**Re: DE 13-063; Granite State Electric Company d/b/a Liberty Utilities  
Petition for Distribution Rate Adjustments**

Dear Ms. Howland:

I am writing with regard to the Settlement Agreement filed with the Commission on June 3, 2013 and heard at the June 4 hearing in this docket. In its review of the attachments to the Settlement Agreement, which was filed as Exhibit 4, the Company has discovered that the default service rates incorporated into Exhibit 4 are from an earlier period and not the most recent default service rates in effect. For example, on Bates page 15 of Exhibit 4, the default service rates (reflected as "commodity") are from a prior period and do not reflect the default service rates in effect as of June 4, 2013, which are lower. The amount of increase in distribution rates set forth in the Settlement Agreement is correctly stated. The only impact is to the statement of the increase on a total bill basis for customers, which will be slightly lower when the lower default service rates are reflected. The Company proposes filing replacement pages to the Settlement Agreement schedules as part of its compliance filing on temporary rates to correct this error.

The Company has calculated the total bill impact of the proposed temporary distribution rates to residential customers using an average of 676 kWh per month combined with currently effective default service rates which would result in a \$7.45 or 8.3% increase.

Thank you for your assistance. Please do not hesitate to call if you have any questions.

Very truly yours,

A handwritten signature in black ink that reads "Sarah B. Knowlton".
