RE: Petition of 186 Communications, LLC to construct and maintain fiber optic communications cable over and across the Ammonoosuc River in Littleton, New Hampshire

Dear Ms. Howland,

186 Communications, LLC has been contracted to design, construct, and operate a new fiber optic build in Littleton, NH, for the purpose to provide a new feed to the Direct TV facility located at 1089 Mt. Eustis Rd. The fiber provides a necessary back up to their existing services that currently feed this location. Existing Direct TV providers experienced issues last year during the Thanksgiving storm that caused service interruptions to their customers. This new fiber ring will provide a back up to the current services already installed at the facility and allow Direct TV to operate, with limited interruption.

Included with this letter is one petition for the two river crossings located in Littleton, NH. The included petition is for 186 Communications, LLC to construct and maintain a fiber optic telecommunications cable over and across the attached river crossings. This fiber optic communications cable will be attached to existing utility poles that have wires crossing the same waterways.

Please let me know if you have any questions or further requirements.

Respectfully Submitted,

A handwritten signature in blue ink, appearing to read 'Jeff Harrington', written over a white background.
