SUBJECT: DT 12-144, Bretton Woods Telephone Company Tariff Filing to Add Provisions for VoIP/PSTN Traffic

TO: Commissioners
Debra Howland, Executive Director
Kate Bailey, Director, Telecommunications

On May 24, 2012, Bretton Woods Telephone Company (Bretton Woods) submitted a tariff filing to establish a process for identifying and rating VoIP/PSTN access traffic, to take effect July 1, 2012.

The proposed revision addresses new requirements established by the Federal Communications Commission (FCC) regarding VoIP traffic charges. The revision includes provisions allowing a Bretton Woods wholesale customer to furnish ratios of expected IP traffic in its overall minutes of use, and provisions for Bretton Woods to adopt a default ratio of 0% when the customer has not furnished such. (Some other carriers have used a default ratio based on their own percentage of VoIP customers. A value of 0% is equivalent for carriers that have deployed no VoIP services.)

In Staff's assessment, this tariff revision is consistent with FCC requirements and provides a reasonable process for identifying and rating the traffic involved. Since this tariff has taken effect pursuant to RSA 378:3 and RSA 378:6, IV, no further review or approval is required.
