1	4 [WITNESS PANEL: Goulding~White~Plecs]
1	PROCEEDING
2	CHAIRMAN HONIGBERG: All right. Good
3	morning. We're going to open the hearing in Docket DE
4	14-235, which is PSNH's Energy Service docket. This is
5	what others refer to as "Default Service". It's a rate
6	that needs to be reset regularly. PSNH has made its
7	filings, and we have them. The witnesses have already
8	taken their seats.
9	But, before we begin, before we go any
10	further, let's take appearances.
11	MR. FOSSUM: And, good morning,
12	Commissioners. Matthew Fossum, for Public Service Company
13	of New Hampshire.
14	MS. CHAMBERLIN: Susan Chamberlin,
15	Consumer Advocate. And, with me today is Jim Brennan.
16	MS. AMIDON: Good morning. Suzanne
17	Amidon, with the Commission Staff. With me today is Tom
18	Frantz, the Director of the Electric Division, and Grant
19	Siwinski, an Analyst in the Electric Division.
20	CHAIRMAN HONIGBERG: Mr. Fossum, how are
21	we going to proceed this morning?
22	MR. FOSSUM: We have we have the
23	exhibits, which have been provided to the Clerk, that
24	would be entered this morning as it may be appropriate,
	{DE 14-235} {12-18-14}

	[WITNESS PANEL: Goulding~White~Plecs]
1	would be the September 15th filing, the initial filing in
2	this case, would be "Exhibit 1" for identification. The
3	December 15th technical statement would be "Exhibit 2" for
4	identification. And, then, a series of spreadsheets would
5	be entered as "Exhibit 3" for identification. And, we
6	will have the witness explain those exhibits as we go
7	along.
8	(The documents, as described, were
9	herewith marked as Exhibit 1, Exhibit 2,
10	and Exhibit 3 , respectively, for
11	identification.)
12	CHAIRMAN HONIGBERG: And, we have a
13	panel of three witnesses I see?
14	MR. FOSSUM: Yes.
15	CHAIRMAN HONIGBERG: Mr. Patnaude.
16	(Whereupon Christopher J. Goulding,
17	Frederick B. White, and
18	Christopher A. Plecs were duly sworn by
19	the Court Reporter.)
20	CHRISTOPHER J. GOULDING, SWORN
21	FREDERICK B. WHITE, SWORN
22	CHRISTOPHER A. PLECS, SWORN
23	DIRECT EXAMINATION
24	BY MR. FOSSUM:

		ہ [WITNESS PANEL: Goulding~White~Plecs]
1	Q.	Mr. Plecs, could you state your name and your title and
2		your responsibilities for the record in this docket
3		please.
4	Α.	(Plecs) My name is Christopher Plecs. My title is the
5		Manager of Forecasting for Northeast Utilities. And,
6		my responsibilities for the Company are I'm responsible
7		for sales and revenue forecasting.
8	Q.	And, Mr. Plecs, have you ever testified before this
9		Commission before?
10	Α.	(Plecs) No, I have not.
11	Q.	Mr. Goulding, if you could state your name and your
12		title and your responsibilities for the record please?
13	Α.	(Goulding) My name is Christopher John Goulding. I'm
14		employed by Northeast Utilities as the Manager of
15		Revenue Requirements for PSNH. My primary
16		responsibilities are to oversee the
17		coordination/implementation of revenue requirement
18		calculations associated with the Distribution rates,
19		SCRC rates, Energy Service rate, and TCAM.
20	Q.	And, Mr. White, if you could also state your name, your
21		title, and your responsibilities for the record please.
22	Α.	(White) My name is Frederick White. I'm a Supervisor
23		in the Energy Supply Group for Northeast Utilities
24		Service Company. My primary responsibilities include

		[WITNESS PANEL: Goulding~White~Plecs]
1		the analysis of the portfolio of load and resources for
2		the Public Service of New Hampshire Energy Service
3		rate, for the purpose of rate-setting and
4		reconciliation of costs.
5	Q.	And, Mr. Goulding, on September 15th, did you submit
6		prefiled testimony in this docket?
7	Α.	(Goulding) Yes.
8	Q.	And, was that testimony prepared by you or under your
9		direction?
10	Α.	(Goulding) Yes.
11	Q.	And, do you have any corrections or updates to that
12		testimony today?
13	Α.	(Goulding) Yes, I do.
14	Q.	Could I explain the correction or corrections.
15	Α.	(Goulding) On Page 3 of 13, Bates stamp 006 of the
16		testimony, there's a column that says "Date of
17		Service", and it has a bunch of Energy Service rates
18		for different periods in time. The last one says "July
19		2013 to December 2014". It should be "July 2014 to
20		December 2014".
21	Q.	Do you have any other corrections or updates?
22	Α.	(Goulding) No, I do not.
23	Q.	Mr. Goulding, if you were asked the same questions that
24		are in this testimony today, would your answers be the

		[WITNESS PANEL: Goulding~White~Plecs]
1		same?
2	Α.	(Goulding) Yes, they would.
3	Q.	And, this testimony is true and accurate to the best of
4		your knowledge and belief today?
5	Α.	(Goulding) Yes.
6	Q.	And, Mr. Plecs, did you also, on September 15, 2014,
7		submit prefiled testimony in this matter?
8	Α.	(Plecs) Yes.
9	Q.	And, was that testimony prepared by you or under your
10		direction?
11	Α.	(Plecs) Yes.
12	Q.	And, do you have any corrections or updates to that
13		testimony?
14	Α.	(Plecs) No.
15	Q.	And, if you were asked the same questions that are in
16		that testimony today, would your answers be the same?
17	Α.	(Plecs) Yes.
18	Q.	And, that testimony is true and accurate to the best of
19		your knowledge and belief today?
20	Α.	(Plecs) Yes.
21	Q.	Just for completeness, Mr. Goulding, did you, on
22		December 15th, 2014, submit a technical statement and
23		updated exhibits in this docket?
24	Α.	(Goulding) Yes.

		[WITNESS PANEL: Goulding~White~Plecs]
1	Q.	And, is the information was the information in that
2		technical statement prepared by you or under your
3		direction?
4	Α.	(Goulding) Yes, it was.
5	Q.	And, do you have any corrections or updates to the
6		information in that statement?
7	Α.	(Goulding) No, I do not.
8	Q.	And, the information in that statement is true and
9		accurate to the best of your knowledge and belief
10		today?
11	Α.	(Goulding) Yes.
12	Q.	And, Mr. White, did you also submit were you also
13		part of the technical statement that was submitted on
14		December 15th, 2014?
15	Α.	(White) Yes.
16	Q.	And, the same questions to you was, to the extent that
17		your testimony or statement was included, is the are
18		those statements or were they prepared by you or under
19		your direction?
20	Α.	(White) Yes, they were.
21	Q.	And, do you have any corrections to the information in
22		that statement?
23	Α.	(White) No.
24	Q.	And, the information in that statement is true and
		$\{ DF 14 - 235 \} \{ 12 - 18 - 14 \}$

{DE 14-235} {12-18-14}

9

		[WITNESS PANEL: Goulding~White~Plecs]
1		accurate to the best of your knowledge and belief
2		today?
3	Α.	(White) Yes, it is.
4	Q.	Mr. Goulding, could you very briefly just explain
5		the at a somewhat high level, explain the Company's
6		proposal as it was made back in September, in what has
7		been marked for identification as "Exhibit 1".
8	Α.	(Goulding) Okay. The September 15th proposal was
9		proposing a rate an Energy Service rate of 9.61
10		cents, which was a decrease from the current rate of
11		9.87 cents. And, the main drivers of that rate or,
12		the rate change was the removal or, the forecasted
13		under recovery again of '14 to be zero. So that itself
14		removed about 0.3 cents from the rate. And, then a
15		decrease in fuel expense, forecasted fuel expense for
16		2015, which was offset by an increase in RPS expense
17		for 2015.
18		Additionally, in that filing, we used
19		historic migration, consistent with how we had filed in
20		the past. And, the migration level that we used was
21		50.2 percent.
22	Q.	In calculating the rate as proposed on September 15th,
23		did the Company make any changes relative to the amount
24		of assessment that was included in that rate?

