Dear NH-PUC

We are writing regarding the proposed "natural gas" pipeline that would go through many New Hampshire towns. We are appalled that such a dangerous project could even be considered for our area.

By now you have heard many reasons why such a project should not be allowed. We'll give you a few more reasons you may not have heard yet. Hopefully this giant miscarriage of justice will be stopped.

Almost no one in the affected towns supports this project. It is interesting seeing liberals and conservatives fighting side by side against Kinder Morgan.

It is appalling that Kinder-Morgan thinks they can come into our towns and over property and just roll right over us. It is unjust and needs to be stopped.

Please help us
