Subject: Re: fracked gas pipeline

Good morning Director Debra Howland,

As a member of the Etna/Hanover community I am deeply concerned that Liberty Utilities is working toward building a gas pipeline to serve our towns. This vision runs directly contrary to what I believe our community is working toward: 100% sustainable energy by 2050. From speaking with my friends and neighbors this sentiment is widely shared.

For the future of our beautiful state I request that you respectfully decline Liberty's building request as running contrary to the towns longterm health.

Thank you for your time and continuing good work.

My best,
~Sharon Morgan