		[WITNESS PANEL: Goulding~White~Plecs]
1	Α.	(Goulding) Yes, we did. Consistent with the law that
2		was passed for July 1st, we removed all the assessment,
3		with the exception of \$10,000, from the Energy Service
4		rate. And, those costs were moved over to the
5		Distribution rate.
6	Q.	Now, if you could then please describe, Mr. Goulding or
7		Mr. White as may be appropriate, what changes from that
8		proposal were made as part of the December 15th update
9		that has been marked for "Exhibit 2" marked as
10		"Exhibit 2" for identification please?
11	Α.	(Goulding) Okay. I'll start with the primary changes
12		from the December 15th to $9/15$ filing. The primary
13		changes was, in the 9/15 filing, we had a 2014 a
14		minimal 2014 under recovery. But, in the September
15		or, the December 15th filing, we had a forecasted under
16		recovery of roughly \$13 million. Additionally, we have
17		increased fuel expense for 2015, which wasn't offset by
18		a reduction or, by an increase in purchases I
19		mean increase in sales. And, the reason why it wasn't
20		offset by an increase in sales is because, for the
21		December 15th filing, we incorporated the forecasted
22		migration. So, the level of forecasted on an annual
23		basis, the level of forecasted migration for 2015 was
24		51.7 percent, compared to the 50.2 percent in the

		[WITNESS PANEL: Goulding~White~Plecs]
1		September 15th filing. And, when we looked at the
2		forecasted migration, we didn't just apply it on an
3		annual basis, we took into account the migration trends
4		on a month-to-month basis.
5	Q.	So, if I could stop you there. You said the Company,
6		for purposes of the December 15th filing, used
7		forecasted migration, rather than the historic
8		migration that was in the September 15th. Could you
9		explain the change or the reasons for the change?
10	A.	(Goulding) Yes. So, in 13-275, we received an order
11		from the Commission that directed the Company to
12		develop a forecasted migration. So, for the
13		September 15th filing, we filed the forecasted
14		migration consistent with the order. And, then, based
15		on the trends that we are seeing, where customers are
16		migrating back in the high priced months, and leaving
17		in the lower priced months, we incorporated that
18		migration forecast into our December 15th rate update.
19	Q.	And, that was the migration forecast contained in
20		Mr. Plecs's testimony?
21	Α.	(Goulding) That's correct.
22	Q.	Since you mentioned, I'll ask you also, you described
23		an under recovery of \$13 million as part of the
24		December update. Could you explain the reasons for
		{DE 14-235} {12-18-14}

1that under recovery.2A. (Goulding) That under recovery was driven primarily by3migration in the months of August, September, and4October. So, it resulted in less sales.5Q. Mr. Goulding, is it the Company's position that the6rate that is proposed for effect on January 1st as7contained in this filing is a just and reasonable rate?8A. (Goulding) Yes, it is.9MR. FOSSUM: And, with that, I'll make10them11CHAIRMAN HONIGBERG: Mr. Fossum, do you12want to ask at all about Exhibit 3 in this hearing?13MR. FOSSUM: I apologize. Yes, I do. I14very much should have, and I apologize for that.15BY MR. FOSSUM:16Q. Mr. Goulding, then could you please explain very17briefly what Exhibit 3 is?18A. (Goulding) So, Exhibit 3, on Page 1, is the percent19about the Energy Service rate right here. So, if you20go to the "Energy Service" column, you'll notice the216.9 percent change for Residential rate, 6.9 percent			[WITNESS PANEL: Goulding~White~Plecs]
migration in the months of August, September, and October. So, it resulted in less sales. Q. Mr. Goulding, is it the Company's position that the rate that is proposed for effect on January 1st as contained in this filing is a just and reasonable rate? A. (Goulding) Yes, it is. MR. FOSSUM: And, with that, I'll make them CHAIRMAN HONIGBERG: Mr. Fossum, do you want to ask at all about Exhibit 3 in this hearing? MR. FOSSUM: I apologize. Yes, I do. 17 briefly what Exhibit 3 is? 18 A. (Goulding) So, Exhibit 3, on Page 1, is the percent 19 change in each rate component. And, we're talking 20 about the Energy Service rate right here. So, if you 21 go to the "Energy Service" column, you'll notice the 22 6.9 percent change for Residential rate, 6.9 percent	15	BY M	R. FOSSUM:
18 A. (Goulding) So, Exhibit 3, on Page 1, is the percent 19 change in each rate component. And, we're talking 20 about the Energy Service rate right here. So, if you 21 go to the "Energy Service" column, you'll notice the 22 6.9 percent change for Residential rate, 6.9 percent	16	Q.	Mr. Goulding, then could you please explain very
19 change in each rate component. And, we're talking 20 about the Energy Service rate right here. So, if you 21 go to the "Energy Service" column, you'll notice the 22 6.9 percent change for Residential rate, 6.9 percent	17		briefly what Exhibit 3 is?
 about the Energy Service rate right here. So, if you go to the "Energy Service" column, you'll notice the 6.9 percent change for Residential rate, 6.9 percent 	18	Α.	(Goulding) So, Exhibit 3, on Page 1, is the percent
21 go to the "Energy Service" column, you'll notice the 22 6.9 percent change for Residential rate, 6.9 percent	19		change in each rate component. And, we're talking
22 6.9 percent change for Residential rate, 6.9 percent	20		about the Energy Service rate right here. So, if you
	21		go to the "Energy Service" column, you'll notice the
2.3 change for General Service rate, and down the line it's	22		6.9 percent change for Residential rate, 6.9 percent
	23		change for General Service rate, and down the line it's
a 6.9 percent change, because the revenues generated by	24		a 6.9 percent change, because the revenues generated by

		[WITNESS PANEL: Goulding~White~Plecs]
1		that class, under the old rate compared to the new
2		rate, is a 6.9 percent change, because everyone is
3		charged on a per kWh basis.
4	Q.	And, the second page of that exhibit is demonstrating?
5	Α.	(Goulding) The second page is how much percent change
6		of total revenue for each class. So, for Residential
7		class, of the total customer's bill, the Energy Service
8		rate change is going to have a 3.8 percent change on
9		their total bill. So, it's an increase in the total
10		bill by 3.86 percent.
11	Q.	And, just for clarity, if I look at the third to the
12		last column labeled "Total Delivery Service", and the
13		"Energy Service" column next to it, those two changes
14		combined make up the changes that are noted in the last
15		column labeled "Total Revenue"?
16	Α.	(Goulding) That's correct.
17	Q.	And, finally, could you explain the final page of
18		Exhibit 3 please.
19	Α.	(Goulding) So, the final page of Exhibit 3 is a typical
20		bill comparison for a residential customer. And, what
21		it shows is the total bill for a customer taking the
22		usage specified in Column 1. So, the total bill
23		effective July 1st, and what their total bill would be
24		effective July 1st taking that same usage. And, then,

		[WITNESS PANEL: Goulding~White~Plecs]
1		the next column shows the change in dollars between the
2		old rate and the new rate, and the percent change in
3		the total bill from the old bill to the new bill. And,
4		this incorporates all three rate changes that we're
5		proposing for January 1st. It incorporates the
6		Distribution rate change, the Stranded Cost Recovery
7		Charge rate change, and the Energy Service rate change.
8	Q.	So, just two questions for clarification. I believe I
9		heard you say that the effective was showing the
10		difference between July 1 of 2014 and July 1 of '15,
11		but it's for January 1st, is that correct?
12	Α.	(Goulding) January 1st, 2015.
13	Q.	And, the other question is this, the typical bill
14		comparison, the amounts shown there, those presume that
15		a customer is taking energy service from Public
16		Service, is that correct?
17	Α.	(Goulding) That's correct.
18	Q.	And, so, if a customer is not taking energy service
19		from PSNH, these numbers would be somewhat different?
20	Α.	(Goulding) They would, yes.
21		MR. FOSSUM: Thank you. And, with that,
22	I	will make them available for cross.
23		CHAIRMAN HONIGBERG: Ms. Chamberlin.
24		MS. CHAMBERLIN: Thank you.
		(DE 14 225) (12 10 14)

		[WITNESS PANEL: Goulding~White~Plecs]
1		CROSS-EXAMINATION
2	BY I	MS. CHAMBERLIN:
3	Q.	The September proposal was an expectation of an 11
4		percent decrease in the rate, correct? I guess
5		Mr. Goulding.
6	Α.	(Goulding) Did you say an "11"
7	Q.	Well, it was a decrease. It went from the proposal
8		was from 9.87 to 9.61, is that
9	Α.	(Goulding) That's correct, a decrease in the rate.
10	Q.	And, your December update is an increase of about a
11		dollar? From the 9 to the 10?
12	A.	(Goulding) Yes, roughly 0.75 cents or somewhere around
13		there.
14	Q.	The major driver of that significant difference is the
15		change in the forecasting methodology for migration, is
16		that correct?
17	Α.	(Goulding) That's one of the drivers. The other major
18		drivers are, there was a roughly \$13 million forecasted
19		under recovery at the end of 2014 that wasn't forecast
20		for the 9.61 cent rate. So, that \$13 million is
21		roughly a 0.3 cent increase in the rate. Additionally,
22		there was an updated load forecast that was
23		incorporated into the December 15th filing, where there
24		was a decrease in load of approximately 1.4 percent.

