FairPoint Communications-NNE
Intrastate Access Reform
TO: Commissioners
Debra Howland, Executive Director

On June 1, 2012, Northern New England Telephone Operations LLC d/b/a FairPoint Communications-NNE (FairPoint) filed changes to its access tariff, NHPUC No. 3, to comply with the Federal Communications Commission's (FCC's) transitional access service pricing requirements in the USF/ICC Order¹.

The USF/ICC Order requires each price cap² ILEC whose intrastate access rates exceed its interstate access rates to reduce intrastate access revenue by half the difference between 1) revenue based on intrastate rates times fiscal year 2011 intrastate switched access demand and 2) revenue based on interstate rates times fiscal year 2011 intrastate switched access demand. The USF/ICC Order requires such carriers to produce an intrastate rate design that achieves, by July 3, 2012, the allowed revenue and, by July 1, 2013, the carrier's interstate rate level and rate structure.

FairPoint submitted a completed version of a spreadsheet template prepared by Staff, which included demand data and related calculations. Pursuant to Order 25,363, the demand data and related calculations have been granted confidential treatment.

Staff has reviewed the proposed tariff and supporting work papers submitted by FairPoint, to confirm the changes comply with the FCC's requirements. Staff recommends the tariff be allowed to go into effect as proposed, on July 1, 2012.
