The NPT route map below shows the PSNH/ Eversource easement crossing parcels 2021, 2022, 2023 and 2024 and 2037 but I can not find these listed in the above easement deeds list. In addition, the map shows the line crossing Lot 92, which is numbered as part of the Groveton Paper purchase. I do not see Lot 92 listed in the easement deed from Groveton Paper Co, only Lots 91 and 90.

NPT Map 53 shows the easement not crossing what I think is Lot 93 (un-numbered lot just above Pole D-143-334), which it does cross, as shown in Hollis Brooks easement deed. In addition, his deed does not describe the line of the easement, only the section of property it crosses, and thus appears incomplete.

Am I reading the documents properly here? Excuse any errors, it's very cumbersome going between three sets of documents.