{DE 14-235} {12-18-14}

		[WITNESS PANEL: Goulding~White~Plecs]
1		And, which was so that change right there was an
2		approximate 0.3 cent change in the rate. And, then,
3		the remaining change was due to the updating of the
4		migration. It wasn't all associated with changing the
5		forecasted migration forecasted migration
6		methodology, because our migration rate changed in the
7		initial filing from 50.2 percent, down to up to
8		51.7 percent using forecasted migration.
9	Q.	The decrease in load that you just mentioned, is that
10		separate from migration or is that caused by migration?
11	Α.	(Goulding) No. It's completely separate from
12		migration.
13	Q.	So, that would just be lower sales due to the economy
14		or whatever?
15	A.	(Goulding) Yes.
16	Q.	All right. The 13 million under recovery, the new
17		forecasting methodology increases accuracy, so it
18		should decrease under recoveries. Is that
19	Α.	(Goulding) That would be the expectation.
20	Q.	That is the expectation, okay. So, this significant
21		rate impact shouldn't happen again. We'll find out,
22		because this is a new proposal, but that's, you know,
23		that's what we're hoping for?
24	Α.	(Goulding) Correct. The rate impact associated with
		$\{ DF 14-235 \} \{ 12-18-14 \}$

		[WITNESS PANEL: Goulding~White~Plecs]
1		the under recovery should hopefully be mitigated.
2	Q.	So, this will be a better matching between the people
3		who are actually paying the rate and the people who are
4		causing the rate to be whatever it is, it's just a
5		better match?
6	Α.	(Goulding) Yes.
7	Q.	Okay. Turning to Page 2 of Exhibit 2, it's the
8		December 15th filing. And, the middle of the page is
9		Paragraph D, "Changes". And, it's "Attachment CJG-2,
10		Page 3". Can you go through, and I'll just walk you
11		through, on Line 1 you're talking about "coal fuel
12		expense". Can you explain the difference in the
13		projections?
14	Α.	(White) In this filing, in the projection that's filed
15		here, coal generation increased, because there was an
16		increase in forward energy market prices. And, the
17		projections are based on economic dispatch modeling of
18		the units. So, as the value of energy increases due to
19		the forward energy market increase, the coal generators
20		are projected to run more and produce more
21		megawatt-hours, increasing their fuel cost.
22	Q.	So, the price of coal itself, it may have gone up a
23		little bit, but not a lot?
24	Α.	(White) The price of delivered coal went up a little

		[WITNESS PANEL: Goulding~White~Plecs]
1		bit in this projection, but not as much as the market
2		prices for energy went up.
3	Q.	And, moving to Line 2, this is referring to Schiller 5
4		operation, correct?
5	Α.	(White) That's correct.
6	Q.	And, can you explain why the wood generation is
7		projected to decrease?
8	Α.	(White) We, through time, are always reviewing
9		assumptions that go into our projections. And, in
10		doing so, we made a decrease to the megawatt output
11		level for the Schiller units, to be more reflective of
12		their daily operating levels. We had been using a
13		qualified capacity megawatt level, which the unit has
14		the capability to generate, but it's not as
15		reflective it's not completely reflective of the way
16		we operate on a daily basis and how we offer the unit
17		to ISO-New England. So, we made that adjustment to
18		lead to a more accurate projection.
19	Q.	So, the actual operation of Schiller 5 is not expected
20		to change. You are incorporating a better estimate of
21		that actual operation?
22	Α.	(White) That's correct. Actual operations have not
23		changed.
24	Q.	And, in Line 3, we're talking about the Newington plant
		{DE 14-235} {12-18-14}

		[WITNESS PANEL: Goulding~White~Plecs]
1		generation. And, can you explain the increase?
2	Α.	(White) Again, the fuel that Newington burns follows
3		market prices. It's more volatile than, for example,
4		coal prices. And, what's happened in this projection
5		is, energy prices went up, the cost of natural gas,
6		which is its primary fuel these days, also went up, but
7		to a lesser degree than the energy market prices. So,
8		Newington dispatched more, really, for very similar
9		reasons as the coal generation increase.
10		I'll also note that, in January through
11		March in this projection, I talk about natural gas, the
12		more economic fuel in January through March is actually
13		oil. So, the projection is Newington is burning oil in
14		those months.
15	Q.	And, do you expect Newington to run after the winter
16		period in April on oil or gas?
17	Α.	(White) Both fuels are always available for dispatch.
18		And, we operate the unit on the more economic fuel.
19		The expectation is that, after the winter period,
20		natural gas will be the more economic fuel, and that
21		generation beyond March will be fired with natural gas.
22	Q.	On the same page, Paragraph Number 4, you talk about
23		the "IPP energy expenses". These are the wood plants,
24		that does not include the Burgess Biopower Plant, is

		[WITNESS PANEL: Goulding~White~Plecs]
1		that correct?
2	Α.	(White) No. That's not correct.
3	Q.	Oh.
4	Α.	(White) These are not the wood plants. Those contracts
5		have terminated. These are what I'll refer to as the
6		"original IPPs", that have been under rate orders for
7		quite some time. Most of them are very small hydro
8		units. But the wood IPPs are no longer in the
9		portfolio.
10	Q.	Okay. So, the small hydros, are these contracts do
11		they have an expected end date or are they just
12		continuous?
13	Α.	(White) There are many different units. I'm going to
14		put it in the neighborhood of 25, and they have varying
15		expiration dates. These are the these are the
16		resources that flow through Energy Service at actual
17		energy market prices. And, the difference between that
18		and their contract prices is collected through the SCRC
19		charge.
20	Q.	So, what makes up their energy expense, if they're
21		hydro?
22	Α.	(White) Well, they have contracts with Public Service
23		of New Hampshire at a fixed rate, or some of them
24		simply have the ability to flow their energy through

1		[WITNESS PANEL: Goulding~White~Plecs]
1		the Energy Service portfolio so as to receive energy
2		revenues from ISO-New England. But the cost that's in
3		Energy Service is the energy value at the time they're
4		producing energy. They're also the difference
5		between that and their contract rate, is the
6		over-market portion, is paid through the SCRC.
7	Q.	Okay.
8	Α.	(White) So, the costs here are the projected value of
9		energy that they're going to produce.
10	Q.	And, turning the page to Paragraph Number 5, there is a
11		projected reduction for the Burgess Biopower
12		generation. Could you explain that please.
13	Α.	(White) The reduction is two gigawatt-hours. It's
14		relatively small, and all of it occurs in the month of
15		January. And, it's due to ISO-New England informing
16		the unit that, due to transmission work through
17		mid-January, on a day-to-day basis, they may have be
18		limited to 60 megawatts of output, which is a roughly
19		10 percent reduction from their rated output. And, so
20		given that notification, we have modeled that reduction
21		into the projections.
22	Q.	And, how is the Burgess Biopower plant operating these
23		days? Is it operating generally at full capacity?
24	Α.	(White) They have been operating on a stable basis

		[WITNESS PANEL: Goulding~White~Plecs]
1		since the September timeframe. A few typical hiccups
2		here and there. They recently came back from a six-day
3		planned maintenance outage to tune up and prepare for
4		the winter period. They came back on line this past
5		Sunday, and have been operating well since then.
6	Q.	And, by "September", you mean "September 2014"?
7	Α.	(White) That's correct.
8	Q.	This year?
9	Α.	(White) Yes.
10	Q.	On Line 6, there is discussion of a "fixed price
11		purchase for peak energy in May". Can you describe why
12		PSNH thought that was a good idea?
13	Α.	(White) Our coal resources are not projected to operate
14		in the month of May. And, so, there is a gap between
15		the resource level and the projected load level. There
16		was an opportunity to lock in savings versus our coal
17		generation resources. So, we did so, 100 megawatts of
18		on-peak power, at a price below the cost of coal
19		generation. So, for a portion of the gap, we locked in
20		a portion of those megawatt-hours at a level below our
21		alternative source of energy.
22	Q.	And, is this a typical practice of PSNH or is this an
23		unusual opportunity that you received?
24	Α.	(White) This is a typical practice. We periodically

1		[WITNESS PANEL: Goulding~White~Plecs]
1		review the portfolio looking out a year. And, we
2		usually contemplate any market purchases over the next
3		six months, because prices can move around a fair
4		amount. And, so, during a recent review, we looked
5		closely at April, May, and June, and made a
6		determination that prices were \$10 at least below the
7		cost of coal generation. So, we locked in a portion of
8		that. So, it's a review and a that we go through
9		several times a year.
10	Q.	Then, the last sentence of that Paragraph 6 says "The
11		decreases in purchases and sales are primarily due to
12		higher generation and lower loads." Is it "higher
13		generation", is there supposed to be a word in there,
14		like "costs" or something, or "amount of" or, just
15		the fact that you are generating more? If you could
16		just explain that sentence, that would be helpful.
17	A.	(White) Okay. I think it is most easily understood by
18		referring back to Item 1, where we talk about the
19		"increase in coal generation". And, that's the higher
20		generation that's referred to here. Since our units
21		are providing energy to serve default load, it has
22		replaced the need to make spot purchases from the
23		energy market.
24		Likewise, lower loads, over the course

