

9/21/15

Dear Public Utilities,

DW 15-209 order# 25809
Lakes Region Water Co Inc.

We are writing you in hopes of The Lakes Region Water Co. not being allowed to increase our water rates by 38.18% ! We have already payed a 15.95% increase in 2014. These are the highest rates in the state of N.H. already. The water quality is poor and they seem to have alot of outages due to leaks, which when are being fixed we are left with no water, alot of times for the day !

We donot think we should have to fund the properly expansion of their Mt. Roberts property ! We live in Ma and our N.H. rates will be tripled to what we pay there if they are given the OK to raise the rates.

We have been asking for Lakes Region Water Company to put meters in each residence and they have repeatedly said no! I estimate $\frac{3}{4}$ of the residences at Indian Mound are not using their places from mid October thru mid April. That means we are all paying for six months of water that we are not using because we winterize our places and shut the water off.

My husband is a commercial fisherman. He would love to buy a bigger newer boat. Should he raise the per pound price so he can make enough money to buy one even though every other fisherman is charging the lower market price.

Please do not allow them to raise the rates. Make them put in meters so we only pay for what we use! They must be making

a pretty penny off that alone!

Sincerely,

Carlton & Gail Watt
