of Unitil Energy Systems, Inc. (the Company). Typically, the Company requires competitive electric power suppliers to complete electronic data interchange (EDI) testing in order to interface with the Company's system. The Company did not require Hannaford Energy to demonstrate EDI capabilities because Hannaford Energy is a self-supplied customer. The Company has successfully and without issue been able to meter and bill Hannaford Energy's accounts in New Hampshire since July. Therefore, Hannaford Energy has completed any technical specifications required for conducting business with the Company. No further action is required.

Sincerely,

Robert S. Furino
