Re: November 2013 monthly cost of energy over/under report (DG 12 – 270)

Dear Ms. Howland,

Enclosed is the November 2013 over/under report. The November report is hereby filed to reflect the actual fuel costs from November 2012 through October 2013. We have had to use an estimated actual cost of natural gas for September and October due to a delay in receiving the invoices from the gas provider (not the distribution utility).

There is an increase of less than 1% in expected monthly steam sales and a corresponding 1% increase of anticipated fuel cost since the beginning of the COE year (Nov 2012). As a result, the enclosed November report reflects a COE end of year under-collection of approximately \$31,133. However because this excess is less than 1% of the overall expected fuel costs for the year, we are not adjusting the COE rate at this time and will make adjustments as necessary to the COE set by DG 13-255 as determined by the final DG12-270 (Nov 12- Oct 13) reconciliation.

The November 2013 tariff is \$20.83/mlb in accordance with the rates set by DG 13-255 and the December 2013 rate is going to remain unchanged at \$20.83.

If there are any questions please call me.

Yours Truly,

Mark E. Saltzman  
Vice President
