Re: DE 15-302, Renewable Energy Incentive Program for Residential Solar and Wind Systems – Corrected Page 3 of Staff Recommendation Memorandum

Dear Ms. Howland:

Please find enclosed for filing an original and two copies of a corrected page 3 of the memorandum filed by Commission Staff on October 5, 2017 in the above-referenced docket. The enclosed corrects Figure 2 on page 3 to show the dollar amounts on a per watt basis rather than on a per kilowatt basis. The corrected Figure 2 is identical in substance to that distributed during the public comment hearing on October 10, 2017.

This corrected page is intended to replace page 3 in the Staff recommendation memo, which otherwise remains the same as originally filed.

Thank you for your attention to this corrective filing.

Sincerely,

A handwritten signature in cursive script that reads "David Wiesner".

David K. Wiesner
Staff Attorney

costs, while increasing the total number of rebates available as compared to higher incentive level alternatives.

Figure 2: Average System Cost/watt with Rebate

* 2018 'System Cost/watt with Rebate' estimated using \$1,500 rebate limit and FY2017 system costs/watt data.

Application Process Simplification

To reduce the administrative burden associated with Program incentive applications, Staff recommends that the following changes to the program application process be approved and implanted:

- a. Remove notarization requirement for both Step 1 and Step 2 applications.
- b. Step 1 Application Changes:
 - i. Remove Step 1 requirement to list panel and inverter types;
 - ii. Require certification that all parts will be UL-certified;
 - iii. Remove Step 1 requirement to list number of panel calculation; require only anticipated total kW DC and AC capacity;
 - iv. Remove Step 1 requirement to list electrician information; require certification that system will be installed by a state-licensed electrician and inspected by a state-licensed electrician or town building inspector;
 - v. Change Total Solar Resource Fraction (TSRF) calculation and shading analysis requirement to certification by applicant and installer (unless self-installed) that shading analysis and TSRF was performed and reviewed with the applicant.
- c. Step 2 Application Changes:
 - i. Remove requirement for documentation of UL certification for system components; require only self-certification of system component UL compliance; and
