RE: Docket No. DE 14-216, Electric and Gas Utilities
2015-2016 Core NH Electric and Gas Energy Efficiency Programs
Eversource Energy Tariff Pages Re: Residential Energy Efficiency Loan Program

Dear Director Howland:

On December 31, 2014 in Order No. 25,747 in the above-referenced docket the Commission approved the two year plan relating to the Core NH Electric and Gas Energy Efficiency Programs. Relevant to this submission, on pages 32 and 33 of that plan (filed with the Commission as Attachment B to the December 11, 2014 settlement agreement), the electric utilities, including Public Service Company of New Hampshire d/b/a Eversource Energy ("Eversource"), described certain changes to their existing terms for offering on-bill financing for energy efficiency loans. Specifically, on page 33 the plan proposed that the electric utilities:

Limit the existing 0% on-bill financing option to customers with co-payment amounts less than a certain dollar threshold. Each NH Electric Utility will determine the appropriate threshold based on the demand for loans and the current and projected revolving loan fund balance. For example, PSNH's threshold will be initially set at \$2,000. Customers with a co-payment amount less than or equal to \$2,000 will be eligible for 0% on-bill financing while funds are available whereas all other customers will have access to third-party financing.

Consistent with that provision, Eversource herein includes revised tariff pages intended to implement the changes to the threshold and eligibility for on-bill financing as described in the plan. If you have any questions, please do not hesitate to contact me. Thank you for your assistance with this matter.

Very truly yours,

Matthew J. Fossum
