ACCESS SERVICE

2.   General Regulations (Cont'd)

2.3   Obligations of the Customer (Cont'd)

2.3.13   Identification and Rating of Toll VoIP-PSTN Traffic

(A)   Scope

This section governs the identification and billing of VoIP-PSTN Traffic, unless the parties have agreed otherwise, pursuant to the Federal Communications Commission Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (November 18, 2011) ("FCC November 18th Order") and the FCC's Second Order on Reconsideration, FCC Release 12-47 (April 25, 2012)("FCC Orders").   (C)
                                                                                                                                    |
                                                                                                                                    (C)

(1)   For purposes of this tariff section, "VoIP-PSTN Traffic" is defined, consistent with 47 C.F.R. § 51.701 (b)(3), as interexchange (access) telecommunications traffic exchanged between the Telephone Company and another telecommunications carrier in Time Division Multiplexing ("TDM") format that originates and/or terminates in IP format and that otherwise meets the definitions in 47 C.F.R. § 51.701 (b)(1) or (b)(2). Telecommunications traffic originates and/or terminates in IP format if it originates from and/or terminates to an end-user customer of a service that requires Internet protocol-compatible customer premises equipment.

(2)   Reserved for future use.   (C)

(B)   Rates

Originating Intrastate, interexchange VoIP-PSTN Traffic identified in   (C)
accordance with this tariff section will be billed at rates equal to the
Telephone Company's applicable tariffed interstate switched access rate
as specified in the Telephone Company's applicable federal access tariff.

The intrastate terminating switched access rates in this tariff are at parity   (C)
with the Company's interstate rates, thus no VoIP factor need be applied to |
terminating intrastate, interexchange VoIP-PSTN Traffic.   (C)

ACCESS SERVICE

2.   General Regulations (Cont'd)

    2.3   Obligations of the Customer (Cont'd)

        2.3.13   Identification and Rating of Toll VoIP-PSTN Traffic (Cont'd)

            (C)   Calculation and Application of Percent-VoIP-Usage Factors

The traffic minutes of use ("MOU") to which interstate rates will be applied under this section will be determined by the Telephone Company by applying the Customer's Percent VoIP Usage ("PVU") factor to the total intrastate access MOU originated by the Company's end users and delivered to the Customer as follows: (C)
(C)

    (1)   The Customer will calculate and furnish to the Telephone Company a factor (the "PVU") representing the percentage of the total originating intrastate access MOU that: (C)

        a. the Customer exchanges with the Company, and
        b. is terminated in IP format in New Hampshire   (C)

    (2)   The Customer shall not modify its reported PIU factor to account for VoIP-PSTN traffic.

    (3)   The PVU information and supporting documentation supplied by the Customer shall be based on information that is independently verifiable by the Telephone Company, including but not limited to the number of the Customer's or an underlying service provider's retail VoIP subscriptions in the state (e.g. as reported on FCC Form 477), traffic studies, actual call detail or other relevant and verifiable information. The Telephone Company may reject unverified or unverifiable assertions that the traffic is VoIP-PSTN Traffic.

    (4)   The Customer shall retain the call detail, work papers and information used to develop the PVU factors for a minimum of one year.

    (5)   If the Customer does not furnish the Telephone Company with PVU factors, along with the relevant and verifiable supporting documentation described above, the Telephone Company will utilize PVU factors equal to zero.