		[WITNESS PANEL: Goulding~White~Plecs]
1		of the year, results in the same outcome. That there's
2		less need for spot energy market purchases.
3	Q.	And, moving to Line 7, can you just describe the
4		interaction between RGGI, congestion, and loss
5		adjustments?
6	Α.	(White) Okay. RGGI is simply, when there is more
7		generation at our fossil units, there are more
8		emissions. And, so, the cost for RGGI allowances goes
9		up a commensurate amount.
10		Regarding congestion and loss
11		adjustments, again, related to more generation at our
12		plants, there is a cost to move the energy from the
13		pricing nodes where the generators put power on the
14		system to the load zone where the load resides. So,
15		this is capturing the congestion and loss difference
16		between the generation nodes and the New Hampshire load
17		zone, where the load where the load is located.
18	Q.	When you're when PSNH is making the decision whether
19		or not to run its own plants or purchase from the
20		market, all of these elements are taken into
21		consideration, correct?
22	Α.	(White) Yes. That's correct.
23	Q.	I mean, some of these increase the cost, as in
24		increased fuel expense, others decrease the cost, as in

		[WITNESS PANEL: Goulding~White~Plecs]
1		it's less than market, and you have to balance all of
2		those out?
3	Α.	(White) Yes. We our goal is to operate our units in
4		the most economically efficient manner that we can,
5		incorporating all cost components and all revenue
6		components for producing energy.
7	Q.	Okay. And, looking at Paragraph numbered 8, I think
8		we've talked about the changes in sales. Could you
9		just quickly summarize that.
10	Α.	(White) Well, overall, the base load forecast
11		decreased. And, in addition, average generate
12		average migration rate in the September filing was
13		50.2 percent. Average generate average migration
14		rate over the course of the year, 2015 in this filing,
15		is 51.6 percent. It now has a monthly pattern. But
16		the decrease in the base load forecast and the increase
17		in generate in migration has LED to a lower load and
18		lower sales levels. And, that's detailed in the table
19		at the top of Page 4 of the Technical Statement, which
20		is part of Item 8.
21	Q.	And, this entire filing shows the sensitivity of the
22		Energy Service rate to migration. Is that a fair
23		characterization?
24	Α.	(White) I'm sorry. Would you say that again please.
		(DF 1/-235) (12-18-1/)

26

		[WITNESS PANEL: Goulding~White~Plecs]
1	Q.	Well, these changes in the Energy Service rate in this
2		filing shows the sensitivity of the Energy Service rate
3		to migration. Is that a fair characterization?
4	Α.	(White) Yes. And, in particular, the monthly migration
5		pattern. Yes.
6	Q.	And, have you projected in the future whether this
7		monthly pattern is going to change?
8	Α.	(White) I would say, as long as the current monthly
9		price patterns in the energy market stays like it is,
10		where it's very high in the winter and much lower in
11		the shoulder and summer periods, we would expect
12		migration to behave similarly, except for the fact that
13		we've that's going to be mitigated, we hope, due to
14		implementation of Rate ADE, which is effective on
15		January 1st.
16	Q.	So, this filing does not incorporate any of the changes
17		to Rate ADE? I thought that was a softball.
18	Α.	(Goulding) No, it isn't.
19	Α.	(White) I think that's fair to say, yes.
20	Q.	Okay. And, just to complete the review, turning to
21		Page 4, "ISO-New England Ancillary expenses", can you
22		describe what those are?
23	Α.	(White) They include all the administrative expenses
24		that ISO-New England charges to load. And, they also

		[WITNESS PANEL: Goulding~White~Plecs]
1		include classic ancillaries, which would be things like
2		automatic generation control, forward reserves,
3		real-time reserves, those ancillary services that are
4		provided by generation units, the costs of which are
5		charged to load.
6	Q.	And, you receive you receive some revenue from
7		ISO-New England as well, correct?
8	Α.	(White) Yes. Our generation resources receive some
9		revenues for forward reserves, real-time reserves,
10		Black Start, and VAR services, yes.
11	Q.	And, are they captured in that Paragraph Number 9 or
12		are they reflected elsewhere?
13	Α.	(White) I believe those are all captured in Item 9.
14		So, that is those are net figures. Also included in
15		that item is the Winter Reliability Program.
16	Q.	And, can you describe the difference between this
17		year's Winter Reliability Program and last year's
18		Winter Reliability Program?
19	Α.	(White) In terms of the projected economics or
20	Q.	Yes.
21	Α.	(White) Last year, I believe we realized over
22		\$2 million in net benefits for ES customers through
23		participating in the program with our Newington unit.
24		This year, they have modified the program. It has

		[WITNESS PANEL: Goulding~White~Plecs]
1		different working parameters. And, the outcome of this
2		year's program is not as it's not as definable up
3		front as it was last year. What we have modeled for
4		economics this year is 2.6 million of costs to load,
5		because the costs throughout the region of running the
6		program gets charged back to all load. So, there's 2.6
7		million of costs to ES customers. And, we have modeled
8		2.8 million of revenues to our Newington unit through
9		participation in the program. So, the net is a
10		\$200,000 benefit to ES customers in the projection.
11		We hope and have a fair expectation that
12		the benefits will be greater than that. But, without
13		the winter playing through, it's just not as easy to
14		predict. Whereas, last year we were more comfortable
15		predicting greater net benefits in the rate, which we
16		did realize.
17	Q.	And those, if the benefits are greater than projected,
18		they will show up in the next Energy Service filing?
19	Α.	(White) I would expect that all the billing will be
20		completed in time for our July 1st update filing, yes.
21	Q.	And, the "Domestic Manufacturing Deduction Credit",
22		that's a tax credit, is that correct?
23	Α.	(Goulding) "Domestic Manufacturing Deduction Credit" is
24		a deduction that we're able to take on our Federal Tax

		[WITNESS PANEL: Goulding~White~Plecs]
1		return that results in a reduction to expense.
2	Q.	And, that's not new legislation. It's available to
3		PSNH this time because of why?
4	Α.	(Goulding) It wasn't available it was available in
5		2014, we had about \$600,000 that we forecast into our
6		Energy Service filing in this Energy Service filing
7		for 2014. Prior to that, it was not available, because
8		PSNH had a net operating loss. And, when you have a
9		net operating loss, you can't take the deduction,
10		because there's no income to deduct against. And, that
11		net operating loss was primarily driven from 2011,
12		where there was a 100 percent bonus depreciation, and
13		the Company had large Scrubber Project go into service
14		in 2015, along with other investments.
15	Q.	Do you have any expectation of getting this deduction
16		in the future?
17	Α.	(Goulding) Depends what happens with legislation
18		changes. I would assume that we would get it, but I'm
19		not comfortable with saying "yes" or "no".
20	Q.	Well, assuming legislation stays the same, in terms of
21		you're operating, would you expect to continue to get
22		it?
23	Α.	(Goulding) As long as there's no net operating losses,
24		then we would get the deduction or, the credit.
		$\int \mathbf{F} = 1/2351 + 12 - 18 - 1/1$

		[WITNESS PANEL: Goulding~White~Plecs]
1	Q.	And, you can't predict right now whether or not you
2		expect net operating losses in the future?
3	Α.	(Goulding) I don't I can not, can not predict.
4	Q.	Okay. Line Paragraph Number 10 talks about the "RPS
5		expense". Can you explain the relationship between
6		"RPS expense" and "lower loads"?
7	Α.	(White) As a load-serving entity, we are required to
8		possess allowances in the various Renewable Portfolio
9		Standard classes based on the level of sales that we
10		serve. And, since our projected level of sales has
11		decreased, so has the RPS expense associated with it.
12	Q.	And, Line 11, "capacity expenses". And, can you
13		explain why they increased?
14	A.	(White) They increased because the projection includes
15		greater total megawatts of capability responsibility.
16		When we went to the monthly pattern of migration on
17		energy, we reviewed the like statistic for capacity,
18		and the historical relationship between capacity
19		migration and energy migration. And, in updating that
20		relationship to be consistent with the monthly
21		migration pattern for energy, we updated the migration
22		pattern for capacity, which resulted in a half a
23		million dollar increase in net capacity expense.
24		Overall, capacity market still provides a credit to ES.

