Product

Electricity is the product of a mix of generation energy sources that is delivered over a system of wires. You will not have electricity from a specific generation facility delivered directly to your service address, but Ethical Electric ensures that the applicable percentage of your electricity usage is offset by the generation of energy from renewable resources on an annual basis. Ethical Electric does so by purchasing and retiring "renewable energy certificates" representing the environmental attributes associated with the applicable amount of renewable energy generation from the renewable sources specified for your product. Your purchase helps support the development and operation of renewable energy in the areas specified in your product. Ethical Electric may take up to three months following the close of a calendar year to make up any deficiency in the renewable resource content for this product. Information on generation energy sources for your product, energy efficiency, environmental impacts or historical billing data is available upon request.
