## ORDER OF NOTICE

On September 27, 2013, Public Service Company of New Hampshire (PSNH) filed a petition to set its default energy service (ES) rate for effect with service rendered on and after January 1, 2014. Pursuant to RSA 369-B:3,IV(b)(1)(A), customers who take ES from PSNH will be billed at a rate equal to PSNH's actual, prudent and reasonable costs of providing the power, as approved by the Commission. In support of its petition, PSNH filed the testimony of Eric H. Chung with related schedules and exhibits. PSNH stated that adjusting its ES rate will be in conformity with PSNH's least cost integrated resource plan most recently filed and found adequate by the Commission. Pursuant to Order No. 25,353 (June 27, 2013), PSNH also filed supplemental information regarding its review of costs associated with its generation assets. PSNH filed both a redacted copy of the supplemental information and an unredacted copy. PSNH requested confidential treatment for the information redacted from the public filing.

PSNH testified that its ES cost categories include the revenue requirements for owned generation assets and the cost of purchased power obligations. PSNH further explained that those costs include the fuel costs associated with its generation assets; the costs from supplemental energy and capacity purchases; certain Independent System Operator-New England ancillary service charges; and the cost of compliance with New Hampshire's Renewable Portfolio Standard (RPS) and the Regional Greenhouse Gas Initiative (RGGI). PSNH's generation revenue requirements also include non-fuel costs of generation including non-fuel operation and maintenance costs, allocated administrative and general costs, depreciation, property taxes, payroll taxes and a return on the net investment in its fossil and hydroelectric generating plants. PSNH's energy costs include estimated costs for Independent Power Producer (IPP) generation that is used to help meet PSNH's load requirements. IPP power costs included in the estimated ES rate are based on projected market costs of energy and capacity. PSNH stated that the estimated market costs associated with five Wood IPP contracts approved by the Commission in Order No. 25,305 (December 20, 2011) in Docket DE 11-184 are included in the initial calculation of the ES rate. In addition, PSNH included a discussion of the ISO-New England Winter Reliability Program that was put in place for the 2013-2014 winter period and rate effects related to that program.

PSNH said that all of the enumerated energy costs exclude any impact of the wet flue gas desulfurization installation (Scrubber) at Merrimack Station which is the subject of a separate docket (DE 11-250). Pursuant to Order No. 25,346 (April 10, 2012) in Docket DE 11-250, the Commission established a temporary Scrubber cost recovery rate of 0.98 cents per kilowatt-hour (kWh). The overall ES rate includes the non-Scrubber energy cost recovery component plus the temporary Scrubber cost recovery rate.

In its filing, PSNH provided its preliminary calculation of non-Scrubber ES rate of 7.98 cents per kWh for service rendered on and after January 1, 2014. PSNH stated that the preliminary rate was calculated using the latest available information and would represent an increase of 0.34 cents per kWh from the current non-Scrubber ES rate of 7.64 cents per kWh approved in Order No. 25,535 (June 27, 2013). When the current temporary cost recovery component for the Scrubber is included, the total estimated ES rate would be 8.96 cents per kWh. The Company said that as with prior ES rate filings, it would update the calculation of the non-Scrubber ES rate prior to the hearing in this docket.

PSNH also filed a petition to set its 2013 stranded cost recovery charge rate (Docket No. DE 13-274) on September 27, 2013.