		[WITNESS PANEL: Goulding~White~Plecs]
1		But the change from the September filing is half a
2		million dollars.
3	Q.	And, a good segue into the forecasting methodology.
4		Mr. Plecs, could you describe what you rely on to make
5		the new forecasting methodology for the migration?
6	Α.	(Plecs) Sure. The best place to start for that is in
7		the September 15th filing. If you look at Attachment
8		CAP-2. So, what's in Attachment CAP-2 is a chart
9		showing the historical migrated load and the historical
10		NYMEX forward electricity prices. So, the reason I
11		think this is so important to look at is, what we see
12		here is every time the NYMEX forward prices go up, the
13		migrated load goes down. So, that's effectively the
14		relationship that we're relying on to assemble the
15		forecast of future migrated loads. So, we start by
16		establishing the relationship with historical data as
17		shown in this chart, and then we get a forecast of
18		future NYMEX forward prices excuse me, that's not
19		actually a forecast, that's actually the forward
20		prices, they're quoted on the New York Exchange. And,
21		we carry forward the relationship that was established
22		in the history applied to the future forward prices to
23		get a future migrated load.
24	Q.	And, if there is a change in the market, so that there
		$\{ DE 14 - 235 \} \{ 12 - 18 - 14 \}$

		[WITNESS PANEL: Goulding~White~Plecs]
1		is no longer such a big difference between the winter
2		prices and the summer prices, would you expect your
3		forecast to capture that change? Let's say somebody
4		builds a big pipeline, and now we can get natural gas
5		and
6	Α.	(Plecs) Let me simplify my answer a little bit. So,
7		any time the historical relationship would suggest
8		that any time energy prices go up, migrated loads go
9		down. So, if a new pipeline were to eliminate seasonal
10		changes in energy prices, then I would expect that new
11		pipeline would also change migration levels.
12		MS. CHAMBERLIN: Thank you. That's all
13	I have.	
14		CHAIRMAN HONIGBERG: Ms. Amidon.
15		MS. AMIDON: Thank you. Good morning.
16	BY M	S. AMIDON:
17	Q.	One of the reasons, and I guess I direct this question
18		at Mr. Goulding, one of the reasons that, in the
19		Technical Statement of December 15th, the Company
20		decided to use the forecast customer migration prepared
21		by Mr. Plecs is because Staff said it supported that.
22		Is that correct?
23	Α.	(Goulding) Yes.
24	Q.	And, my understanding is that Staff supported it

		[WITNESS PANEL: Goulding~White~Plecs]
1		because of similar reasons that what you say in the
2		Technical Statement, in other words, the probable
3		effect will be to lower any under recoveries in future
4		Default Service filings, is that right?
5	Α.	(Goulding) That's correct.
6	Q.	And, the discussion of Newington, which is on Page 2,
7		and I believe, Mr. White, you're the appropriate person
8		for this question, is this increased Newington
9		generation, does that factor in the Winter Reliability
10		Program or is this outside of the Winter Reliability
11		Program?
12	Α.	(White) It's independent of the Winter Reliability
13		Program.
14	Q.	And, it's mainly due to market prices, is that correct,
15		forward market prices?
16	Α.	(White) Yes. The relationship between forward market
17		prices and dispatch costs.
18	Q.	Thank you. And, I believe, Mr. White, you're also, and
19		correct me if I'm wrong, responsible for the table, the
20		"Forward Electricity Prices" that appear at the top of
21		Page 3 in the December 15th Technical Statement. Is
22		that your work?
23	Α.	(White) Yes.
24	Q.	And, if I look at the two filings, September 15th rates

		[WITNESS PANEL: Goulding~White~Plecs]
1		were based on August 20th prices, is that right?
2	Α.	(White) That's correct.
3	Q.	And, the December 15th rates were based on
4		November 20th prices, is that right?
5	Α.	(White) That's correct.
6	Q.	Do you believe that those November 20th price forecasts
7		are still accurate as of today and should be used in
8		this analysis?
9	Α.	(White) I think they are a reasonable projection of
10		prices for 2015. Current more current forward price
11		curves are have decreased from this level. And, it
12		seems that forward quotations are sensitive to weather
13		and many other market perceptions. It might be
14		interesting, when we get some real winter weather, how
15		those forward curves may change. It is this is
16		above current levels, but I still feel it's a
17		reasonable assumption for setting a rate for 2015.
18	Q.	Well, just by way of example, how much above current
19		forecast is the January rate of 148.3?
20	Α.	(White) Well, more current for the whole calendar
21		strip, I don't have it by month,
22	Q.	Okay.
23	Α.	(White) but recent prices earlier this week were
24		about 11 percent lower than the November 20th prices.
		$\{ DE 14 - 235 \} \{ 12 - 18 - 14 \}$

		[WITNESS PANEL: Goulding~White~Plecs]
1	Q.	And, that's for the whole calendar strip?
2	Α.	(White) That's the whole calendar strip. That's
3		roughly \$7 a megawatt-hour.
4	Q.	Okay. Thank you. That's what I was looking for. And,
5		I believe this is to you again, Mr. White. But Burgess
6		Biopower has a separate line item here, because it's
7		different than the IPPs, is that pricing or how the
8		prices are paid is in a different category than the
9		IPPs, is that right? I mean, all if I understand
10		this and remember the Burgess contract, this is the
11		point I'm getting at, energy, capacity, and the value
12		of the RECs that PSNH purchases from Burgess Biopower
13		are all in the Energy Service rate, is that right?
14	Α.	(White) Yes. That's correct. It's a fixed price
15		contract, and all costs flow through Energy Service.
16	Q.	And, so, there's nothing that is going into the SCRC?
17	Α.	(White) That's correct.
18	Q.	Thank you. If we go to Page 6 of the December 15th
19		update, Mr. Goulding, I believe you have here the
20		individual elements in the contribution to costs. For
21		example, if I look at Line 17, there is it's "New
22		Hampshire RPS". Are you there?
23	Α.	(Goulding) Yes, I am.
24	Q.	Okay. And, the total cost is "21,535,000", is that

36

	-	[WITNESS PANEL: Goulding~White~Plecs]
1		right?
2	Α.	(Goulding) That's correct.
3	Q.	But, if you put that in terms of a cents per
4		kilowatt-hour, that's over half a cent, right? It's
5		0.56 cents?
6	Α.	(Goulding) Yes.
7	Q.	Could you explain why there is such a significant cost
8		for the 2015 RPS compliance? And, I'm not asking you
9		to, you know, release any confidential information.
10		I'm just asking for, in general terms, where the
11		Company sees the cost causers in that factor?
12	Α.	(Goulding) I believe what was driving that was the
13		Class III REC requirement in 2014 was 3 percent of
14		sales and, for 2015, it's 8 percent of sales. So, our
15		alternative compliance and, also the alternative
16		compliance price, I believe, changed from \$32 to \$45
17		for ACP.
18	Q.	This is for Class III? Or overall?
19	Α.	(White) For Class III.
20	Q.	Okay. And, if any of that is confidential, we can
21		address that in the record. I'm not sure if it is.
22	Α.	(White) No. I think it's based on regulation.
23		Actually, in prior years, I guess it's the Legislature
24		has adjusted those parameters after-the-fact. They

		[WITNESS PANEL: Goulding~White~Plecs]
1		have not done so or indicated they're going to do so
2		for 2015.
3	Q.	And, if I understand correctly, too, the Class III New
4		Hampshire qualified RECs also find a market outside of
5		this state at higher levels, is that fair to say? At
6		higher prices?
7	Α.	(White) I'm not sure I can answer. I'm not aware that
8		there's much difference for Class III throughout the
9		region. I think every state's, what's considered
10		"various classes" is different. I can't speak very
11		knowledgeably about that, those specifics.
12	Q.	I think you are refreshing my recollection. Class III
13		is those wood facilities that were in existence as of
14		2006. So, there are a limited number of eligible
15		facilities, if I remember the legislation. I
16		apologize
17	Α.	(White) Right.
18	Q.	if I confused you. But 0.56 cents is half a cent
19		is a fairly significant contribution to rates, wouldn't
20		you say?
21	Α.	(White) It's 0.56.
22	Q.	Well, I couldn't ask for a better answer. And, the
23		increase
24	Α.	(White) It may be less than other states, actually.

		[WITNESS PANEL: Goulding~White~Plecs]
1	Q.	But the increase in the cost for PSNH is about double
2		of what it was last year?
3	Α.	(White) Subject to check.
4	Q.	Okay.
5	Α.	(White) I'll take your word for it.
6	Q.	All right. And, on Line 18 on that exhibit, it shows
7		the "RGGI costs". So, and this is because, if I
8		understand it correctly, all RGGI are paid through
9		Energy Service, but the excess amounts over a dollar
10		come back through the SCRC. Is that right?
11	Α.	(Goulding) That's correct.
12	Q.	Okay. Thank you. And, then, again, as I previously,
13		on Line 20, about the Berlin Station, all of the costs
14		flow through the Energy Service rate. So, that's why
15		the Berlin Station contribution is 0.89 cents per
16		kilowatt-hour, is that right?
17	Α.	(Goulding) Yes. There's no costs in the SCRC.
18	Q.	Okay. Thank you. One minute please. If I turn to
19		Bates stamp 008 of that December filing, it's CJG-2,
20		Page 2, let me know when you're there.
21	Α.	(Goulding) Okay.
22	Q.	On Line 14, it says "Return" it's "Return on rate
23		base", that's what constitutes Line 15 [14?]. And,
24		these for the months this is just a partial year,

40

		[WITNESS PANEL: Goulding~White~Plecs]
1		but I'm just referring to this for this purpose. Could
2		you explain how you calculate the return on rate base
3		and what capital structure the Company used in this
4		filing, and whether that will be changing any time
5		soon?
6	Α.	(Goulding) Okay. So, the capital structure used in
7		here has a return on equity percent of 9.81 percent.
8		And, the equity and debt split, which was the most
9		recent quarters on the books, which was Q3, was
10		54.8 percent equity and 45.2 percent debt.
11	Q.	And, you update that on a quarterly basis?
12	Α.	(Goulding) Yes. We update it on a quarterly basis
13		based on the books.
14	Q.	Do you have any idea at this point whether the capital
15		structure will change for the fourth quarter?
16	Α.	(Goulding) Yes. There was an issuance of about I
17		believe it was \$75 million of long-term debt. So, that
18		change would change the capital structure from 45
19		percent debt to 47 percent debt, and from 54 roughly
20		54 and a half percent equity down to 53 percent equity.
21	Q.	Okay. Thank you. Again, looking at the December 15th
22		filing, at Bates 019, at CJG-4, Page 6. And, let me
23		know when you're there.
24	Α.	(Goulding) Okay.

