**Subject:** No to Northern Pass

Recently Eversource and Hydro-Quebec submitted an application to the New Hampshire PUC for their Purchase Power Agreement (PPA) for Northern Pass, making many claims that the project will benefit NH. Here are the real facts around that PPA:

**An Unfair Share:** Northern Pass states that the PPA "guarantees Eversource NH customers will receive their share of the power from Northern Pass," making this sound like a great deal for us, right? WRONG. We are getting nothing more than what we are already entitled to as the minimum amount of energy share mandated by ISO New England. Not only that, but this energy is only going to Eversource customers while the rest of New Hampshire has to live with these ugly towers ruining our natural heritage.

**Reliable Power? Think Again:** The New England region will only get energy when Canada doesn't need it. Not only that, but H-Q has a history of cutting us off to energy when we need it the most.

**Price Instability:** How can Eversource tout Northern Pass as lowering our energy bills when they won't let the public know how much the energy is being sold for? We don't even know how much the cost of the Northern Pass line will be, something that we the ratepayers will have to pay for!

**Environmental Devastation:** Industrial Canadian Hydro is not clean nor is it the best renewable energy alternative for our grid. The environmental impacts of Northern Pass far outweigh the reduction in carbon emissions.

Give us a break, say NO to Northern Pass - send an email to PUC Commissioners Kathryn Bailey and Bob Scott: tell them not to approve the Northern Pass PPA.