		[WITNESS PANEL: Goulding~White~Plecs]
1	Q.	Okay. So, on Line 16, it says "Working Cap. Allowance
2		(45 days of O&M)". Why does the Company use 45 days,
3		instead of conducting an independent lead/lag study?
4	Α.	(Goulding) I believe that's a calculation that's
5		consistent with past filings. I don't have an answer
6		on why, and if there was an order that issued order
7		issued that directed us to calculate it that way.
8	Q.	Let me just ask you this. Are you the right person to
9		answer this question? Or is it something that I
10		could that could be answered in a record request?
11	Α.	(Goulding) It should be it could be answered in a
12		record request.
13		MS. AMIDON: Is that okay with you,
14	Mr	. Fossum?
15		MR. FOSSUM: Yes.
16		MS. AMIDON: Well, so, my question is,
17	wh	y does the Company use the 45 days of O&M, instead of
18	us	ing a lead/lag study, and whether they can determine, if
19	th	ey used a lead/lag, it would be less than 45 days? And,
20	wh	ile, Mr. Chairman, I don't believe it's essential to the
21	Coi	mmission's ruling on this filing, it would be helpful
22	fo	r Staff to have this information.
23		CHAIRMAN HONIGBERG: Mr. Fossum, do you
24	un	derstand the request?

[WITNESS PANEL: Goulding~White~Plecs] 1 MR. FOSSUM: I believe I do, but I'm not 2 the one who has to answer the question. 3 CHAIRMAN HONIGBERG: But I think you're 4 going to be the one who's speaking for whether you can answer it, so --5 6 MR. FOSSUM: I believe the Company can 7 answer the question, yes. 8 CHAIRMAN HONIGBERG: Okay. So, we'll 9 make that --10 MS. AMIDON: An exhibit? CHAIRMAN HONIGBERG: -- reserve an 11 exhibit for that. That's going to be "Exhibit 4". 12 13 MS. AMIDON: Okay. Thank you. 14 (Exhibit 4 reserved) 15 CHAIRMAN HONIGBERG: Ms. Amidon, do you 16 have a timeline? You say it's not essential for the 17 decision here. When do you want an answer to that 18 question? 19 MS. AMIDON: If it could be provided 20 within the next couple of weeks, that would be helpful. I'm mindful that there's Holiday Season, and I don't want 21 22 to disrupt anybody's schedules because of that. But, in 23 the next two or three weeks would be helpful, by the 24 first -- around the first of the year.

{DE 14-235} {12-18-14}

1 CHAIRMAN HONIGBERG: Mr. Fossum? 2 MR. FOSSUM: Just a moment. 3 (Atty. Fossum conferring with PSNH 4 representatives.) 5 MR. FOSSUM: I guess we can aim for an 6 answer before the first of the year. 7 CHAIRMAN HONIGBERG: Thank you very 8 much. 9 MS. AMIDON: Thank you. Thank you, 10 Mr. Fossum. Thank you, Mr. Chairman. 11 BY MS. AMIDON: 12 Q. Mr. Plecs, I don't know if this question is for you, 13 but how frequently would the Company be updating it's 14 migration forecast? 15 A. (Plecs) As frequently as required for this filing. 16 Q. Does that mean that you would not you would update 17 the forecast for say a July 1 update? 18 A. (Goulding) Yes, that would be the plan. To update it 19 for, I guess, the May 1st filing or, May 15th 11 june. 12 Q. Okay. Very good. Thank you. And, just one question, 13 I think I'm not clear on this. In the December 15th 14 filing, Bates 004, Line 9, where the Company mentio		43 [WITNESS PANEL: Goulding~White~Plecs]
 A (Atty. Fossum conferring with PSNH representatives.) MR. FOSSUM: I guess we can aim for an answer before the first of the year. CHAIRMAN HONIGBERG: Thank you very much. MS. AMIDON: Thank you. Thank you, Mr. Fossum. Thank you, Mr. Chairman. BY MS. AMIDON: Q. Mr. Plecs, I don't know if this question is for you, but how frequently would the Company be updating it's migration forecast? A. (Plecs) As frequently as required for this filing. Q. Does that mean that you would not you would update the forecast for say a July 1 update? A. (Goulding) Yes, that would be the plan. To update it for, I guess, the May 1st filing or, May 15th filing, and then also for the filing that we make in June. Q. Okay. Very good. Thank you. And, just one question, I think I'm not clear on this. In the December 15th 	1	CHAIRMAN HONIGBERG: Mr. Fossum?
 representatives.) MR. FOSSUM: I guess we can aim for an answer before the first of the year. CHAIRMAN HONIGBERG: Thank you very much. MS. AMIDON: Thank you. Thank you, Mr. Fossum. Thank you, Mr. Chairman. EY MS. AMIDON: Q. Mr. Plecs, I don't know if this question is for you, but how frequently would the Company be updating it's migration forecast? A. (Plecs) As frequently as required for this filing. Q. Does that mean that you would not you would update the forecast for say a July 1 update? A. (Goulding) Yes, that would be the plan. To update it for, I guess, the May 1st filing or, May 15th filing, and then also for the filing that we make in June. Q. Okay. Very good. Thank you. And, just one question, I think I'm not clear on this. In the December 15th 	2	MR. FOSSUM: Just a moment.
5 MR. FOSSUM: I guess we can aim for an 6 answer before the first of the year. 7 CHAIRMAN HONIGBERG: Thank you very 8 much. 9 MS. AMIDON: Thank you. Thank you, 10 Mr. Fossum. Thank you, Mr. Chairman. 11 BY MS. AMIDON: 12 Q. Mr. Plecs, I don't know if this question is for you, 13 but how frequently would the Company be updating it's 14 migration forecast? 15 A. (Plecs) As frequently as required for this filing. 16 Q. Does that mean that you would not you would update 17 the forecast for say a July 1 update? 18 A. (Goulding) Yes, that would be the plan. To update it 19 for, I guess, the May 1st filing or, May 15th 20 filing, and then also for the filing that we make in 21 June. 22 Q. Okay. Very good. Thank you. And, just one question, 23 I think I'm not clear on this. In the December 15th	3	(Atty. Fossum conferring with PSNH
 answer before the first of the year. CHAIRMAN HONIGBERG: Thank you very much. MS. AMIDON: Thank you. Thank you, Mr. Fossum. Thank you, Mr. Chairman. BY MS. AMIDON: Q. Mr. Plecs, I don't know if this question is for you, but how frequently would the Company be updating it's migration forecast? A. (Plecs) As frequently as required for this filing. Q. Does that mean that you would not you would update the forecast for say a July 1 update? A. (Goulding) Yes, that would be the plan. To update it for, I guess, the May 1st filing or, May 15th gune. Q. Okay. Very good. Thank you. And, just one question, I think I'm not clear on this. In the December 15th 	4	representatives.)
 7 CHAIRMAN HONIGBERG: Thank you very 8 much. 9 MS. AMIDON: Thank you. Thank you, 10 Mr. Fossum. Thank you, Mr. Chairman. 11 BY MS. AMIDON: 12 Q. Mr. Plecs, I don't know if this question is for you, 13 but how frequently would the Company be updating it's 14 migration forecast? 15 A. (Plecs) As frequently as required for this filing. 16 Q. Does that mean that you would not you would update 17 the forecast for say a July 1 update? 18 A. (Goulding) Yes, that would be the plan. 	22	Q. Okay. Very good. Thank you. And, just one question,
filing, Bates 004, Line 9, where the Company mentions	23	I think I'm not clear on this. In the December 15th
	24	filing, Bates 004, Line 9, where the Company mentions

	[WITNESS PANEL: Goulding~White~Plecs]
1	the "Domestic Manufacturing Deduction Credit". And,
2	you said that that was associated with some operating
3	losses?
4	A. (Goulding) What it is is it's a deduction that you can
5	take against operating income. But, if you don't have
6	operating income, you cannot take the deduction. So,
7	we had net operating losses in 2011, '12, and '13, and
8	some in '14. So, we weren't able to take that
9	deduction in '11, '12, and '13.
10	Q. So, to just for the record, that's PSNH, and not
11	your parent company?
12	A. (Goulding) Correct. The operating losses were related
13	to PSNH.
14	MS. AMIDON: Okay. Thank you. I have
15	no further questions.
16	CHAIRMAN HONIGBERG: Mr. Scott, I'm
17	fairly certain you have questions.
18	COMMISSIONER SCOTT: I'll take that as a
19	compliment. Thank you. Good morning.
20	WITNESS GOULDING: Good morning.
21	WITNESS WHITE: Good morning.
22	COMMISSIONER SCOTT: And, the usual
23	caveat, for me anyways, is whoever feels best to answer,
24	please do so.

		[WITNESS PANEL: Goulding~White~Plecs]
1	BY (COMMISSIONER SCOTT:
2	Q.	I want to talk a little bit more about or understand a
3		little bit more about migration. If, with these
4		increases, but compared to the other sources of
5		electricity, migration back to PSNH is higher than
6		projected, what's the impact of that? What happens
7		then?
8	Α.	(Goulding) Depends on what in the winter months, I
9		guess it depends on what months we're looking at, but,
10		in the higher priced winter months, if there's more
11		migration that comes back to us than we're forecasting,
12		and we're selling into the market, we would sell less
13		into the market, because we would need that to provide
14		to satisfy our Energy Service customers. If we're in a
15		position where we had no surplus sales into the market
16		because of the migration, and we had customers come
17		back, we would have to go source that power from the
18		market at the market prices.
19	Q.	So, in both those scenarios, more migration back would
20		actually increase your costs, does that sound right?
21	Α.	(Goulding) Yes. And, you have a different scenario, in
22		the lower cost lower priced months, if you have
23		higher migration than forecast, and if we were buying
24		all of our power on the market, we would buy less power
		{DE 14-235} {12-18-14}

		[WITNESS PANEL: Goulding~White~Plecs]
1		on the market. But, then, there's the offset to that,
2		because of the higher migration means less customers to
3		spread the fixed cost of generation over, like the O&M $$
4		cost and property taxes.
5	Q.	Okay. So, Rate ADE was mentioned a little bit. If the
6		utility was in a situation where you saw migration come
7		back in the because of pricing for the winter
8		months, and then exit again in the shoulder and summer
9		months, what's the impact of that?
10	Α.	(Goulding) With Rate ADE also?
11	Q.	Well, I mentioned "Rate ADE". If Rate ADE doesn't cure
12		that problem, let's put that pretense there?
13	Α.	(White) I think it's really a comparison on a monthly
14		basis between marginal cost and average cost, and with
15		the average cost essentially being the ES rate. So, if
16		in a month where the marginal cost to provide energy is
17		below the ES rate and customers leave, effectively,
18		that's a credit to ES leaving. But I think that's the
19		dynamic, marginal versus average. And, we see prices
20		above average in the winter and below average, I think,
21		in all the other months, at least in the shoulder
22		months.
23	Q.	Okay. Thank you. The other let me ask you
24		generally. This is a this request, the final

		[WITNESS PANEL: Goulding~White~Plecs]
1		version, December version, is over a 6 percent increase
2		for ratepayers. Can you outline a little bit what kind
3		of communications or what kind of outreach you've done
4		to prepare the ratepayers for this?
5	Α.	(Goulding) I believe when the filing was made there was
6		a press release by the Company. And, then, I know
7		there was some articles in the <u>Union Leader</u> and some
8		other publications out there that talked about the
9		increase in price from the current rate of 9.87 cents.
10		I believe our press release focused on the increase in
11		the Energy Service rate.
12	Q.	And, I have in front of me the September 16th press
13		release. And, one of the key things that, I think, if
14		I were a consumer I would read, is "PSNH anticipates
15		its energy charge will drop slightly next year." Would
16		that be a fair assessment of reading that?
17	Α.	(Goulding) Yes.
18	Q.	So, and we talk about energy efficiency and other
19		conservation measures, but there's not, in a
20		short-term, there's not a lot the ratepayer can do to
21		mitigate any kind of increases, and, again, we've
22		talked a little bit about the expectation for winters
23		are higher. So, one thing they can do, if they know in
24		advance, is they can plan a budget. You know, that's

47

		48 [WITNESS PANEL: Goulding~White~Plecs]
1		not a great solution, but at least they know it's
2		coming. Does that sound right?
3	Α.	(Witness Goulding nodding in the affirmative).
4	Q.	So, is there a way to more I'm a little bit
5		concerned, I guess, because what we're saying is, in
6		September, it looks like, with a lot of caveat, that
7		language, and I see that, PSNH is saying "we're going
8		to have a decrease". In December, now we're saying
9		"okay, we've relooked at it, there will be a slight"
10		or, "an increase." Is there a better way for the
11		future to communicate to the public what the
12		expectations may be? It's a loaded question, right?
13	Α.	(Goulding) I struggle with that one, because the rate
14		that we release in September as part of this filing
15		isn't the rate that's going to get implemented. So, it
16		does send a mixed signal to the customers, because the
17		real rate is the December 15th rate. I guess I've
18		thought about whether it was possible to not have the
19		September 15th initial filing be made public, but it's
20		the way the process is. And, the customers know when
21		the filing goes in, I'm assuming, so they can look to
22		see what the indicative or potential rate is going to
23		be for January 1st.
24	Q.	And, obviously, it's a public filing. So, I'm not
		{DE 14-235} {12-18-14}

1suggesting anything to be withheld. I guess what I am2suggesting is, is maybe, as we look forward, is there a3way to couch our language for the public? And, again,4nobody has a crystal ball, I understand that. But I'm5a little bit concerned that there were mixed messages6sent, if you will.7A. (Goulding) Yes. That inter the Company release8can or, Company media release can be modified to not9sell the rate that's not actually going to be the rate10that's implemented.11COMMISSIONER SCOTT: Okay. I think12that's all I have. Thank you.13BY CHAIRMAN HONIGBERG:14Q. I'd pick up where Commissioner Scott left off. I think15that press release that was released in association16with the September filing had a certain triumphal tone17to it. And, it was in contrast to what else was18happening in the market. And, the message delivered to19PSNH's customers at that time I think would very likely20be misread and was misread by the press that picked it21up. That's a prelude to a question.22How do those things get created? I23mean, is there consultation with the people in Customer24Service about what the press release is going to say?		[WITNESS PANEL: Goulding~White~Plecs]
 way to couch our language for the public? And, again, nobody has a crystal ball, I understand that. But I'm a little bit concerned that there were mixed messages sent, if you will. A. (Goulding) Yes. That inter the Company release can or, Company media release can be modified to not sell the rate that's not actually going to be the rate that's implemented. 		[WITNESS PANEL: Goulding~White~Plecs]
1		Because they're the ones who are going to get the phone
2		calls now, and probably are receiving e-mails like we
3		received, which I'll get to in a second. How are those
4		things created?
5	Α.	(Goulding) There's a as far as I know, there is a
6		Media Relations group that takes the data that we
7		provide them and they develop a press release off it.
8		I think it's consistent with how they have developed
9		the press releases in the past, and talk about the
10		potential rate changes and what the rate changes are.
11	Q.	And, they're always very careful to be accurate, aren't
12		they?
13	Α.	(Goulding) Yes. So, the data does match the filing.
14	Q.	How much involvement, if any, do the people on the
15		front lines who deal with customers, how much
16		involvement do they have in the development of press
17		releases, to your knowledge?
18	Α.	(Goulding) I'm not sure.
19	Q.	And, as I indicated, we have received some e-mails from
20		your customers. Obviously, there's often a great
21		mismatch between what the public understands is
22		happening and what may actually be happening, and
23		that's reflected in some of the e-mails that we've
24		received. But these people are probably going to call

	[WITNESS PANEL: Goulding~White~Plecs]
1	your office as well. Have the customer relations
2	people been prepared for an increased call volume as
3	the rate changes get become better known?
4	A. (Goulding) Well, when the filing goes in, our Rates
5	group does send them over the rate change, with all
6	information on why the rate changes and what's driving
7	the rate changes, so they should be to prepare them
8	for the increased call volume that could occur.
9	CHAIRMAN HONIGBERG: I think that's all
10	I have.
11	Mr. Fossum, do you have any follow-up
12	questions for your witnesses?
13	MR. FOSSUM: I do not. Thank you.
14	CHAIRMAN HONIGBERG: Thank you,
15	gentlemen. We will let you return to your seats. Off the
16	record.
17	(Brief off-the-record discussion
18	ensued.)
19	CHAIRMAN HONIGBERG: Back on the record.
20	So, I assume there's no objection to the striking of ID on
21	the exhibits that we have?
22	(No verbal response)
23	CHAIRMAN HONIGBERG: We've reserved an
24	exhibit number for the data request. Is there any other
	$\int DF = 1.4 - 2.35 \setminus (1.2 - 1.8 - 1.4)$

1	business we need to take up before we let the lawyers sum
2	up?
3	(No verbal response)
4	CHAIRMAN HONIGBERG: Seeing none,
5	Ms. Chamberlin.
6	MS. CHAMBERLIN: Thank you. This filing
7	shows how sensitive the Energy Service rate is to
8	migration figures. The new methodology of forecasting
9	migration should eliminate the large under recovery that
10	we are experiencing in this particular filing. So,
11	overall, the new methodology is an improvement, we
12	believe. We will see how it goes forward. But it more
13	accurately reflects the market on a monthly basis, and
14	should make the Energy Service rate reflect that.
15	I would recommend that the newer lower
16	rates for market prices be implemented. I believe the
17	testimony was that PSNH is using November projections, and
18	now the rates are 11 percent lower. I make that
19	recommendation primarily because this rate is hitting in
20	the wintertime, when the rates are going to be higher.
21	And, so, if there's an accurate forecast methodology that
22	can bring that down a little bit, I think it's worth
23	doing. I'm assuming that, technologically, that that's
24	something that they could do in short notice. I will

1 leave it to PSNH to respond to that. 2 But, otherwise, I believe that the 3 changes made in methodology is an improvement, and that 4 we, within the system we have today, which is that the 5 Energy Service rate is paying -- customers are paying all 6 of the generation costs, which make it very sensitive to 7 migration. Within that framework, this is a better methodology for going forward. 8 9 CHAIRMAN HONIGBERG: Ms. Amidon. 10 MS. AMIDON: Thank you. Staff has 11 reviewed the filing. And, we have determined that the Company has calculated the proposed Energy Service rate in 12 13 the manner that it made previous such calculations. And, 14 we support the filing. We believe that it's consistent 15 with RSA 369-B:3, IV(b)(1)(A), the statute that pertains 16 specifically to PSNH, and that the resulting rates are 17 just and reasonable. 18 Having said that, however, we do -- we 19 did raise the question about the use of the November 20th, 20 2014 price forecast. And, we do believe, as you may have 21 understood from that question, that we think it would be 22 more appropriate to update the rates, if possible, because 23 the most recent information is the most accurate 24 information and will result in rates that are closer to

1	market for these customers. Again, similar to the OCA, we
2	don't know how possible it is for it to make that
3	adjustment.
4	But, certainly, in the future, perhaps
5	as well, the Commission should decide whether, if they're
6	going to make an update on December 15th, if they should
7	be using if they should recommend to the Company to use
8	a date closer to the update, rather than to use one that's
9	almost a month out. That's just a suggestion. We haven't
10	analyzed that in full.
11	Obviously, Staff also supports the
12	customer migration forecast that's prepared by the
13	Company, by Mr. Plecs. We think a lot of thought went
14	into that, and we also support the continued use of it
15	going forward, and have it updated on a six-month basis as
16	the Company suggested.
17	Okay. And, although it's not directly
18	part of this filing, that we're looking forward to getting
19	the response to our record request, and expect that we
20	will be looking forward to the Company actually conducting
21	a Lead/Lag study in the future, to determine whether or
22	not the 45 days is an accurate an accurate data.
23	CHAIRMAN HONIGBERG: Thank you, Ms.
24	Amidon. Mr. Fossum.
-	$\{ DE 14 - 235 \} \{ 12 - 18 - 14 \}$

I	
1	MR. FOSSUM: Thank you. I will begin by
2	stating my agreement with the Staff position that the
3	proposal that the Company has put forth today is
4	consistent, we believe, with the requirements and is a
5	just and reasonable rate. We would request that it be
6	approved as filed.
7	With respect to some of the specific
8	items in the filing, we appreciate the consistent with
9	the Commission's requirement, we had prepared, produced,
10	and filed a forecast of migration, and, with the Staff's
11	support, we've incorporated that forecast of migration
12	into the rate-setting. We believe that to be an
13	appropriate change to the method for establishing the
14	rate, and would request that the Commission, to the extent
15	any approval is necessary, that the Commission grant such
16	approval.
17	As for the issue that has been raised
18	regarding the use of more current energy prices in the
19	setting of the rate, I'll simply say that just it's not a
20	mere change of a single assumption or a single data point
21	within the filing that would need to be accomplished to
22	actually set a rate. If you go back to what has been
23	marked as "Exhibit 2", there are various portions of that
24	filing that rely upon or are impacted by energy price

1	assumptions. As noted in Section D, this is on Page 2,
2	Item 1, other changes in the assumption about the amount
3	of coal generation due to higher electric market prices.
4	Item 3, there's changes in Newington's generation as a
5	result of those changes in forward prices. Item 4,
6	likewise notes changes in IPP expenses. So, a change in a
7	particular price the use of a particular price forecast
8	would result in some fairly significant changes throughout
9	the filing. And, I note that not to say that it's an
10	impossibility to be done, but it is a labor to incorporate
11	those rates and all of the resulting changes that have to
12	be considered and implemented to develop the final rate
13	that's proposed.
14	So, with that, I would ask that the
15	Commission approve the rate as it's been filed and
16	presented in the December 15th update. And, that it do so
17	in time for implementation on January 1st.
18	CHAIRMAN HONIGBERG: Commissioner Scott.
19	COMMISSIONER SCOTT: Could you elaborate
20	a little bit more please, Mr. Fossum, on actually, can
21	you talk about what the if we were to require what the
22	OCA has recommended, as far as looking at a revised
23	updated forecast and incorporating that, what kind of
24	timeframe do you think you'd need to get that done?

1	MR. FOSSUM: I would have to turn to the
2	witness for that. I wouldn't, obviously, be the one
3	preparing all of that information. So, I honestly I
4	don't know how quickly it could be done.
5	CHAIRMAN HONIGBERG: Let me make a
6	suggestion. Rather than you reopening this examination,
7	we're going to be taking a break anyway. Why don't we
8	take the break now. Mr. Fossum, you consult with your
9	witnesses. And, then, when we come back, we'll come back
10	on the record in this proceeding, end it, and reopen
11	the and open the third one, rather than taking a break
12	in between. Does that sound reasonable?
13	MR. FOSSUM: Certainly.
14	MS. AMIDON: Yes, it does.
15	CHAIRMAN HONIGBERG: Okay. Good. So,
16	let's go off the record now. We're going to take ten
17	minutes and come back at half past eleven.
18	(Whereupon a recess was taken at
19	11:21 a.m. and the hearing reconvened at
20	11:35 a.m.)
21	CHAIRMAN HONIGBERG: Mr. Fossum.
22	MR. FOSSUM: Thank you, Commissioners,
23	for the opportunity to consult with others about the issue
24	of using the more up-to-date price setting. And, at this
	{DE 14-235} {12-18-14}

1 point, and in light of the consultation, I'd have to say 2 that PSNH would be opposed to doing so. It would be 3 substantial work to change all of the schedules and other 4 information in the filing to reflect the change in the 5 energy prices. It could potentially be done in time for a 6 rate-setting. But, even presuming it could be done, any 7 change that would result in the Energy Service rate proposal would likewise result in a necessary change to 8 9 the Stranded Cost rate as has been proposed, because there 10 is the relationship of the IPP costs between those two 11 rates.

A new filing or an addition to the 12 13 filing, even if it could be made, it's not clear what 14 review would be necessary of the information to verify 15 what is put in there, and that it's accurate and reflects 16 the expectations of the Staff and the Commission. And, 17 it's not clear whether something like a new hearing might 18 be required on an exceedingly compressed time schedule. 19 I'd also note that it likely wouldn't 20 result in a significant change to the rate from that which 21 is proposed right now. Given the amount of energy that 22 PSNH actually purchases, the change in the forward prices 23 for that energy wouldn't, it appears, result in any 24 substantial change. A rough, and I emphasize a very rough

1	estimate would be something in the range of 0.2 to 0.3 $$
2	cents per kilowatt-hour.
3	That said, PSNH would be open to making
4	future filings with more up-to-date information, and to
5	discussing the issue with Staff and the OCA perhaps about
6	what a more up-to-date filing should look like, how close
7	in time the information should be obtained and used. So,
8	it's not that we are opposed to the idea in general. It's
9	primarily that, given the time available, that it simply
10	appears to be too much to do at this time.
11	CHAIRMAN HONIGBERG: We're going to put
12	your mind at ease, and we're just going to take that off
13	the table and not consider that for this go-around. Does
14	anybody want to vehemently disagree with that?
15	(No verbal response)
16	CHAIRMAN HONIGBERG: Thank you. So, I
17	don't think we need to do anything else. I think you had
18	said everything else you needed to say, is that right,
19	Mr. Fossum?
20	MR. FOSSUM: That's correct. Yes.
21	CHAIRMAN HONIGBERG: All right. So, we
22	can close the record on 14-235 and take that matter under
23	advisement.
24	(Whereupon the hearing was adjourned at 11:38 a.m.)
